(57) **CLAIM**

The ornamental design for a display screen with animated graphical user interface, computer with scroll end guide function as shown and described.

DESCRIPTION

FIG. 1: is a front view of a first image in a sequence of a display screen with animated graphical user interface, according to a first embodiment;

FIG. 2: is a second image thereof;

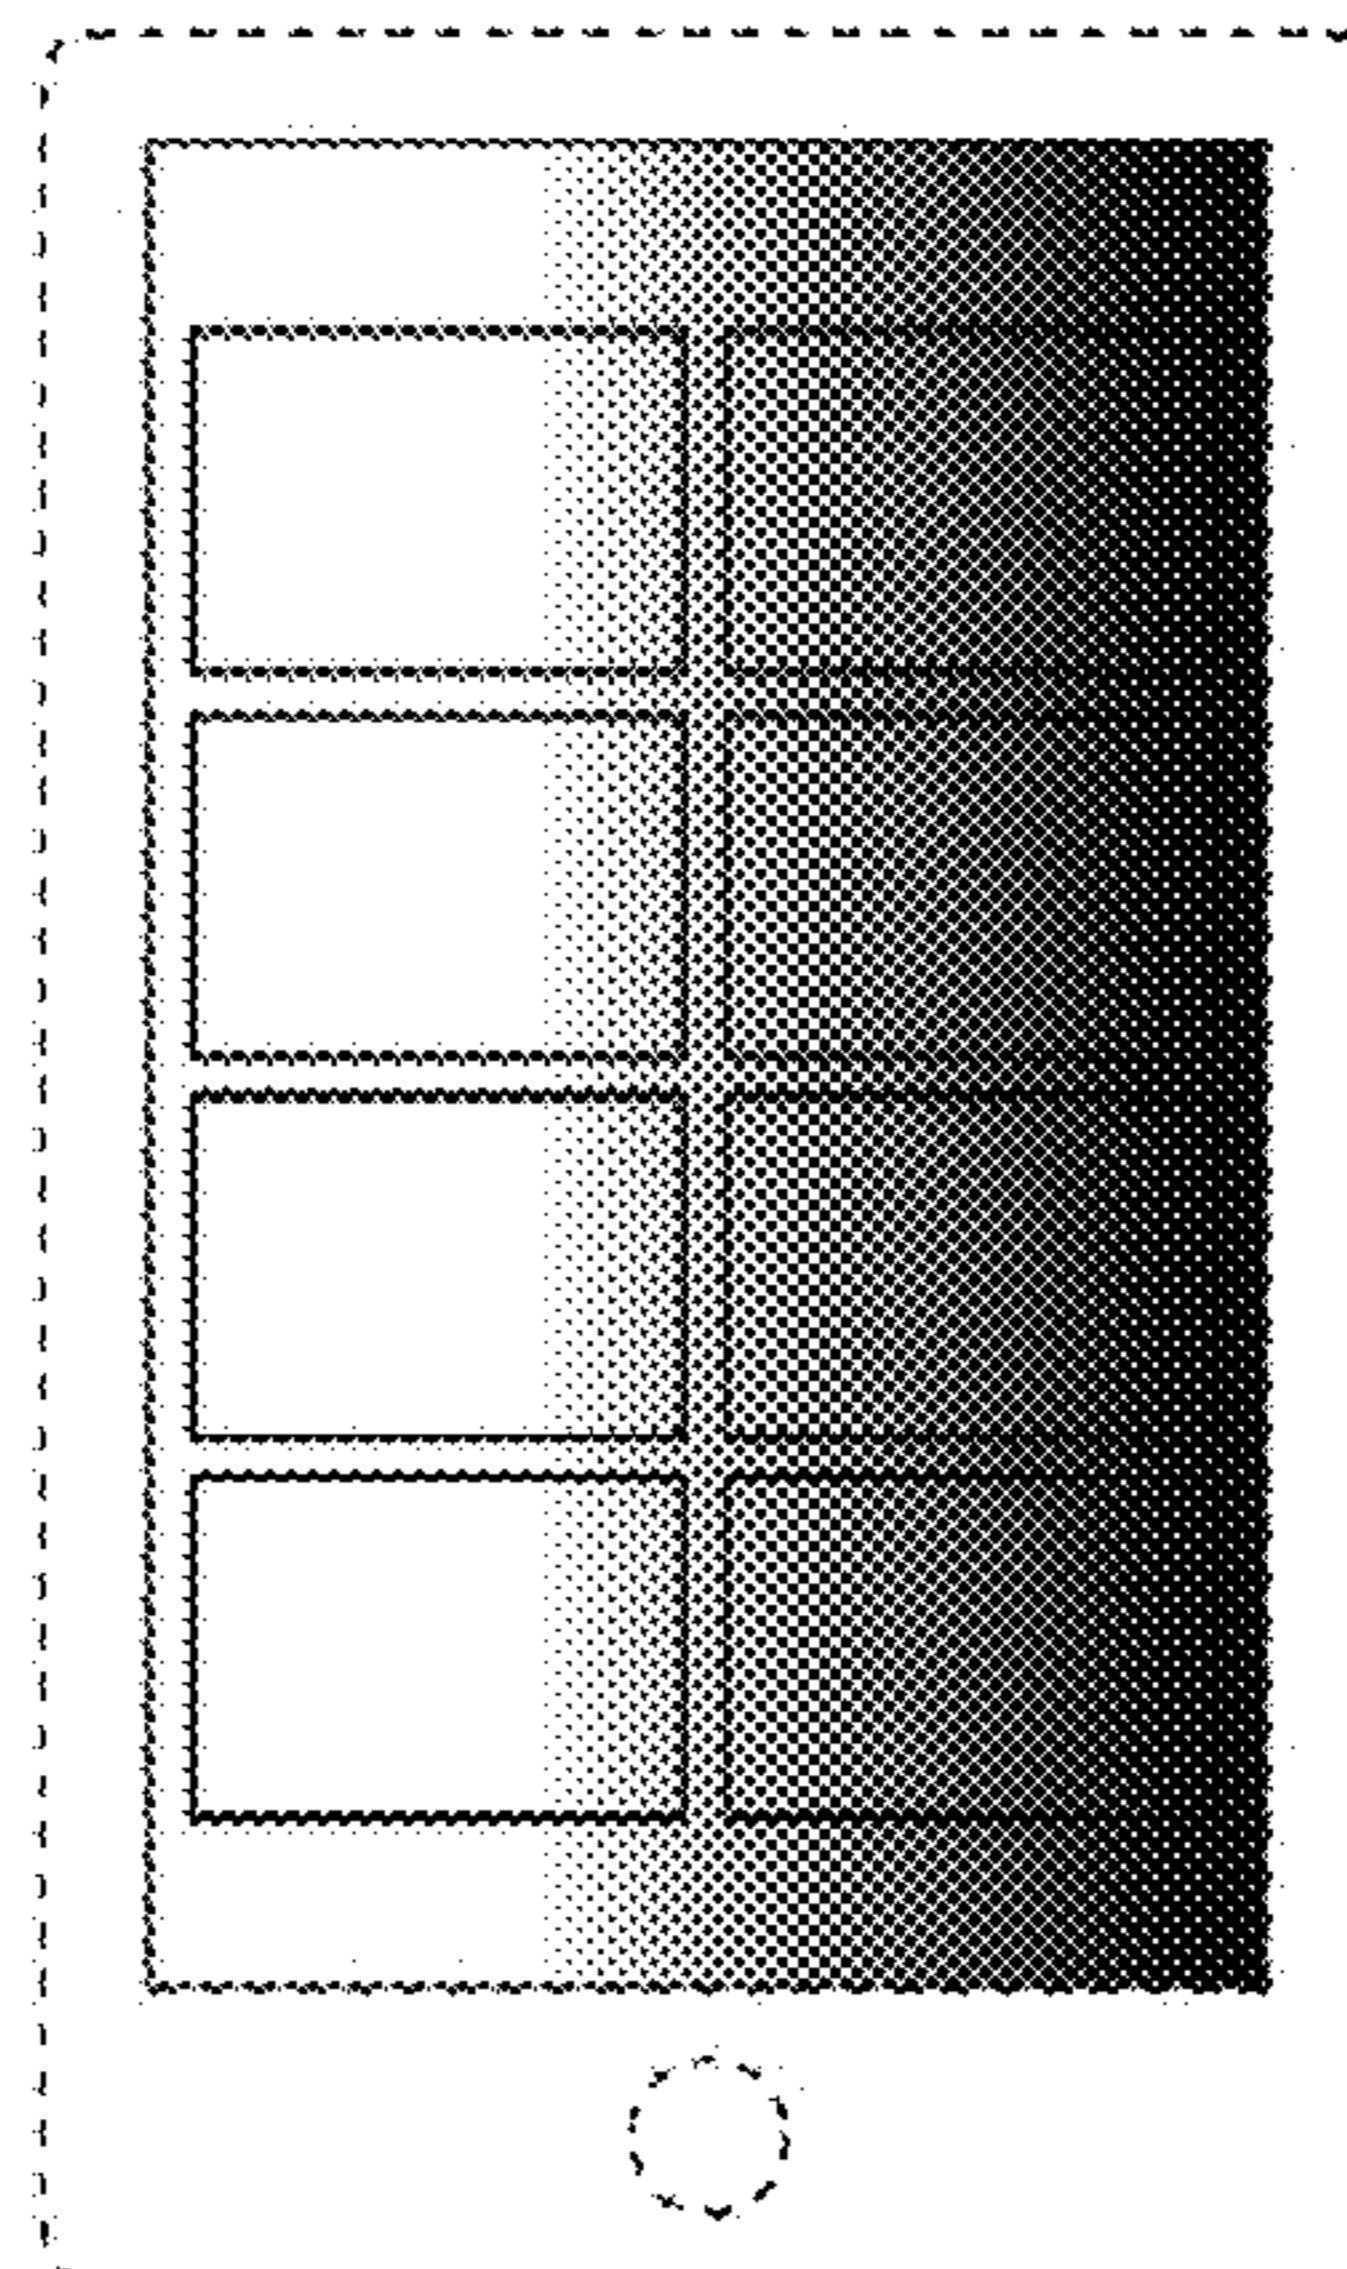

