(57) CLAIM

The ornamental design for a gown with pockets, as shown and described.

DESCRIPTION

FIG. 1 is a front elevation view of a gown with pockets, shown in use with an untied configuration with the opening of the gown positioned to the front of the user and showing our new design;

FIG. 2 is a rear elevation view thereof;
 FIG. 3 is a rear elevation view thereof shown in an alternate position, with the opening of the gown positioned to the back of the user;
 FIG. 4 a front elevation view thereof shown with the opening of the gown positioned to the back of the user;
 FIG. 5 is a front elevation view of a gown with pockets, shown in use, in a tied configuration with the opening of the gown positioned to the front of the user;
 FIG. 6 is a front elevation view thereof shown in an alternate position, with the opening of the gown positioned to the back of the user as shown in FIG. 5;
 FIG. 7 is a left elevation view shown in an untied and expanded configuration;
 FIG. 8 is a right elevation view thereof;
 FIG. 9 is a top plan view thereof;
 FIG. 10 is a bottom plan view thereof;
 FIG. 11 is a rear elevation view shown in an untied and flattened configuration;
 FIG. 12 is a front elevation thereof;
 FIG. 13 is a front elevation view with a left, rear flap of the gown folded open to expose the right, rear flap of the gown;
 FIG. 14 is a front elevation view thereof with both the left, rear flap and the right, rear flap folded open to expose the interior of the gown;
 FIG. 15 is another front elevation view of a gown with pockets, shown in use with the straps shown in broken lines, in an untied configuration with the opening of the gown positioned to the front of the user; and
 FIG. 16 is a rear elevation view thereof;
 FIG. 17 is a rear elevation view thereof shown in an alternate position, with the opening of the gown positioned to the back of the user;
 FIG. 18 is a front elevation view thereof shown with the opening of the gown positioned to the back of the user;
 FIG. 19 is a front elevation view of a gown with pockets, shown in use, in a tied configuration with the opening of the gown positioned to the front of the user;
 FIG. 20 is a front elevation view thereof shown in an alternate position, with the opening of the gown positioned to the back of the user as shown in FIG. 19;
 FIG. 21 is a left elevation view shown in an untied and expanded configuration;
 FIG. 22 is a right elevation view thereof;
 FIG. 23 is top plan view thereof;
 FIG. 24 is a bottom plan view thereof;
 FIG. 25 is a rear elevation view shown in an untied and flattened configuration;
 FIG. 26 is a front elevation view thereof;
 FIG. 27 is a front elevation view with a left, rear flap of the gown folded open to expose the right, rear flap of the gown; and,
 FIG. 28 is a front elevation view thereof with both the left, rear flap and the right, rear flap of the gown folded open to expose the interior of the gown.
 The broken lines of the human user shown in FIGS. 1-6 and 15-20 illustrate environment, and all other broken lines shown illustrate portions of the gown with pockets that form no part of the claimed design.
