The ornamental design for a display panel of a programmed computer system with a graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence of a display panel of a programmed computer system with a graphical user interface, showing our new design;

FIG. 2 is a front view of a second image thereof;

FIG. 3 is a front view of a first image in a sequence of a second embodiment of a display panel; and,

FIG. 4 is a front view of a second image thereof.

The outermost broken line rectangle illustrates a display panel and forms no part of the claimed design. The remaining broken lines illustrate portions of the graphical user interface that form no part of the claimed design.

The appearance of the images sequentially transitions between the images shown in FIGS. 1-2 and FIGS. 3-4. The process or period in which one image transitions to another forms no part of the claimed design.
