(57) **CLAIM**

The ornamental design for a display screen or portion thereof with transitional graphical user interface, as shown and described.

DESCRIPTION

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application

publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a display screen or portion thereof with transitional graphical user interface showing a first image in a first sequence according to the claimed design; FIG. 2 is a front view showing a second image in the first sequence;

FIG. 3 is a front view showing a third image in the first sequence;

FIG. 4 is a front view of a display screen or portion thereof with transitional graphical user interface showing a first image in a second sequence according to the claimed design; FIG. 5 is a front view showing a second image in the second sequence;

FIG. 6 is a front view showing a third image in the second sequence;

FIG. 7 is a front view showing a fourth image in a second sequence;

FIG. 8 is a front view of a display screen or portion thereof with transitional graphical user interface showing a first image in a third sequence according to the claimed design; FIG. 9 is a front view showing a second image in the third sequence;

FIG. 10 is a front view showing a third image in the third sequence;

FIG. 11 is a front view of a display screen or portion thereof with transitional graphical user interface showing a first image in a fourth sequence according to the claimed design; FIG. 12 is a front view showing a second image in the fourth sequence;

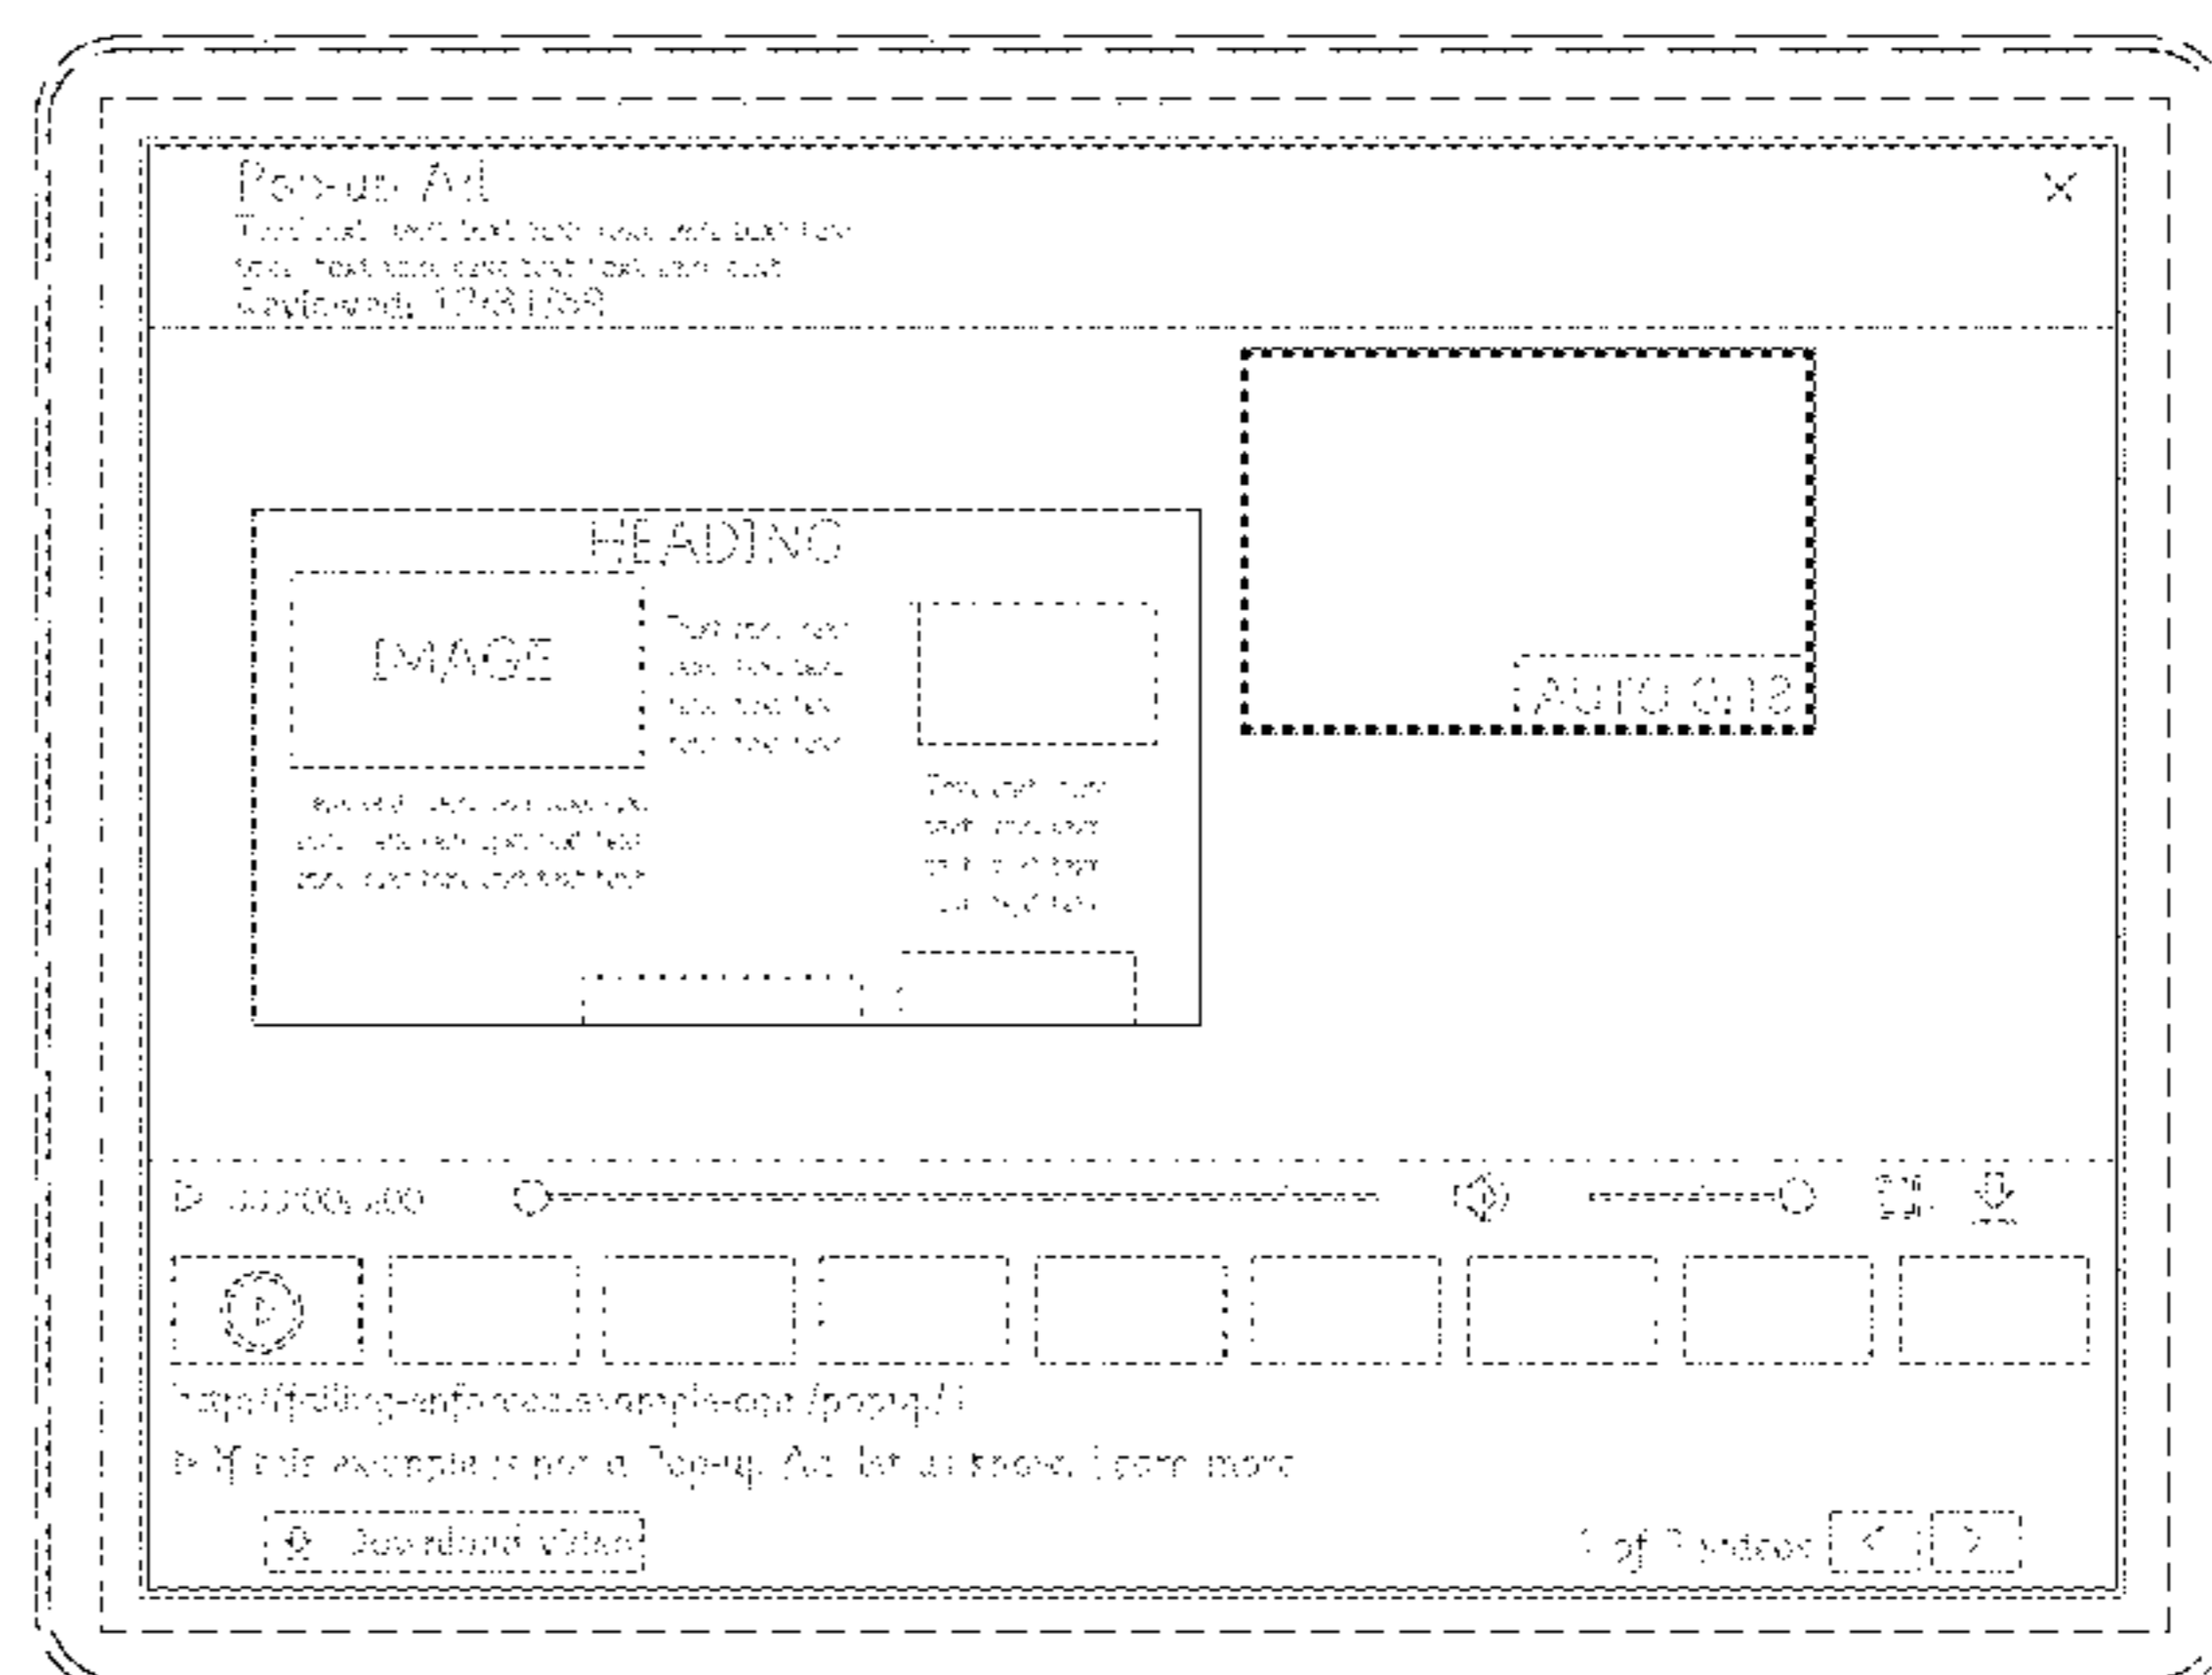

FIG. 13 is a front view showing a third image in the fourth sequence; and,

FIG. 14 is a front view showing a fourth image in a fourth sequence.

The appearance of the image transitions sequentially between the images shown in FIGS. 1-3, 4-7, 8-10 and 11-14, respectively. The process or period in which an image transitions to another image forms no part of the claimed design.

The outer broken line showing of a portion of a display screen forms no part of the claimed design. The broken line
