(57) **CLAIM**

The ornamental design for a tire for vehicle wheels, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a tire for vehicle wheels, showing our new design;
FIG. 2 is a left side elevation view thereof;
FIG. 3 is a front elevation view thereof, with the rear view being identical thereof, it being understood that the tread pattern is repeated throughout the circumference of the tire;
FIG. 4 is an enlarged fragmentary front elevation view of FIG. 3, showing a portion thereof; and,
FIG. 5 is a right side elevation view thereof.

The broken lines of even length illustrate portions of the tire that form no part of the claimed design. The portions depicted in broken “dash-dot” lines of uneven length define the unclaimed boundary of the claimed design. The “dot-dot” line in FIG. 4 is included solely to frame the view and forms no part of the claimed design.