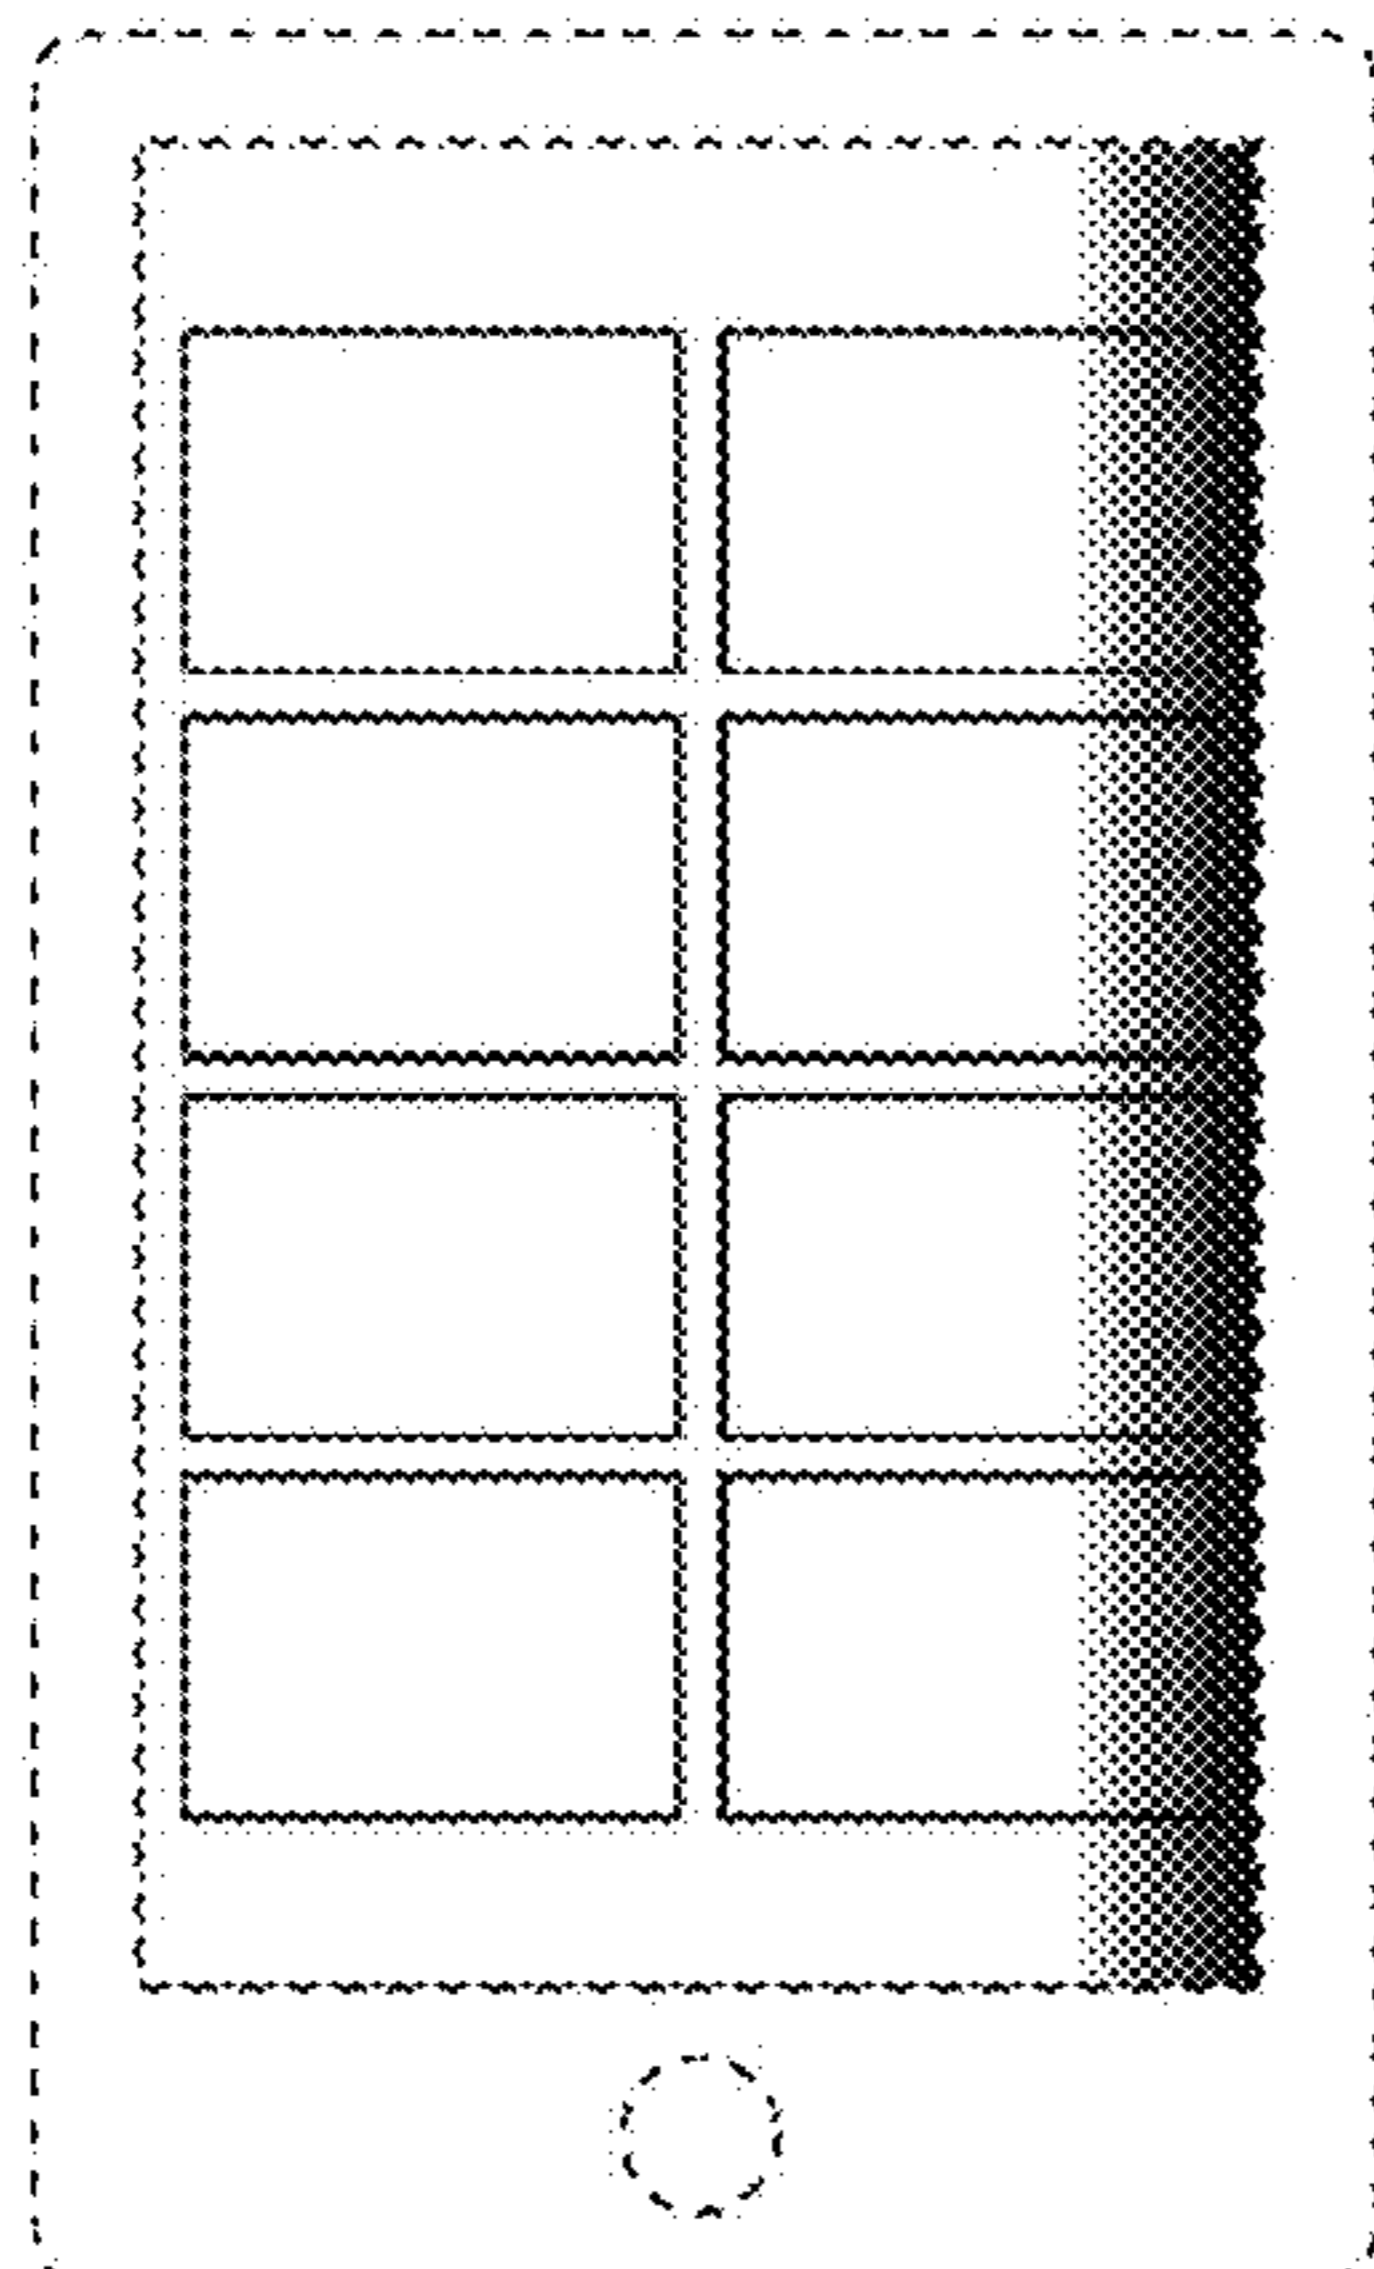

FIG. 3: is a front view of a first image in a sequence of a display screen with animated graphical user interface, according to a second embodiment; and,

FIG. 4: is a second image thereof.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-2 and in FIGS. 3-4. The process or period in which one image transitions to another image forms no part of the claimed design.

The innermost broken line rectangle showing a display screen represents the bounds of the claimed design and forms no part thereof, while all other broken lines show an electronic device forming no part of the claimed design.
