

US00D866757S

(12) **United States Design Patent** (10) **Patent No.:** **US D866,757 S**
Diluzio et al. (45) **Date of Patent:** **** Nov. 12, 2019**

(54) **AUTOINJECTOR**

(71) Applicant: **Millennium Pharmaceuticals, Inc.**,
Cambridge, MA (US)

(72) Inventors: **Willow Ruth Diluzio**, Gloucester, MA
(US); **Nobel T. Truong**, Milford, MA
(US); **Sarah Royalty Tredo**, Vernon
Hills, IL (US); **Donald Rogers, Jr.**,
Carmel, IN (US)

(73) Assignee: **Millennium Pharmaceuticals, Inc.**,
Cambridge, MA (US)

(**) Term: **15 Years**

(21) Appl. No.: **29/557,806**

(22) Filed: **Mar. 11, 2016**

(51) **LOC (12) Cl.** **24-02**

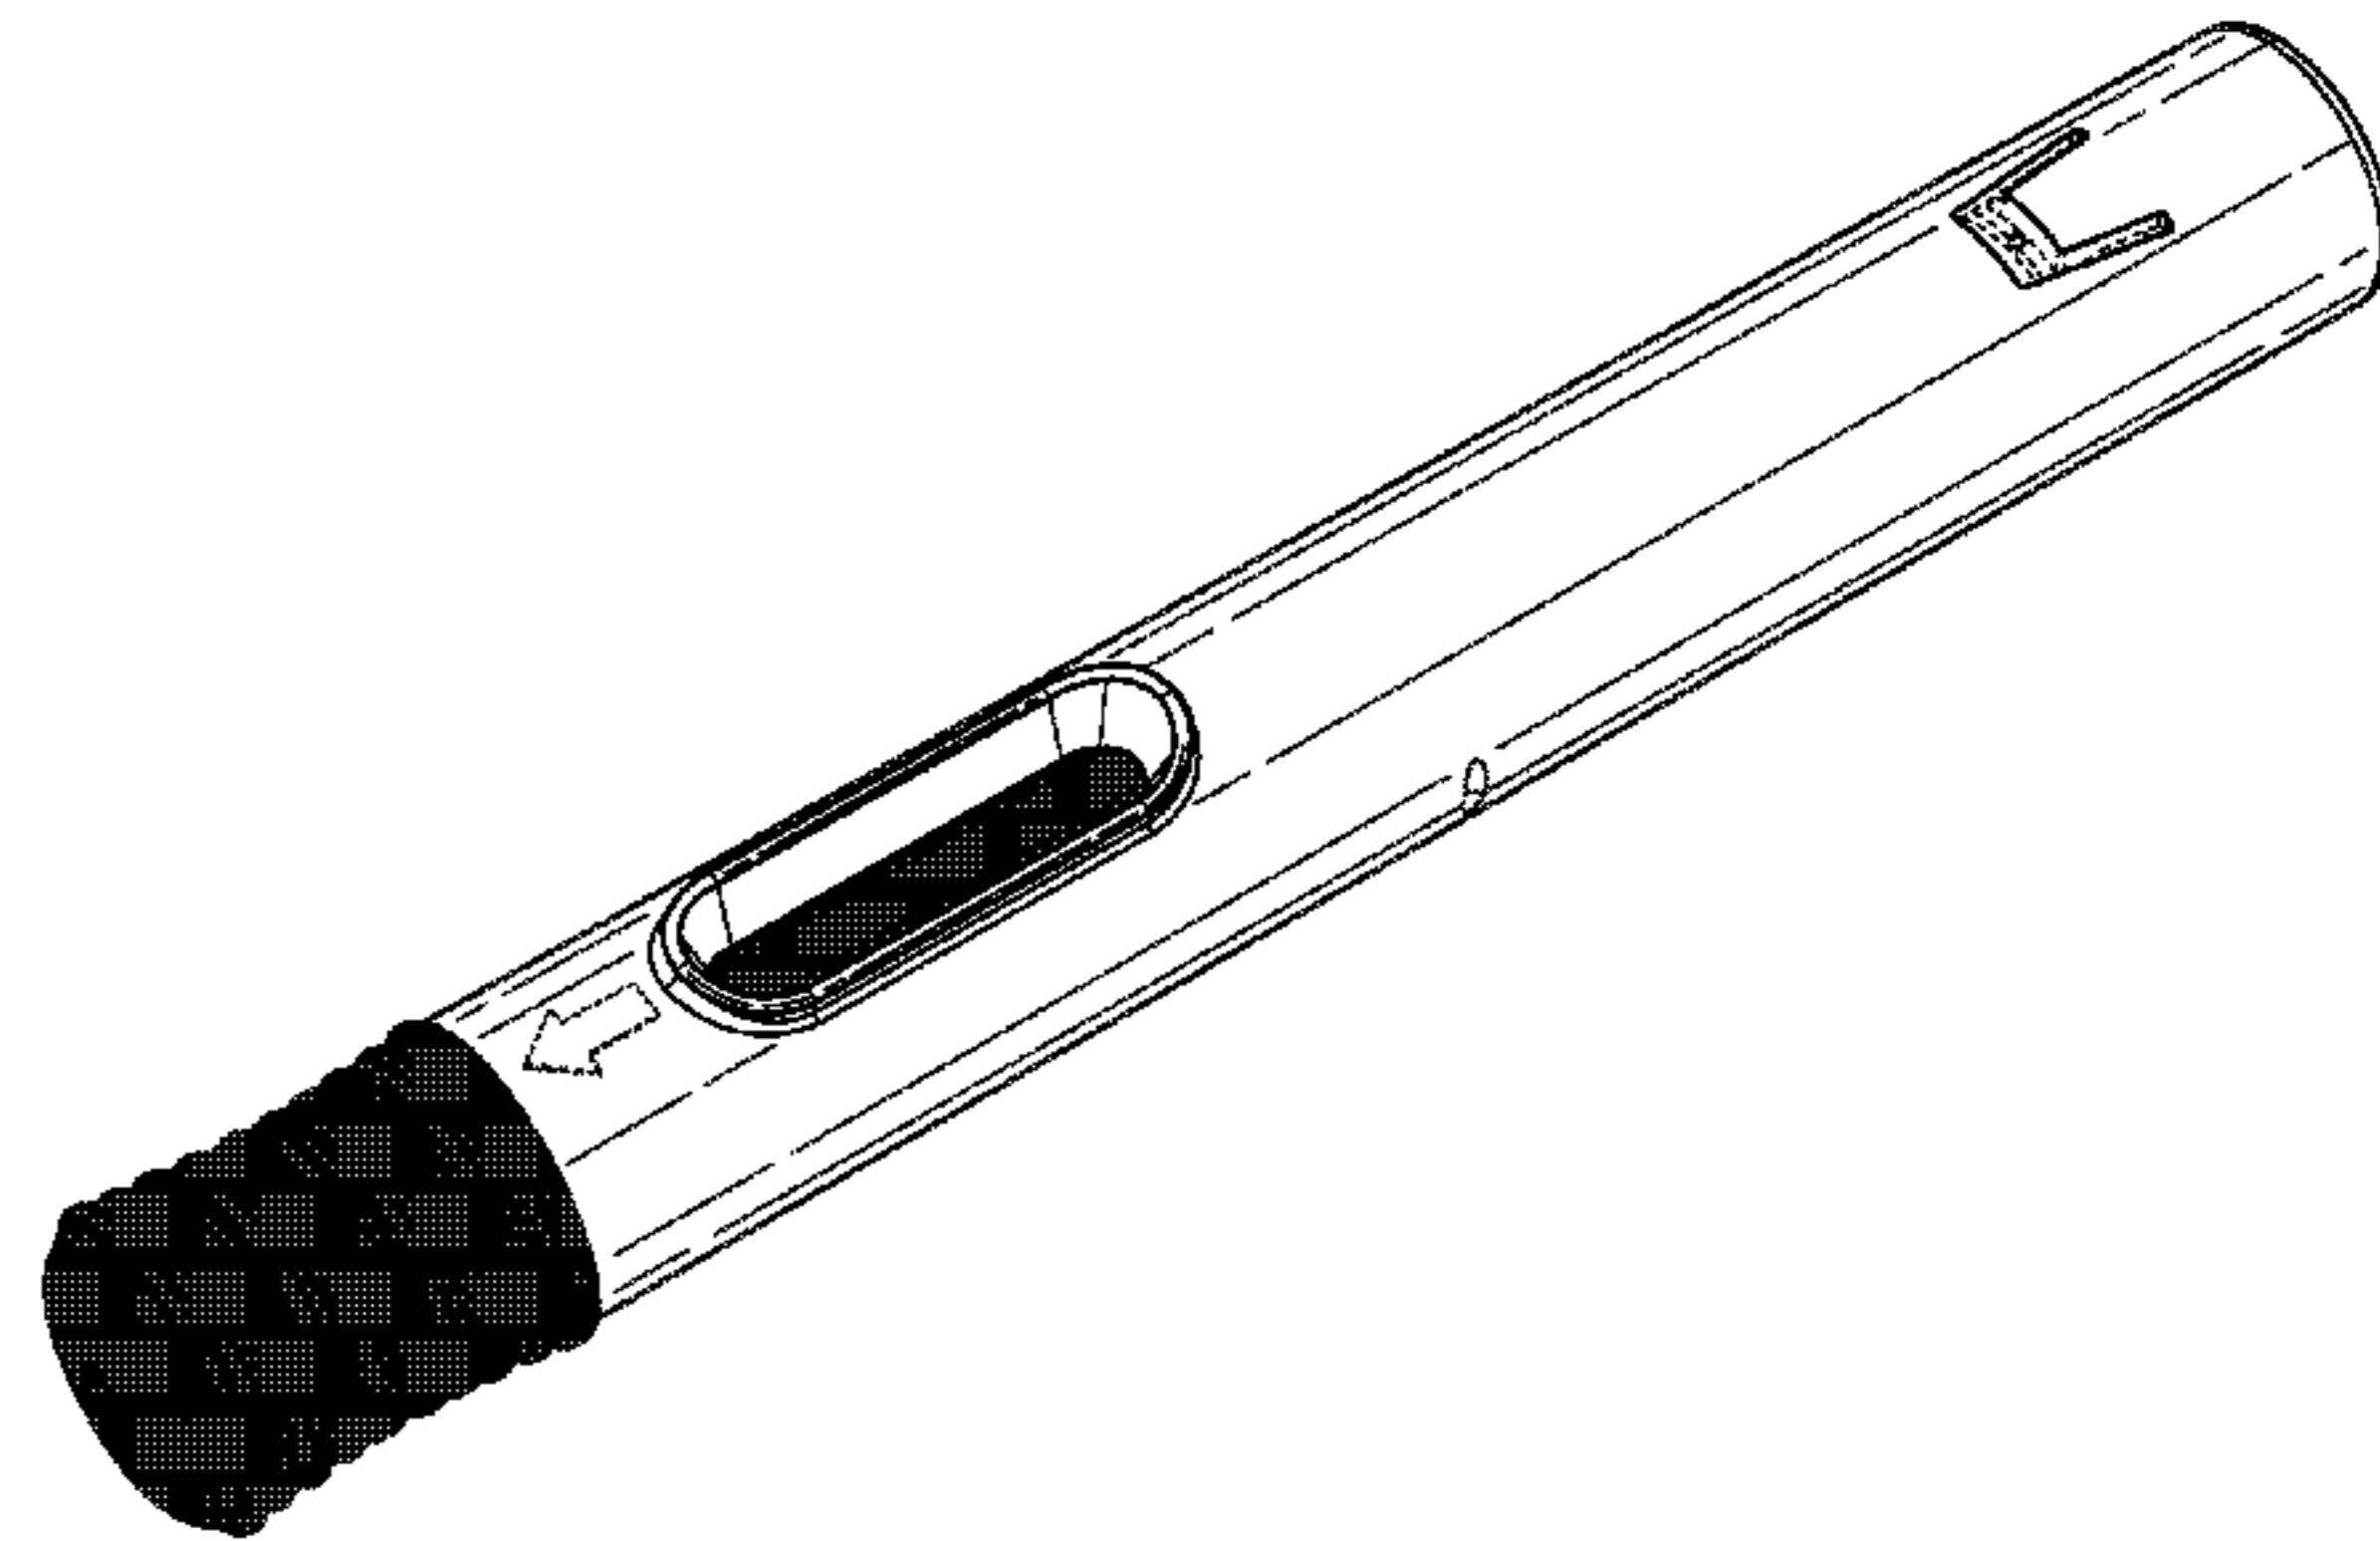

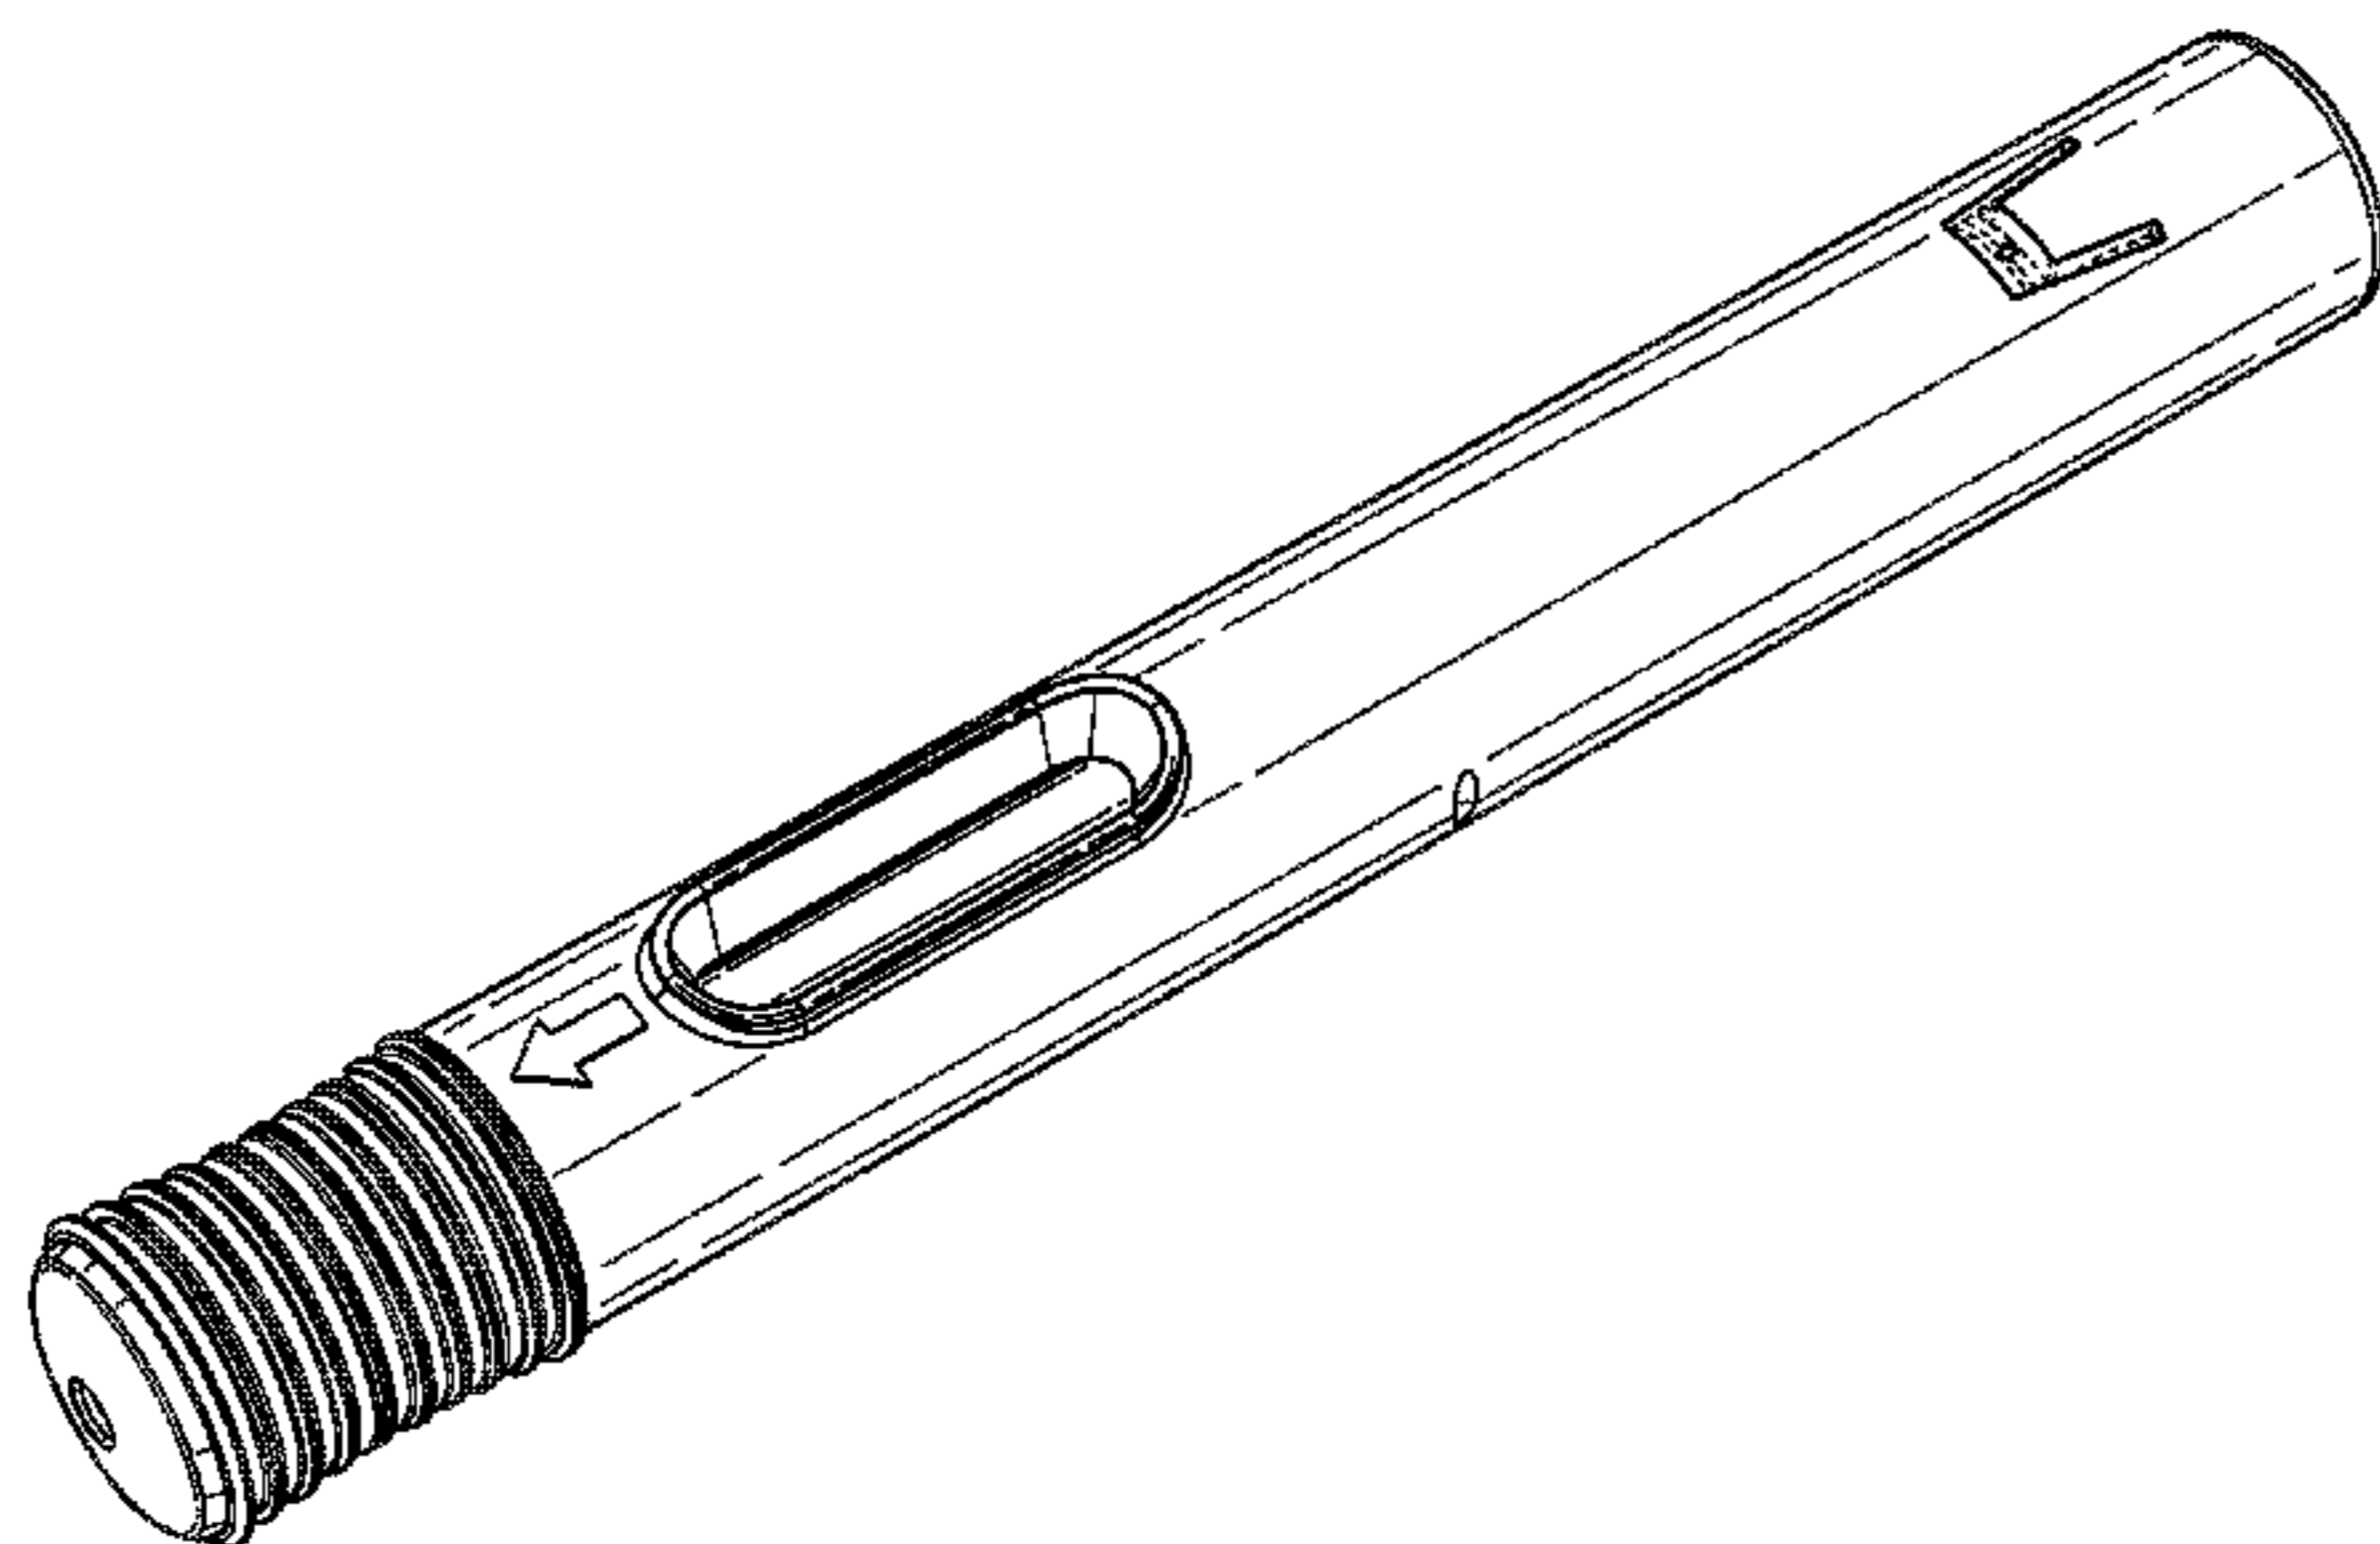

(52) **U.S. Cl.**
USPC **D24/133**

(57) CLAIM

