(57) **CLAIM**

The ornamental design for a display screen with a graphical user interface for medical software, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen with a graphical user interface for medical software, showing a first embodiment of the new design;

FIG. 2 is a second embodiment thereof;

FIG. 3 is a third embodiment thereof; and,

FIG. 4 is a fourth embodiment thereof.

The broken line immediately adjacent to the outer edge perimeter of the graphical user interface shows a display screen, and forms no part of the claimed design. All other broken lines showing portions of the graphical user interface depict portions of the article and form no part of the claimed design.

1 Claim, 4 Drawing Sheets

FIG. 1

The diagram shows a table structure enclosed in a dashed border. The table has a header row at the top, which is divided into several columns of varying widths. Below the header row, there are three rows of data. Each data row is divided into four columns. The first three columns are wider than the fourth column. The entire table is rendered with dashed lines.

FIG. 2

  		 	 	 	 	 	 			 	 

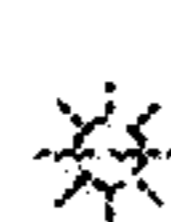

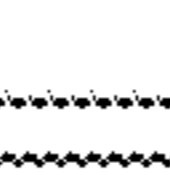

FIG. 3

FIG. 4
