(57) **CLAIM**

The ornamental design for an intelligent robot display screen with graphical user interface, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing/photographs executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front view of a first image in a sequence of an intelligent robot display screen with graphical user interface, showing our new design;

FIG. 2 is a front view of a second image thereof; and,

FIG. 3 is a front view of a third image thereof.

The appearance of the image sequentially transitions between the images shown in FIGS. 1-3. The process or period in which one image transitions to another forms no part of the claimed design.

The outermost broken lines illustrate an electronic device, which is the environment of the design, and form no part of the claim. The innermost oval broken line outline illustrates the display screen and forms no part of the claimed design.