The ornamental design for an autoinjector, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view illustrating a first exemplary embodiment of our ornamental design for an autoinjector with a removable cap.
FIG. 2 is a front elevational view of the first exemplary embodiment of our ornamental design for an autoinjector of FIG. 1, the rear elevational view being a mirror image thereof.
FIG. 3 is a right side elevational view of the first exemplary embodiment of our ornamental design for an autoinjector of FIG. 1, the left side elevational view being a mirror image thereof.
FIG. 4 is a bottom plan view of the first exemplary embodiment of our ornamental design for an autoinjector of FIG. 1.
FIG. 5 is a top plan view of the first exemplary embodiment of our ornamental design for an autoinjector of FIG. 1.
FIG. 6 is a front perspective view illustrating a second exemplary embodiment of our ornamental design for an autoinjector with a removable cap.
FIG. 7 is a front elevational view of the second exemplary embodiment of our ornamental design for an autoinjector of FIG. 6, the rear elevational view being a mirror image thereof.
FIG. 8 is a right side elevational view of the second exemplary embodiment of our ornamental design for an autoinjector of FIG. 6, the left side elevational view being a mirror image thereof.
FIG. 9 is a bottom plan view of the second exemplary embodiment of our ornamental design for an autoinjector of FIG. 6.
FIG. 10 is a top plan view of the second exemplary embodiment of our ornamental design for an autoinjector of FIG. 6.
FIG. 11 is a front perspective view illustrating a third exemplary embodiment of our ornamental design for an autoinjector with a purple removable cap and a purple plunger rod.
