The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first image in a sequence for a display screen with transitional graphical user interface according to the new design; FIG. 2 is a front view showing a second image thereof; FIG. 3 is a front view showing a third image thereof; FIG. 4 is a front view showing a fourth image thereof; FIG. 5 is a front view showing a fifth image thereof; and, FIG. 6 is a front view showing a sixth image thereof. The longer outermost broken lines showing an electronic device illustrate environmental subject matter. The broken line rectangle showing a display screen and all other broken lines showing elements of the graphical user interface illustrate portions of the article. The broken lines form no part of the claimed design. The narrow double lines, including a broken line segment at the left end of the lower line, form part of the claimed design.
