Primary Examiner — George D. Kirschbaum

Assistant Examiner — Kathleen L Jones

(57) **CLAIM**

The ornamental design for a computer with animated graphical user interface, as shown and described.

DESCRIPTION

1. Computer with animated graphical user interface

1.1 : First front view

1.2 : Second front view in changed state

1.3 : Third front view in changed state

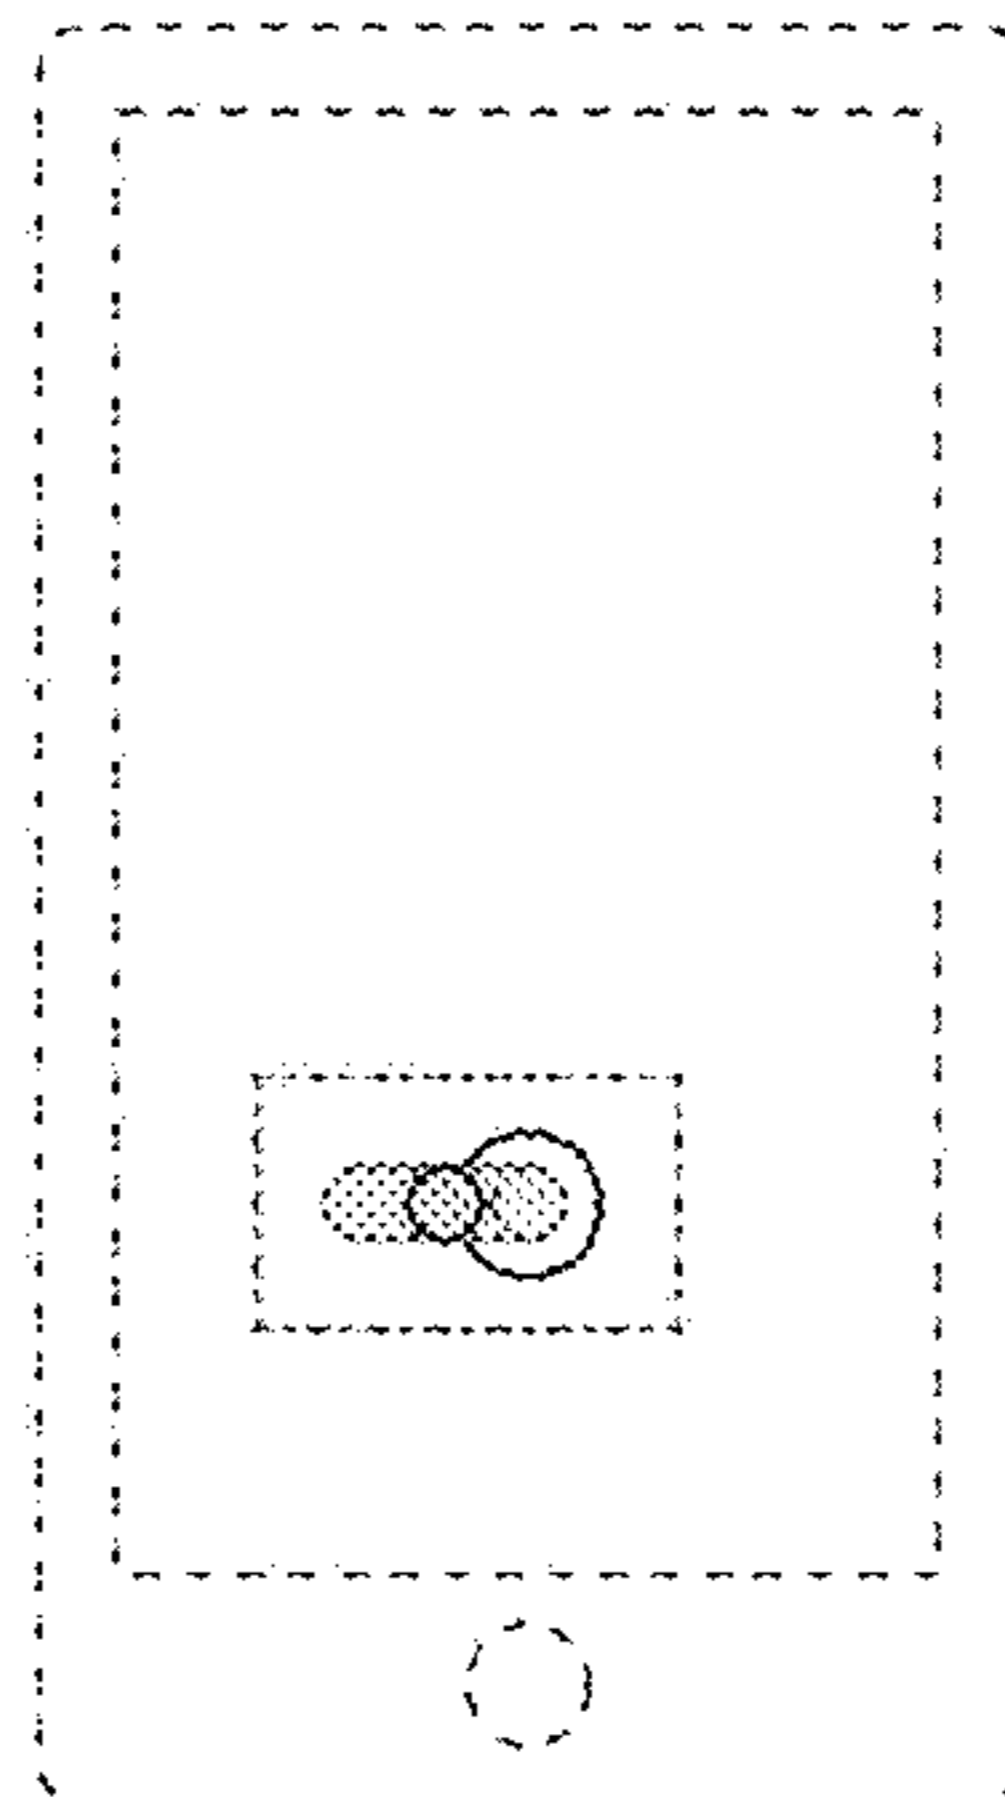

