

US00D868252S

(12) **United States Design Patent**  
**Wong et al.**

(10) **Patent No.:** **US D868,252 S**

(45) **Date of Patent:** **\*\* Nov. 26, 2019**

(54) **TWO-POINT DISCRIMINATOR**

(71) Applicant: **3D4MD Inc.**, Toronto (CA)

(72) Inventors: **Julielynn Yee-Ching Wong**, Toronto (CA); **Jody Mou**, North York (CA)

(73) Assignee: **3D4MD Inc.**, Toronto, Ontario (CA)

(\*\*) Term: **15 Years**

(21) Appl. No.: **29/614,444**

(22) Filed: **Aug. 18, 2017**

**Related U.S. Application Data**

(63) Continuation-in-part of application No. 29/559,426, filed on Mar. 28, 2016, now Pat. No. Des. 840,537.

(57) **CLAIM**

The ornamental design for a two-point discriminator, as shown and described.

**DESCRIPTION**

FIG. 1 shows a top perspective view of an embodiment of a two-point discriminator in accordance with the present invention;

FIG. 2 shows a top view of the embodiment;

FIG. 3 shows a bottom view of the embodiment;

FIG. 4 shows a right side view of the embodiment;

FIG. 5 shows a left side view of the embodiment;

FIG. 6 shows a front view of the embodiment; and,

FIG. 7 shows a rear view of the embodiment.

The broken line perimeters seen on the surface of the two-point discriminator are boundaries of the claimed design. These broken lines and the areas within them also form no part of the claimed design.

The broken lines shown on the tips in the embodiment shown in FIGS. 1-7 show unclaimed surface texture, such as, for example, raised or recessed ridges.

The areas within the broken line perimeters may contain, for example, embossed or engraved numbers and letters. Specifically, the areas within the broken line perimeters may include numbers that indicate a discriminator interval for each tip (e.g., 1, 2, 3, 4, 5, 6, 9, and 12, respectively, in a counter-clockwise orientation). Additionally, or alternatively, the areas within the broken line perimeters may contain a central bore.

**1 Claim, 4 Drawing Sheets**
