(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. **1** is a front view of a first image in a sequence of a transitional graphical user interface on a display screen;
FIG. **2** is a front view of a second image in the sequence of the transitional graphical user interface on the display screen;
FIG. **3** is a front view of a third image in the sequence of the transitional graphical user interface on the display screen;
FIG. **4** is a front view of a fourth image in the sequence of the transitional graphical user interface on the display screen;
FIG. **5** is a front view of a fifth image in the sequence of the transitional graphical user interface on the display screen;
FIG. **6** is a front view of a sixth image in the sequence of the transitional graphical user interface on the display screen;
FIG. **7** is a front view of a seventh image in the sequence of the transitional graphical user interface on the display screen;
FIG. **8** is a front view of an eighth image in the sequence of the transitional graphical user interface on the display screen; and,
FIG. **9** is a front view of a ninth image in the sequence of the transitional graphical user interface on the display screen.
The appearance of the transitional graphical user interface sequentially transitions between the images shown in FIGS. **1-9**. The process or period in which one image transitions to another image forms no part of the claimed design.
The outer broken line rectangle showing the display screen and all other broken lines showing portions of the graphical user interface do not form part of the claimed design.
