(57) **CLAIM**

The ornamental design for a truck cap with an outwardly convex rear lift gate, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a design for a truck cap with an outwardly convex rear lift gate or window for a truck having a corresponding outwardly or rearwardly convex tailgate.

FIG. 2 is a top view of the design of FIG. 1.

FIG. 3 is a side view of the design of FIG. 1.

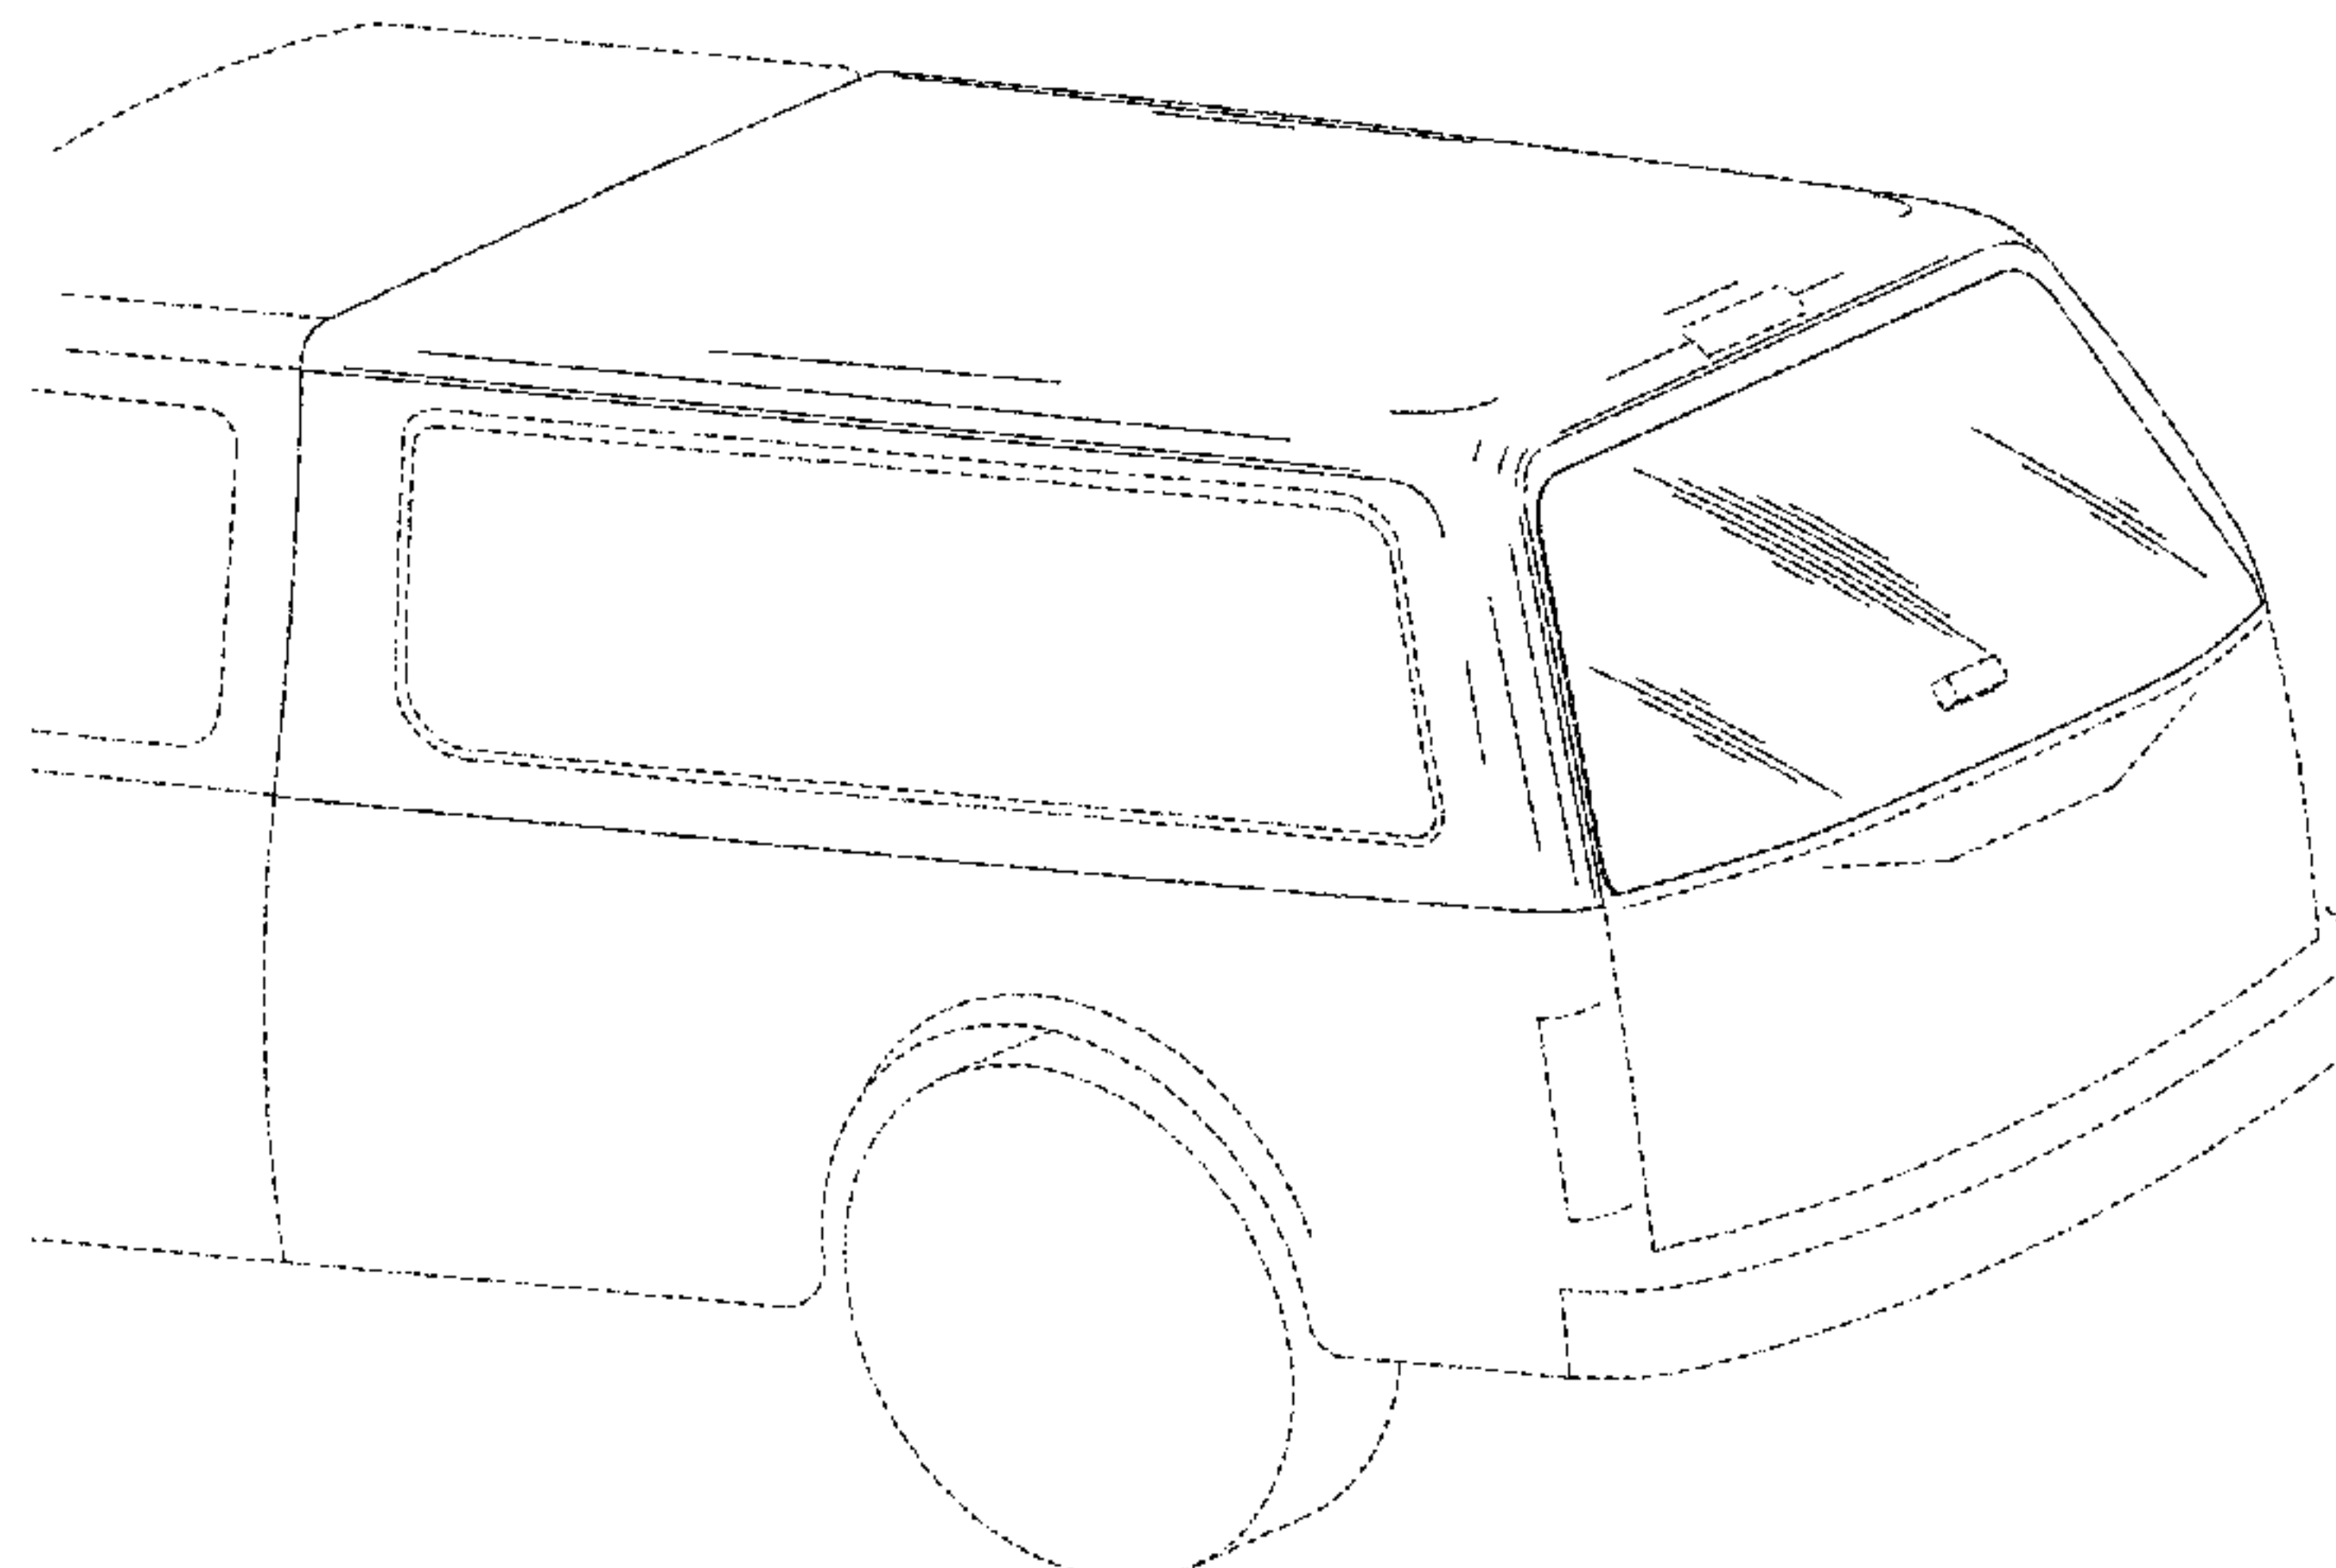

FIG. 4 is an enlarged partial side view of the design of FIG. 1.