FIG. 12 is a front elevational view of the third exemplary embodiment of our ornamental design for an autoinjector of FIG. 11, the rear elevational view being a mirror image thereof.
FIG. 13 is a right side elevational view of the third exemplary embodiment of our ornamental design for an autoinjector of FIG. 11, the left side elevational view being a mirror image thereof.
FIG. 14 is a bottom plan view of the third exemplary embodiment of our ornamental design for an autoinjector of FIG. 11.
FIG. 15 is a top plan view of the third exemplary embodiment of our ornamental design for an autoinjector of FIG. 11.
FIG. 16 is a front perspective view illustrating a fourth exemplary embodiment of our ornamental design for an autoinjector with a purple removable cap and a purple plunger rod.

FIG. 17 is a front elevational view of the fourth exemplary embodiment of our ornamental design for an autoinjector of FIG. 16, the rear elevational view being a mirror image thereof.

FIG. 18 is a right side elevational view of the fourth exemplary embodiment of our ornamental design for an autoinjector of FIG. 16, the left side elevational view being a mirror image thereof.

FIG. 19 is a bottom plan view of the fourth exemplary embodiment of our ornamental design for an autoinjector of FIG. 16.

FIG. 20 is a top plan view of the fourth exemplary embodiment of our ornamental design for an autoinjector of FIG. 16.

FIG. 21 is a front perspective view illustrating a fifth exemplary embodiment of our ornamental design for an autoinjector with a purple removable cap and a yellow plunger rod.

