(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface for fuse and relay monitoring, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence of a display screen with a transitional graphical user interface for fuse and relay monitoring in accordance with the present invention;

FIG. 2 is a front view of a second image thereof;

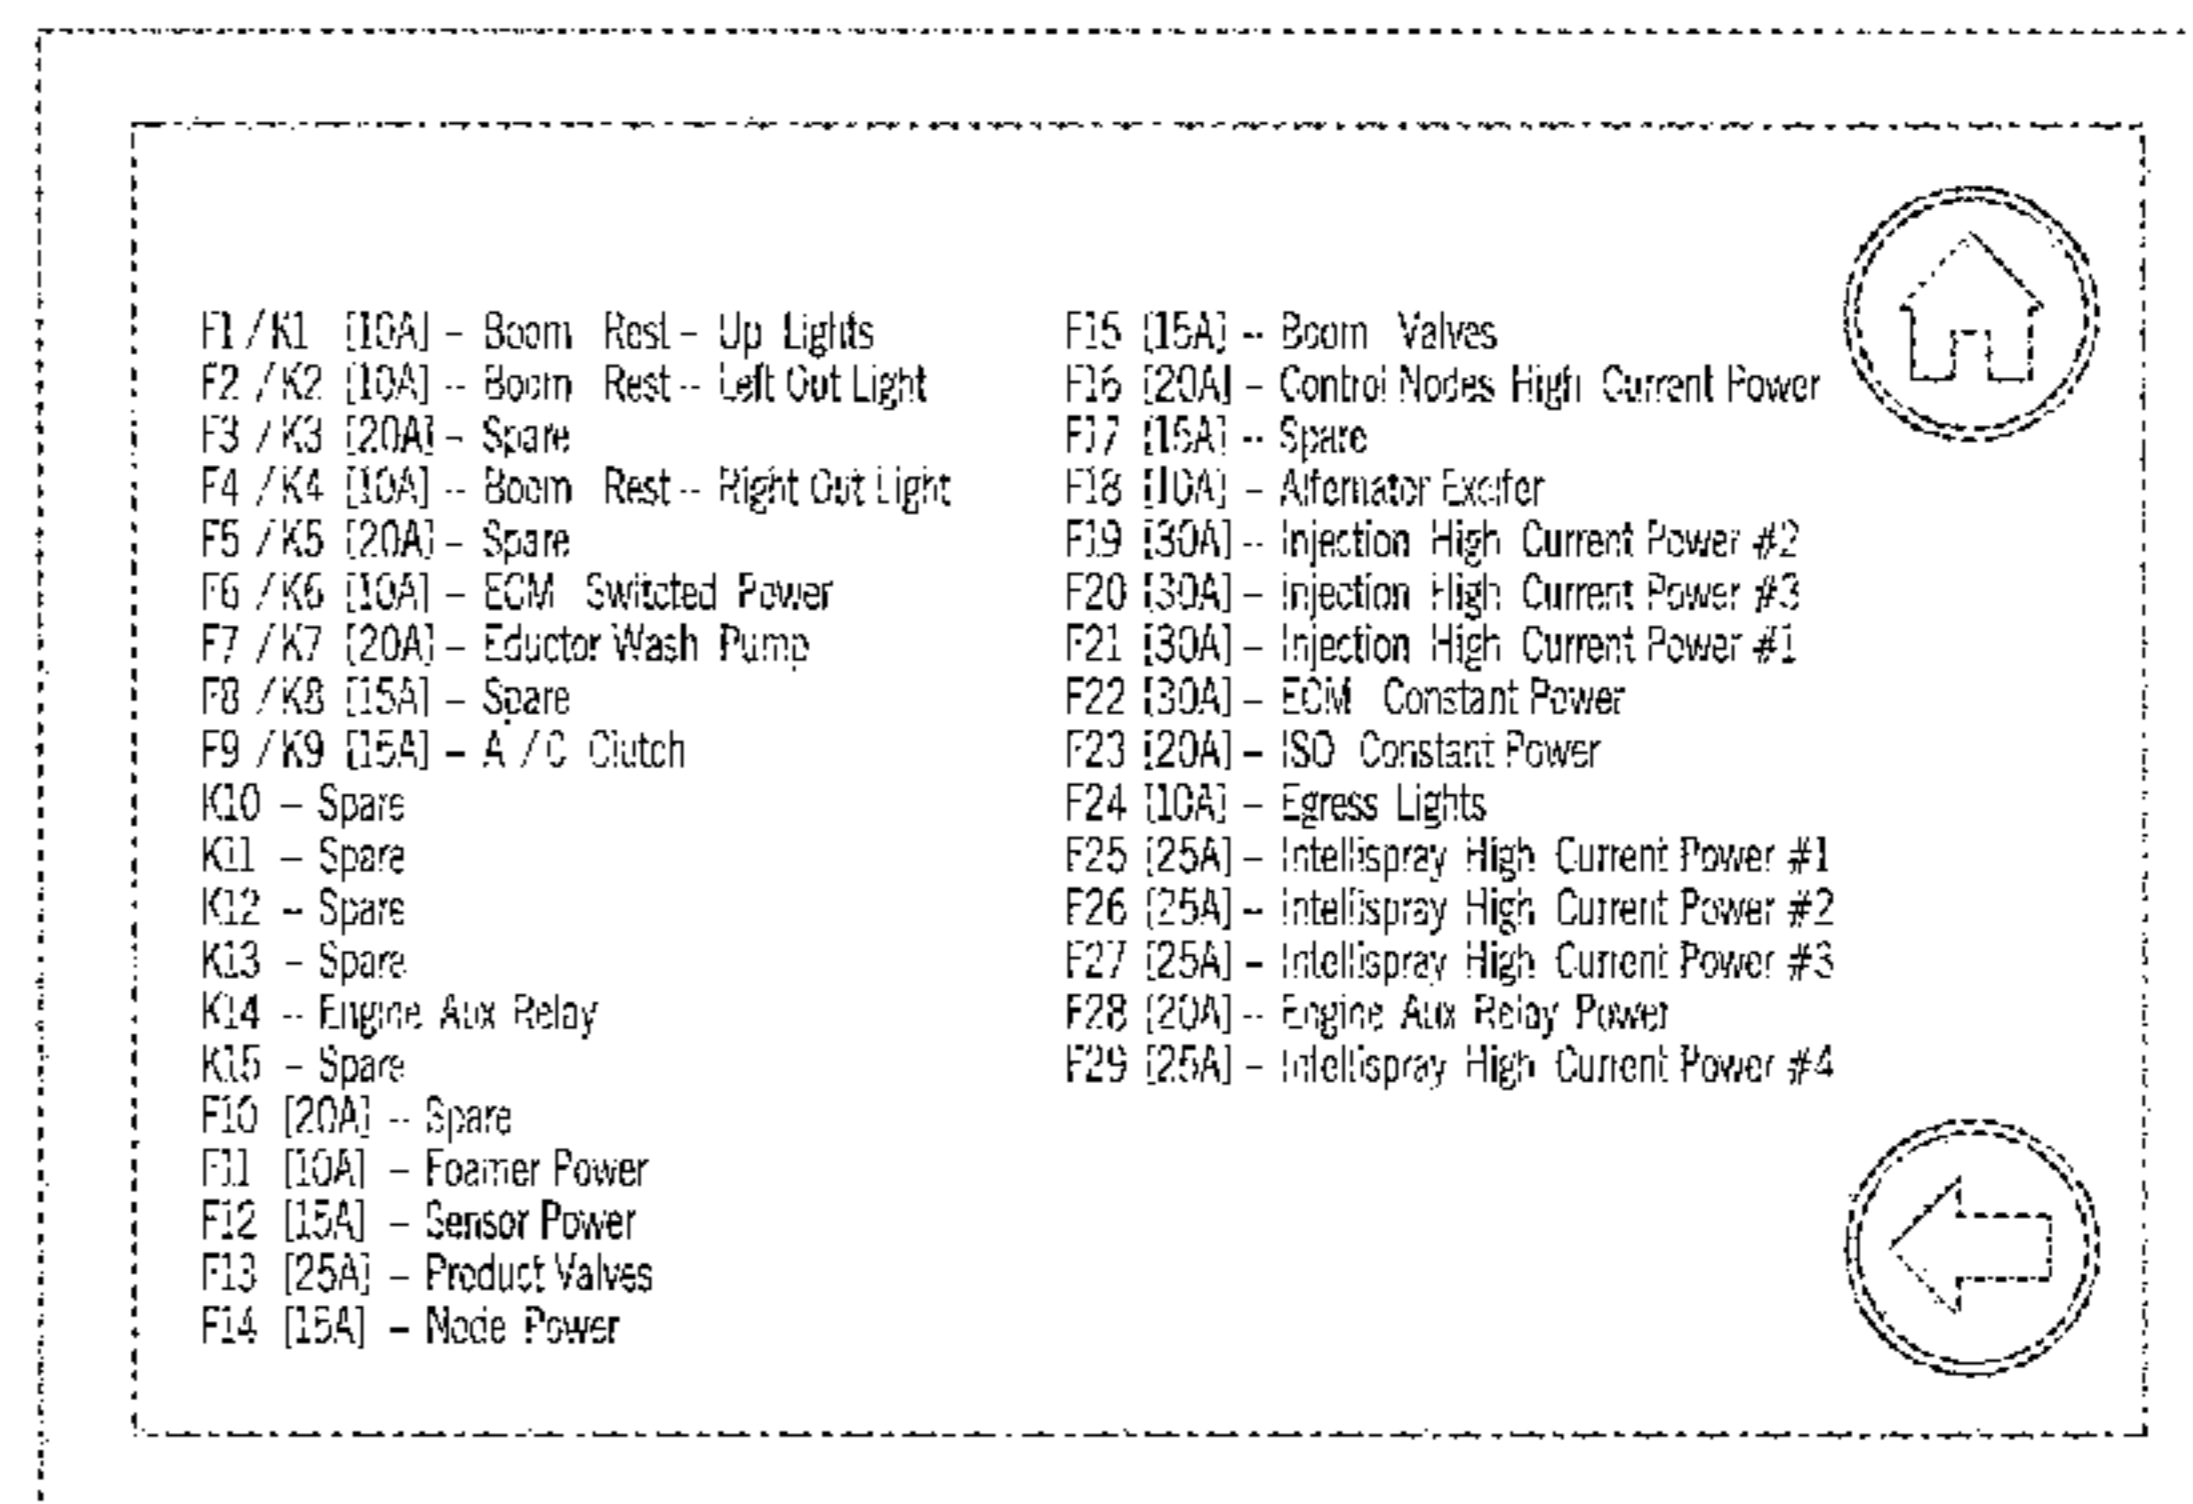

FIG. 3 is a front view of a third image thereof; and,

FIG. 4 is a front view of a fourth image thereof.

The outmost evenly-spaced broken line is included for the purpose of showing portions of the article which form no part of the claim. The dot-dash broken line is included for the purpose of showing portions of the display screen which form no part of the claim. Other evenly-spaced broken lines are included for the purpose of showing portions of the graphical user interface which form no part of the claim.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period forms no part of the claimed design.

1 Claim, 4 Drawing Sheets