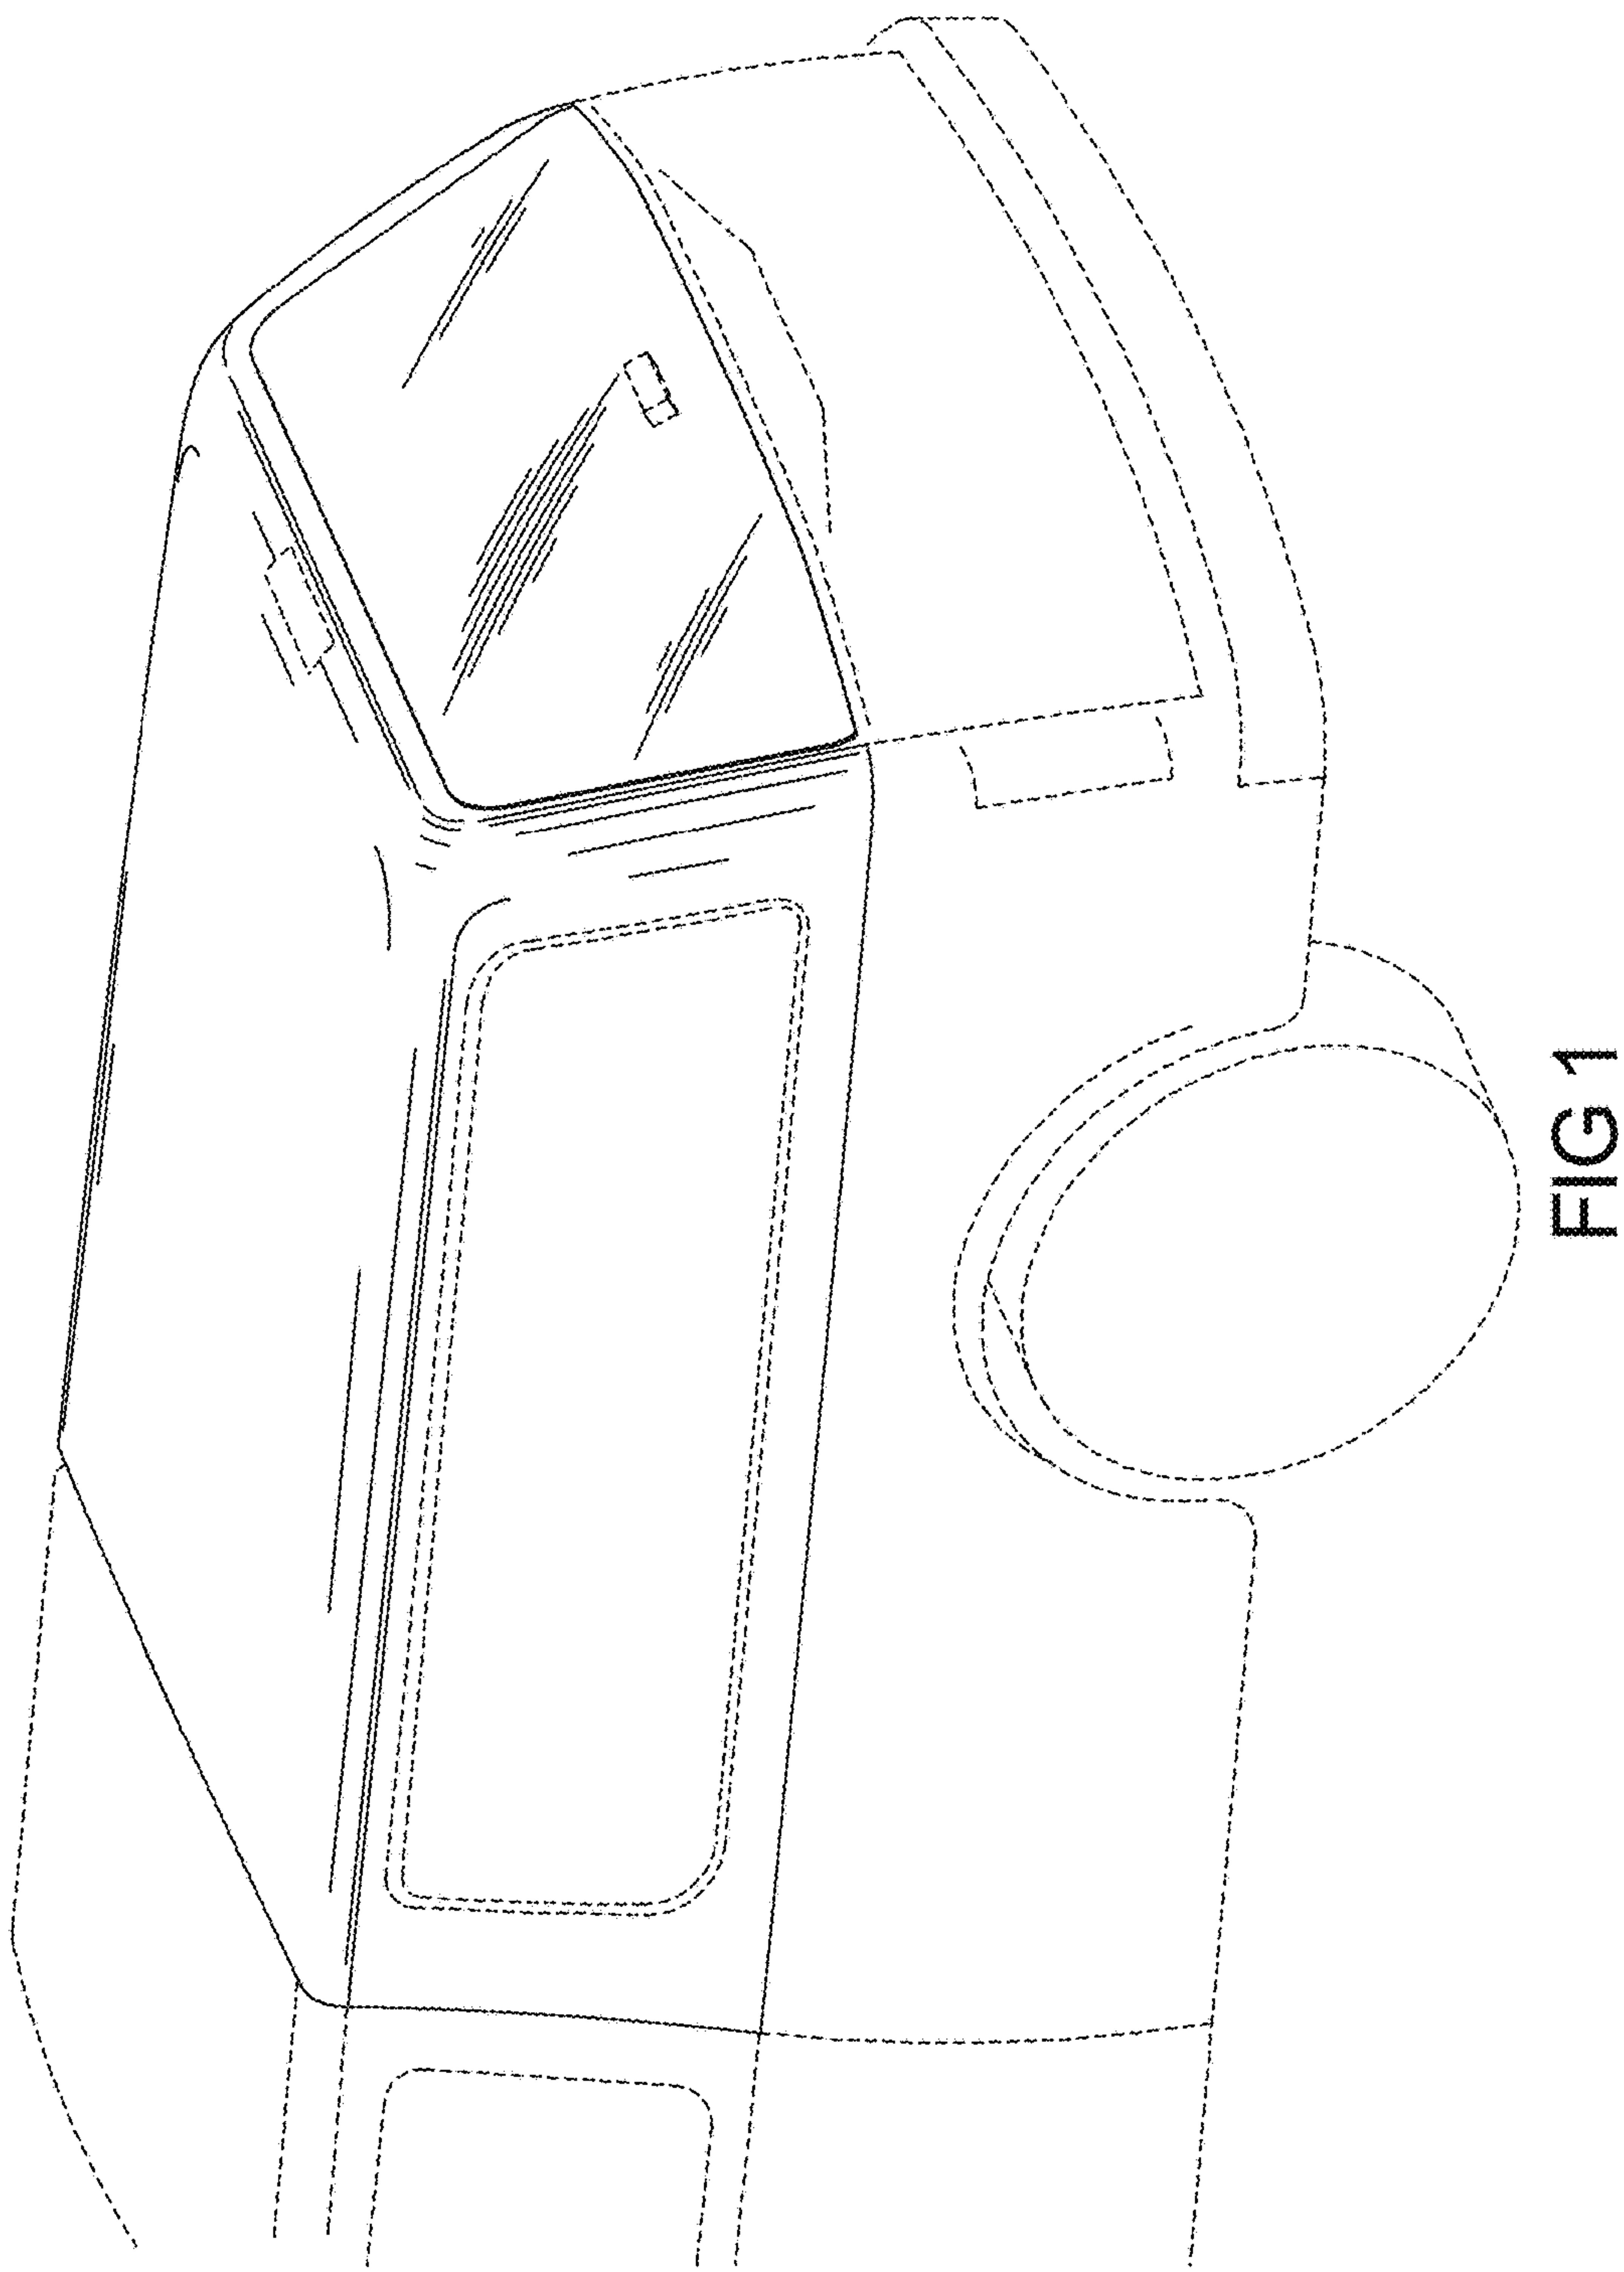

FIG. 5 is a rear view of the design of FIG. 1; and,

FIG. 6 is an enlarged partial perspective view of the design of FIG. 1, with the rear lift gate or window in a raised open position to better show the outwardly or rearwardly convex shape of the lift gate or window.

As should be apparent from the drawings and the description above, the design disclosed and claimed herein is particularly applicable to a truck having a corresponding outwardly or rearwardly convex tailgate. The drawings disclose various additional designs via broken lines beyond that claimed herein, including, e.g., a design for a combination outwardly convex truck cap rear lift gate or window and corresponding outwardly or rearwardly convex tailgate or portion thereof, including, e.g., a design for a combination outwardly convex truck cap rear lift gate or window and corresponding outwardly or rearwardly convex tailgate cap portion as seen for example in FIG. 6.
