CLAIM

The ornamental design for a display screen with graphical user interface or portion thereof, as shown and described.

DESCRIPTION

This present application is related to U.S. Design patent application Ser. No. 29/488,683, and to U.S. Design patent application Ser. No. 29/488,695, the entire disclosures of which are incorporated herein by reference.

The FIGURE is a front view of a display screen with graphical user interface or a portion thereof, according to our design.

The broken line showing of the graphical user interface is included for the purpose of illustrating portions of the article and forms no part of the claimed design. The perimeters of the portion of the underlying display screen and the graphical user interface are understood to be flush.