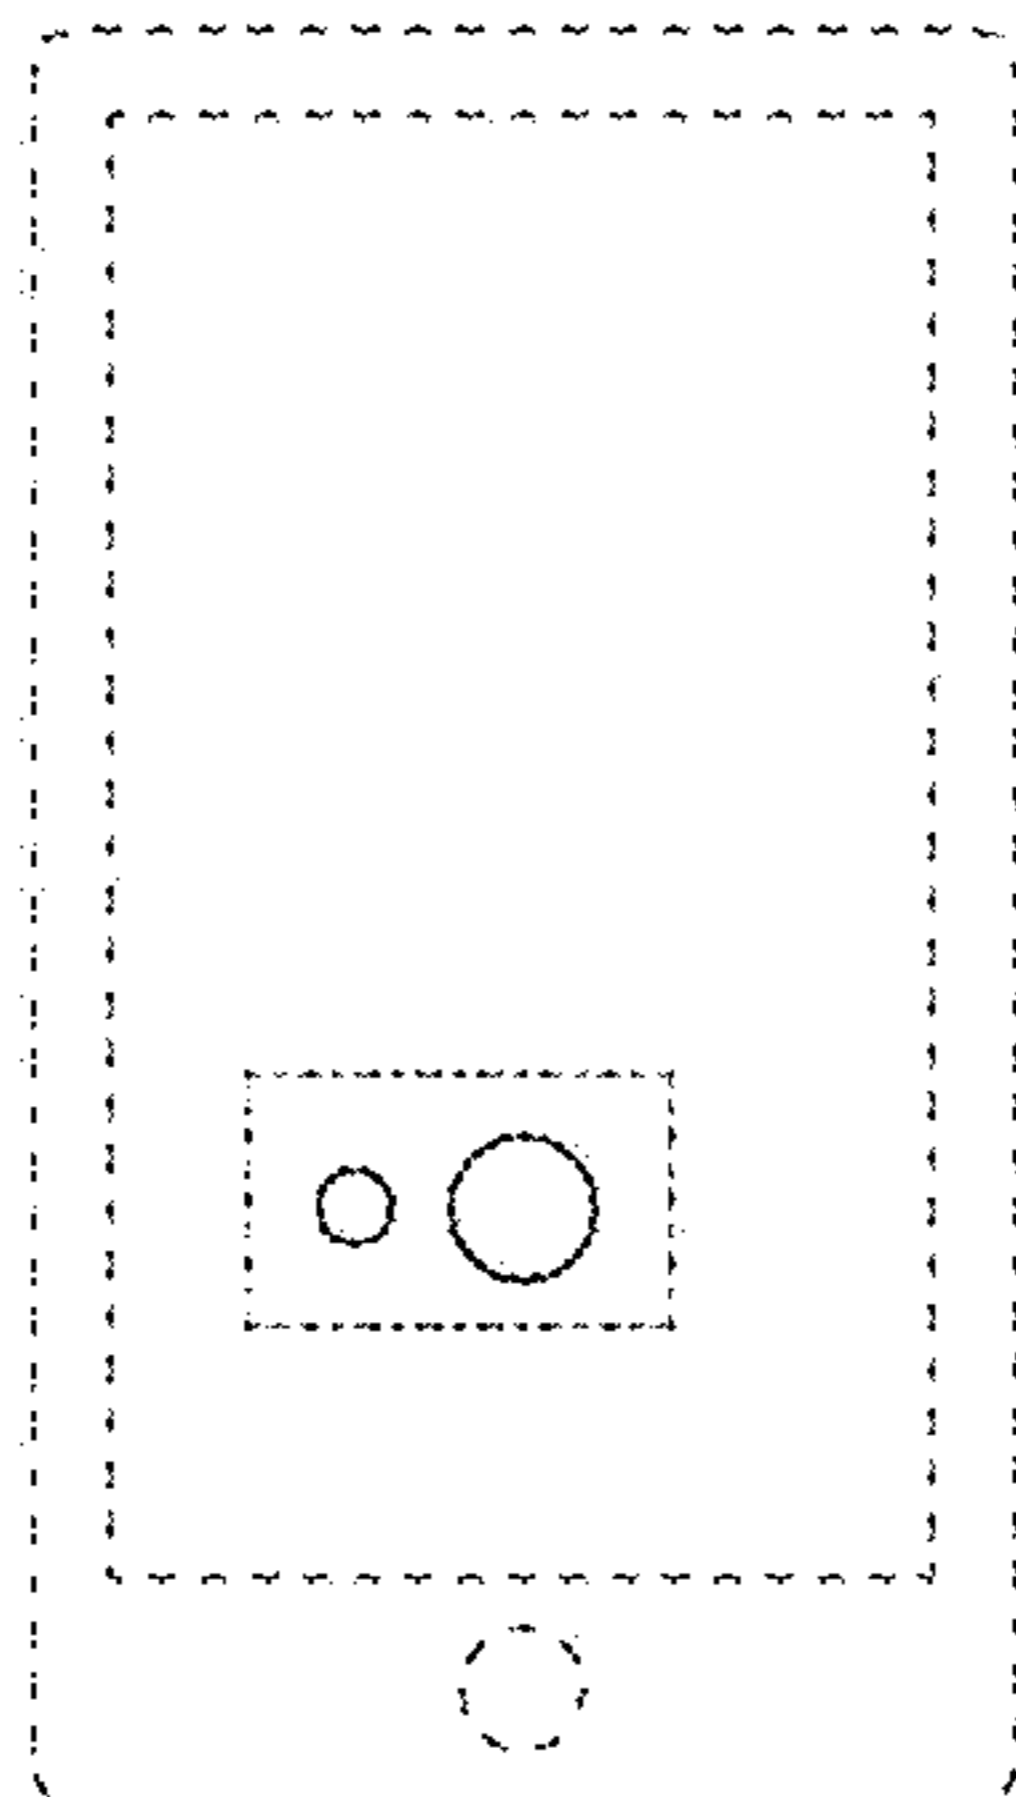

1.4 : Fourth front view in changed state

The dash-dotted broken lines in reproductions 1.1-1.4 define the bounds of the claimed design; the evenly spaced broken lines show a computer; all broken lines form no part of the claimed design.

While the claim is directed to the ornamental appearance of the computer with animated graphical user interface, figures 1.1-1.4 show an animated GUI for supporting an operation of an autofocus button upon remote control photographing by the computer having camera function.

The appearance of the transitional image sequentially transitions between the images shown in reproductions 1.1-1.4. The process or period in which one image transitions to another image forms no part of the claimed design.

1 Claim, 4 Drawing Sheets
