(57) **CLAIM**

The ornamental design for a vessel for a candle, as shown and described.

DESCRIPTION

The present application is co-pending with the U.S. design application Ser. Nos. 29/587,107, 29/587,109, and 29/587,097 filed Dec. 9, 2016, all of which are incorporated by reference herein.

FIG. 1 is a perspective view of a vessel for a candle, illustrating our new design;

FIG. 2 is a front elevational view of the vessel;

FIG. 3 is a rear elevational view of the vessel;

FIG. 4 is a side elevational view of one side of the vessel;

FIG. 5 is a side elevational view of the other side of the vessel, the two sides being mirror images of one another;

FIG. 6 is a top plan view of the vessel; and,

FIG. 7 is a bottom plan view of the vessel.

The short-dashed broken lines in the central cavity of the vessel indicate environmental structure—the candle wax and wicks—that forms no part of the claimed design, while all other broken lines indicate the bounds of the claimed design and form no part thereof.