FIG. 22 is a front elevational view of the fifth exemplary embodiment of our ornamental design for an autoinjector of FIG. 21, the rear elevational view being a mirror image thereof.

FIG. 23 is a right side elevational view of the fifth exemplary embodiment of our ornamental design for an autoinjector of FIG. 21, the left side elevational view being a mirror image thereof.

FIG. 24 is a bottom plan view of the fifth exemplary embodiment of our ornamental design for an autoinjector of FIG. 21.

FIG. 25 is a top plan view of the seventh fifth exemplary embodiment of our ornamental design for an autoinjector of FIG. 21.

FIG. 26 is a front perspective view illustrating a sixth exemplary embodiment of our ornamental design for an autoinjector with a purple removable cap and a yellow plunger rod.

FIG. 27 is a front elevational view of the sixth exemplary embodiment of our ornamental design for an autoinjector of FIG. 26, the rear elevational view being a mirror image thereof.

FIG. 28 is a right side elevational view of the sixth exemplary embodiment of our ornamental design for an autoinjector of FIG. 26, the left side elevational view being a mirror image thereof.

FIG. 29 is a bottom plan view of the sixth exemplary embodiment of our ornamental design for an autoinjector of FIG. 26; and,

FIG. 30 is a top plan view of the sixth exemplary embodiment of our ornamental design for an autoinjector of FIG. 26.

The broken lines in the drawings are included for the purpose of illustrating one or more portions of the autoinjector that form no part of the claimed design.
