DESCRIPTION

FIG. 1 is a perspective view of a first embodiment of a hydraulic hose identification device showing my new design;

FIG. 2 is a front elevational view of FIG. 1;

FIG. 3 is a rear elevational view of FIG. 1;

FIG. 4 is a right side elevational view of FIG. 1;

FIG. 5 is a left side elevational view of FIG. 1;

FIG. 6 is a top plan view of FIG. 1;

FIG. 7 is a bottom plan view of FIG. 1;

FIG. 8 is a front perspective view of FIG. 1 in an expanded condition as being used with a hydraulic hose; and,

FIG. 9 is a perspective view of the second embodiment of a hydraulic hose identification device, all other views being the same as those of the first embodiment, except for the angled ends.

The broken lines illustrate environmental structure that forms no part of the claimed design. Furthermore, the hydraulic hose identification device is shown with a symbolic break in its length, as illustrated with dash-dot broken lines. The appearance of any portion of the article between the dash-dot broken lines forms no part of the claimed design.
