(57) **CLAIM**

The ornamental design for the reclosable locking lid assembly, as shown and described.

DESCRIPTION

FIG. 1 is a first anterior top perspective view of a reclosable locking lid assembly in a raised position.

FIG. 2 is a top plan view of the reclosable locking lid assembly in the raised position.

FIG. 3 is a posterior side elevational view of the reclosable locking lid assembly in the raised position.

FIG. 4 is an anterior side elevational view of the reclosable locking lid assembly in the raised position.

FIG. 5 is a first lateral side elevational view of the reclosable locking lid assembly in the raised position.

FIG. 6 is a second lateral side elevational view of the reclosable locking lid assembly in the raised position.

FIG. 7 is a bottom plan view of the reclosable locking lid assembly in the raised position.

FIG. 8 is a second anterior top perspective view of the reclosable locking lid assembly of FIG. 1 shown in a position of use attached to an unclaimed cup.

FIG. 9 is an anterior top perspective view of the reclosable locking lid assembly in the raised position and with the upper portion removed therefrom.

FIG. 10 is top plan view of the reclosable locking lid assembly in the raised position and with the upper portion removed therefrom.

FIG. 11 is an anterior top perspective view of the upper portion of the reclosable locking lid assembly removed from the bottom portion.

FIG. 12 is a top plan view of the upper portion of the reclosable locking lid assembly removed from the bottom portion.

FIG. 13 is a first lateral edge view of the upper portion of the reclosable locking lid assembly removed from the bottom portion.

FIG. 14 is a second lateral edge view of the upper portion of the reclosable locking lid assembly removed from the bottom portion.

FIG. 15 is an anterior edge view of the upper portion of the reclosable locking lid assembly removed from the bottom portion.

FIG. 16 is a posterior edge view of the upper portion of the reclosable locking lid assembly removed from the bottom portion.

FIG. 17 is a bottom plan view of the upper portion of the reclosable locking lid assembly removed from the bottom portion.

FIG. 18 is a first anterior top perspective view of the reclosable locking lid assembly in a lowered position.

FIG. 19 is a top plan view of the reclosable locking lid assembly in the lowered position.

(Continued)

FIG. 20 is a posterior side elevational view of the reclosable locking lid assembly in the lowered position.

FIG. 21 is an anterior side elevational view of the reclosable locking lid assembly in the lowered position.

FIG. 22 is a first lateral side elevational view of the reclosable locking lid assembly in the lowered position.

FIG. 23 is a second lateral side elevational view of the reclosable locking lid assembly in the lowered position.

FIG. 24 is a bottom plan view of the reclosable locking lid assembly in the lowered position.

FIG. 25 is a second anterior top perspective view of the reclosable locking lid assembly of FIG. 18 shown in a position of use attached to an unclaimed cup.

FIG. 26 is an anterior top perspective view of the reclosable locking lid assembly in the lowered position and with the upper portion removed therefrom.

FIG. 27 is a top plan of the reclosable locking lid assembly in the lowered position and with the upper portion removed therefrom.

The broken lines in FIGS. 8 and 25 illustrating a cup depict environment and form no part of the claimed design. All other broken lines depict portions of the reclosable locking lid assembly that form no part of the claimed design.

1 Claim, 9 Drawing Sheets
