(57) **CLAIM**

The ornamental design for a connectable cap, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a connectable cap of the present invention;

FIG. 2 is a back view of the connectable cap of FIG. 1;

FIG. 3 is a side view of the connectable cap of FIG. 1;

FIG. 4 is a side view of the connectable cap of FIG. 1;

FIG. 5 is a front and side perspective view of the connectable cap of FIG. 1;

FIG. 6 is a back and side perspective view of the connectable cap of FIG. 1;

FIG. 7 is a front view of the connectable cap of FIG. 1 with three units connected horizontally;

FIG. 8 is a front and side perspective view of the connectable cap of FIG. 1 with three units connected horizontally;

FIG. 9 is a back and side perspective view of the connectable cap of FIG. 1 with three units connected horizontally;

FIG. 10 is a front and side perspective view of the connectable cap of FIG. 1 with three units connected vertically;

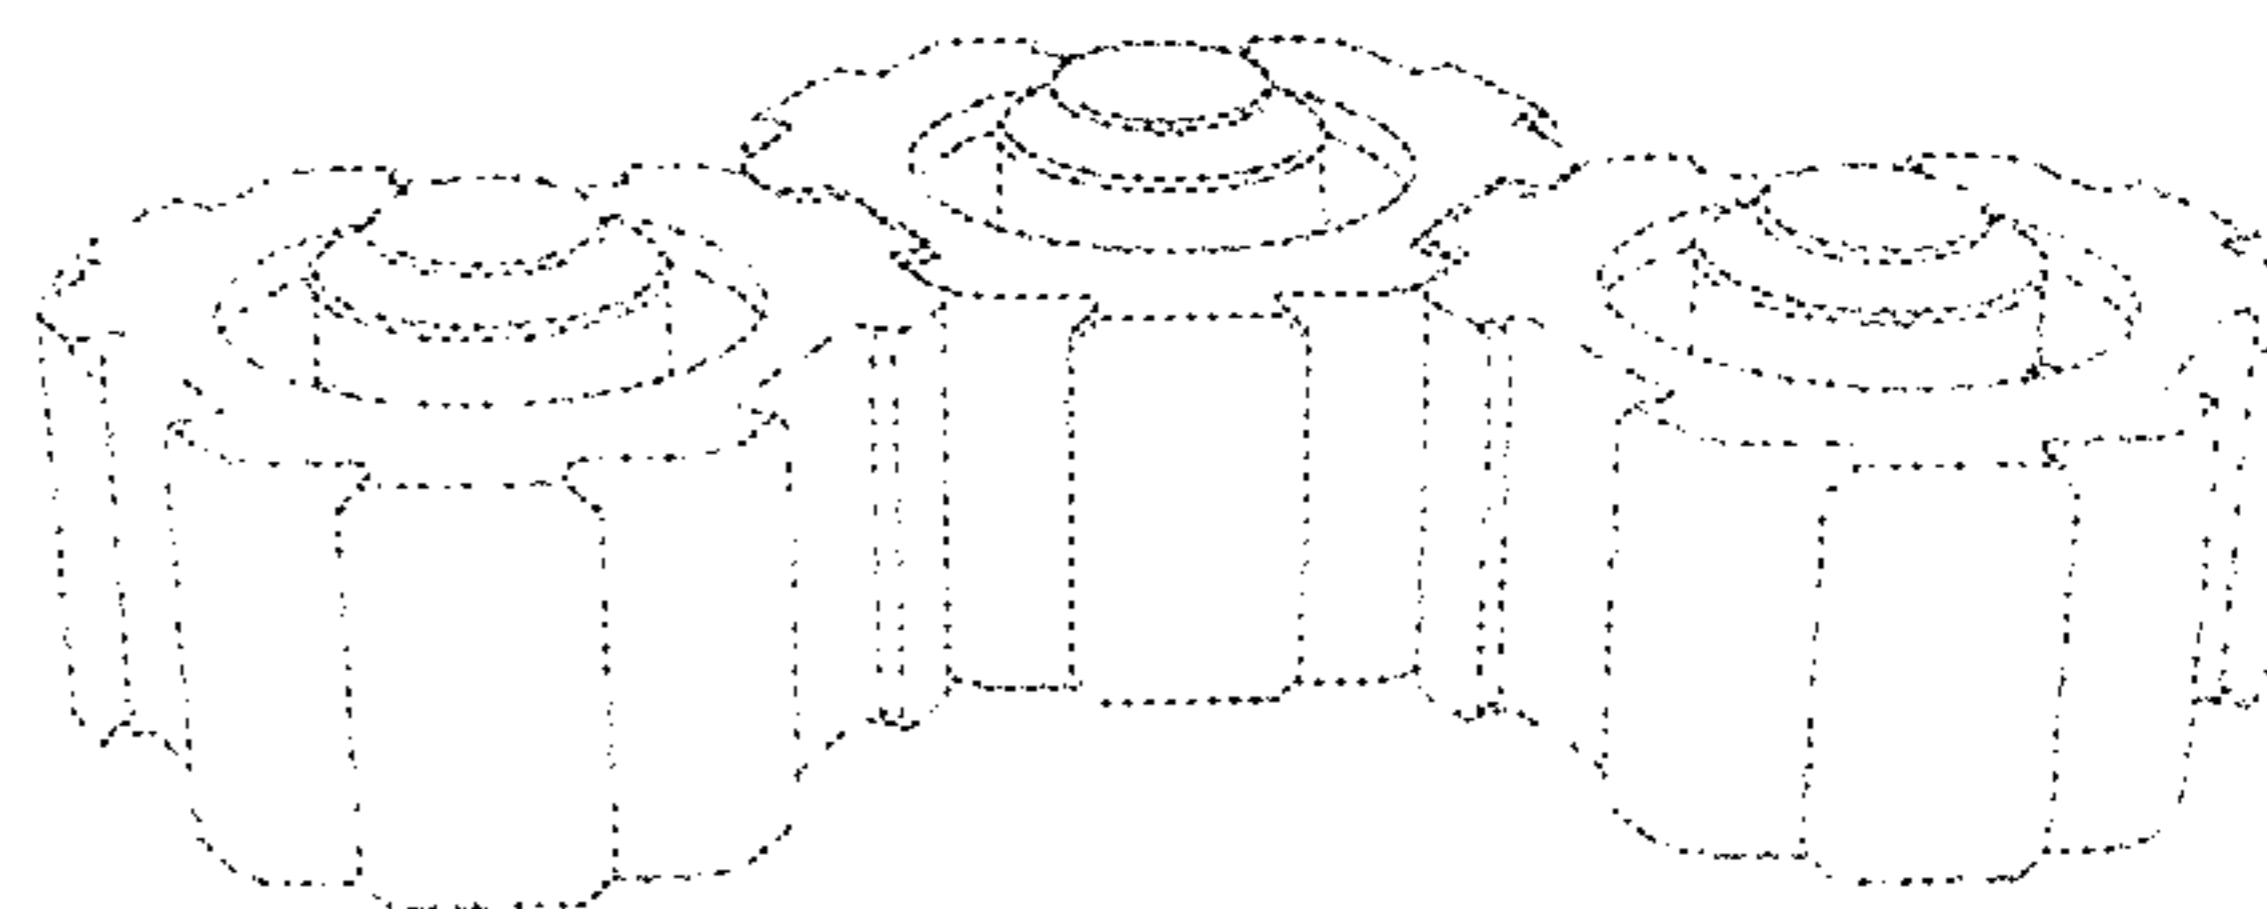

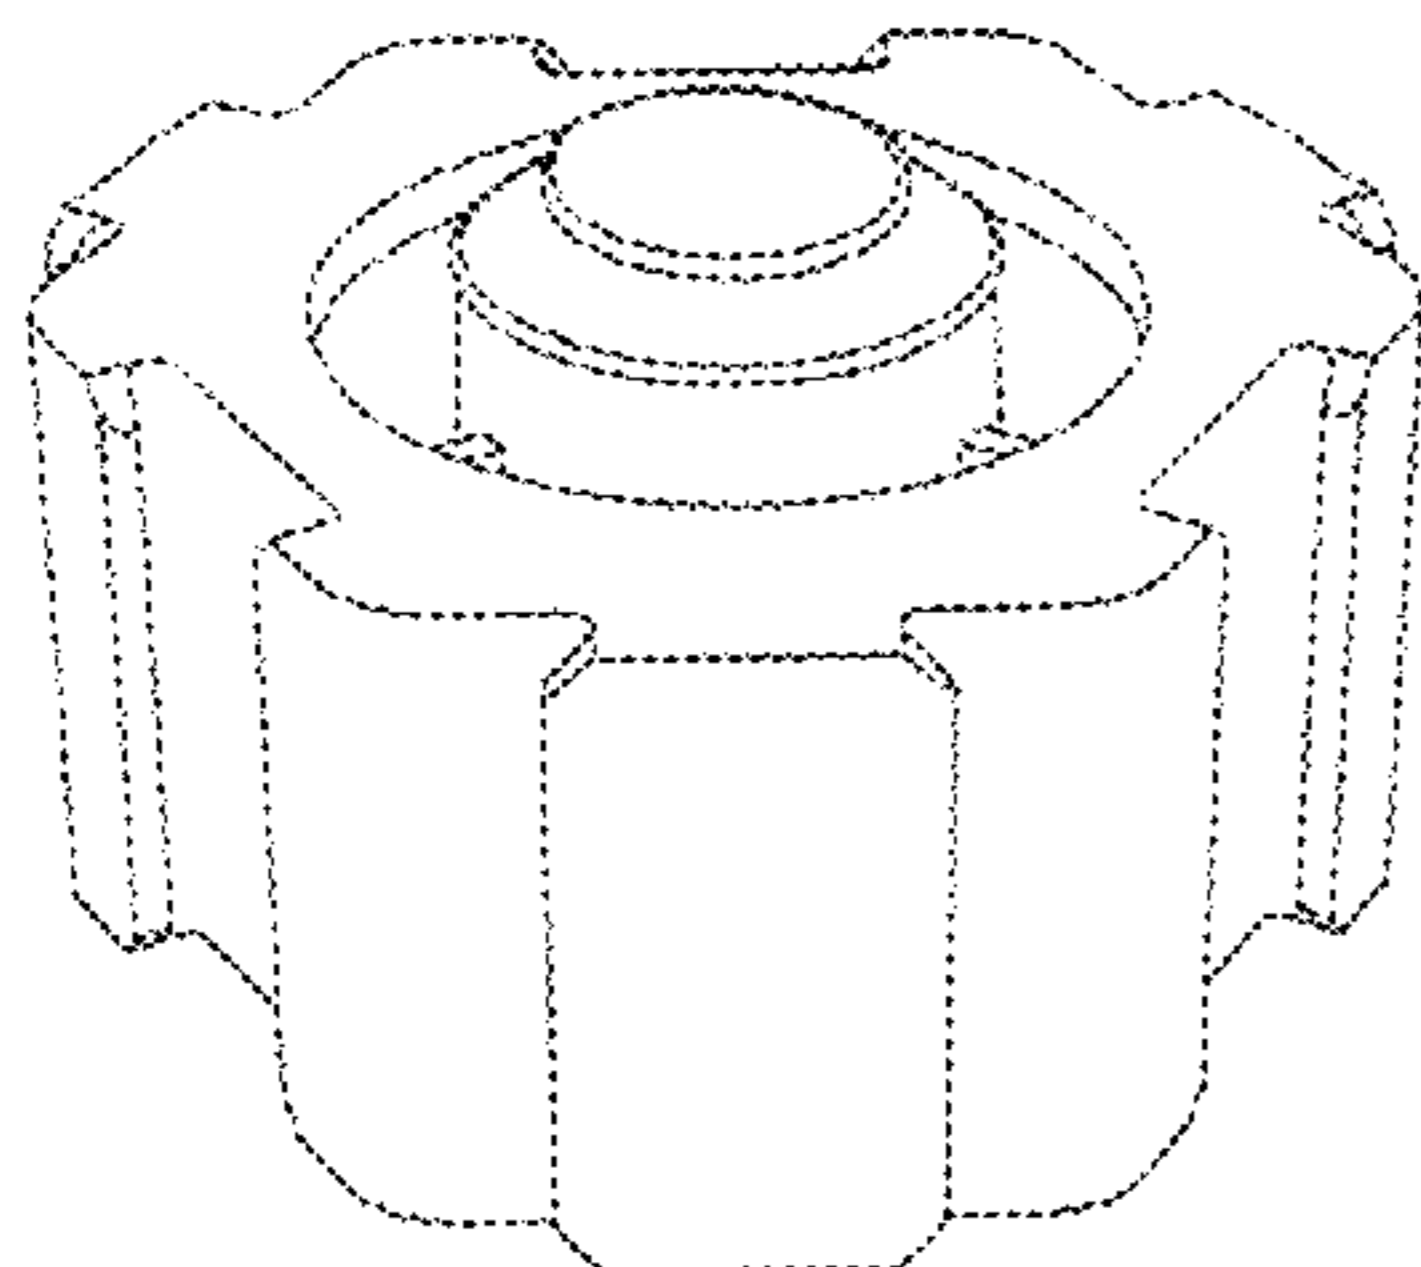

FIG. 11 is a front view of the connectable cap of FIG. 1 horizontally connected to other connectable caps having different configuration at the top of the cap;

FIG. 12 is a front and side perspective view of the connectable cap of FIG. 1 horizontally connected to other connectable caps having different configuration at the top of the cap;

FIG. 13 is a front and side perspective view of the connectable cap of FIG. 1 with two of the connectable cap units vertically connected, and another connectable cap having different configuration at the top of the cap horizontally connected to one of the connectable cap unit;

FIG. 14 is a front and side perspective view of the connectable cap of FIG. 1 with the top of the connectable cap slid into a side of another connectable cap having different configuration at the top of the cap; and,
