(57) **CLAIM**

The ornamental design for a display screen or portion thereof with graphical user interface, as shown and described.

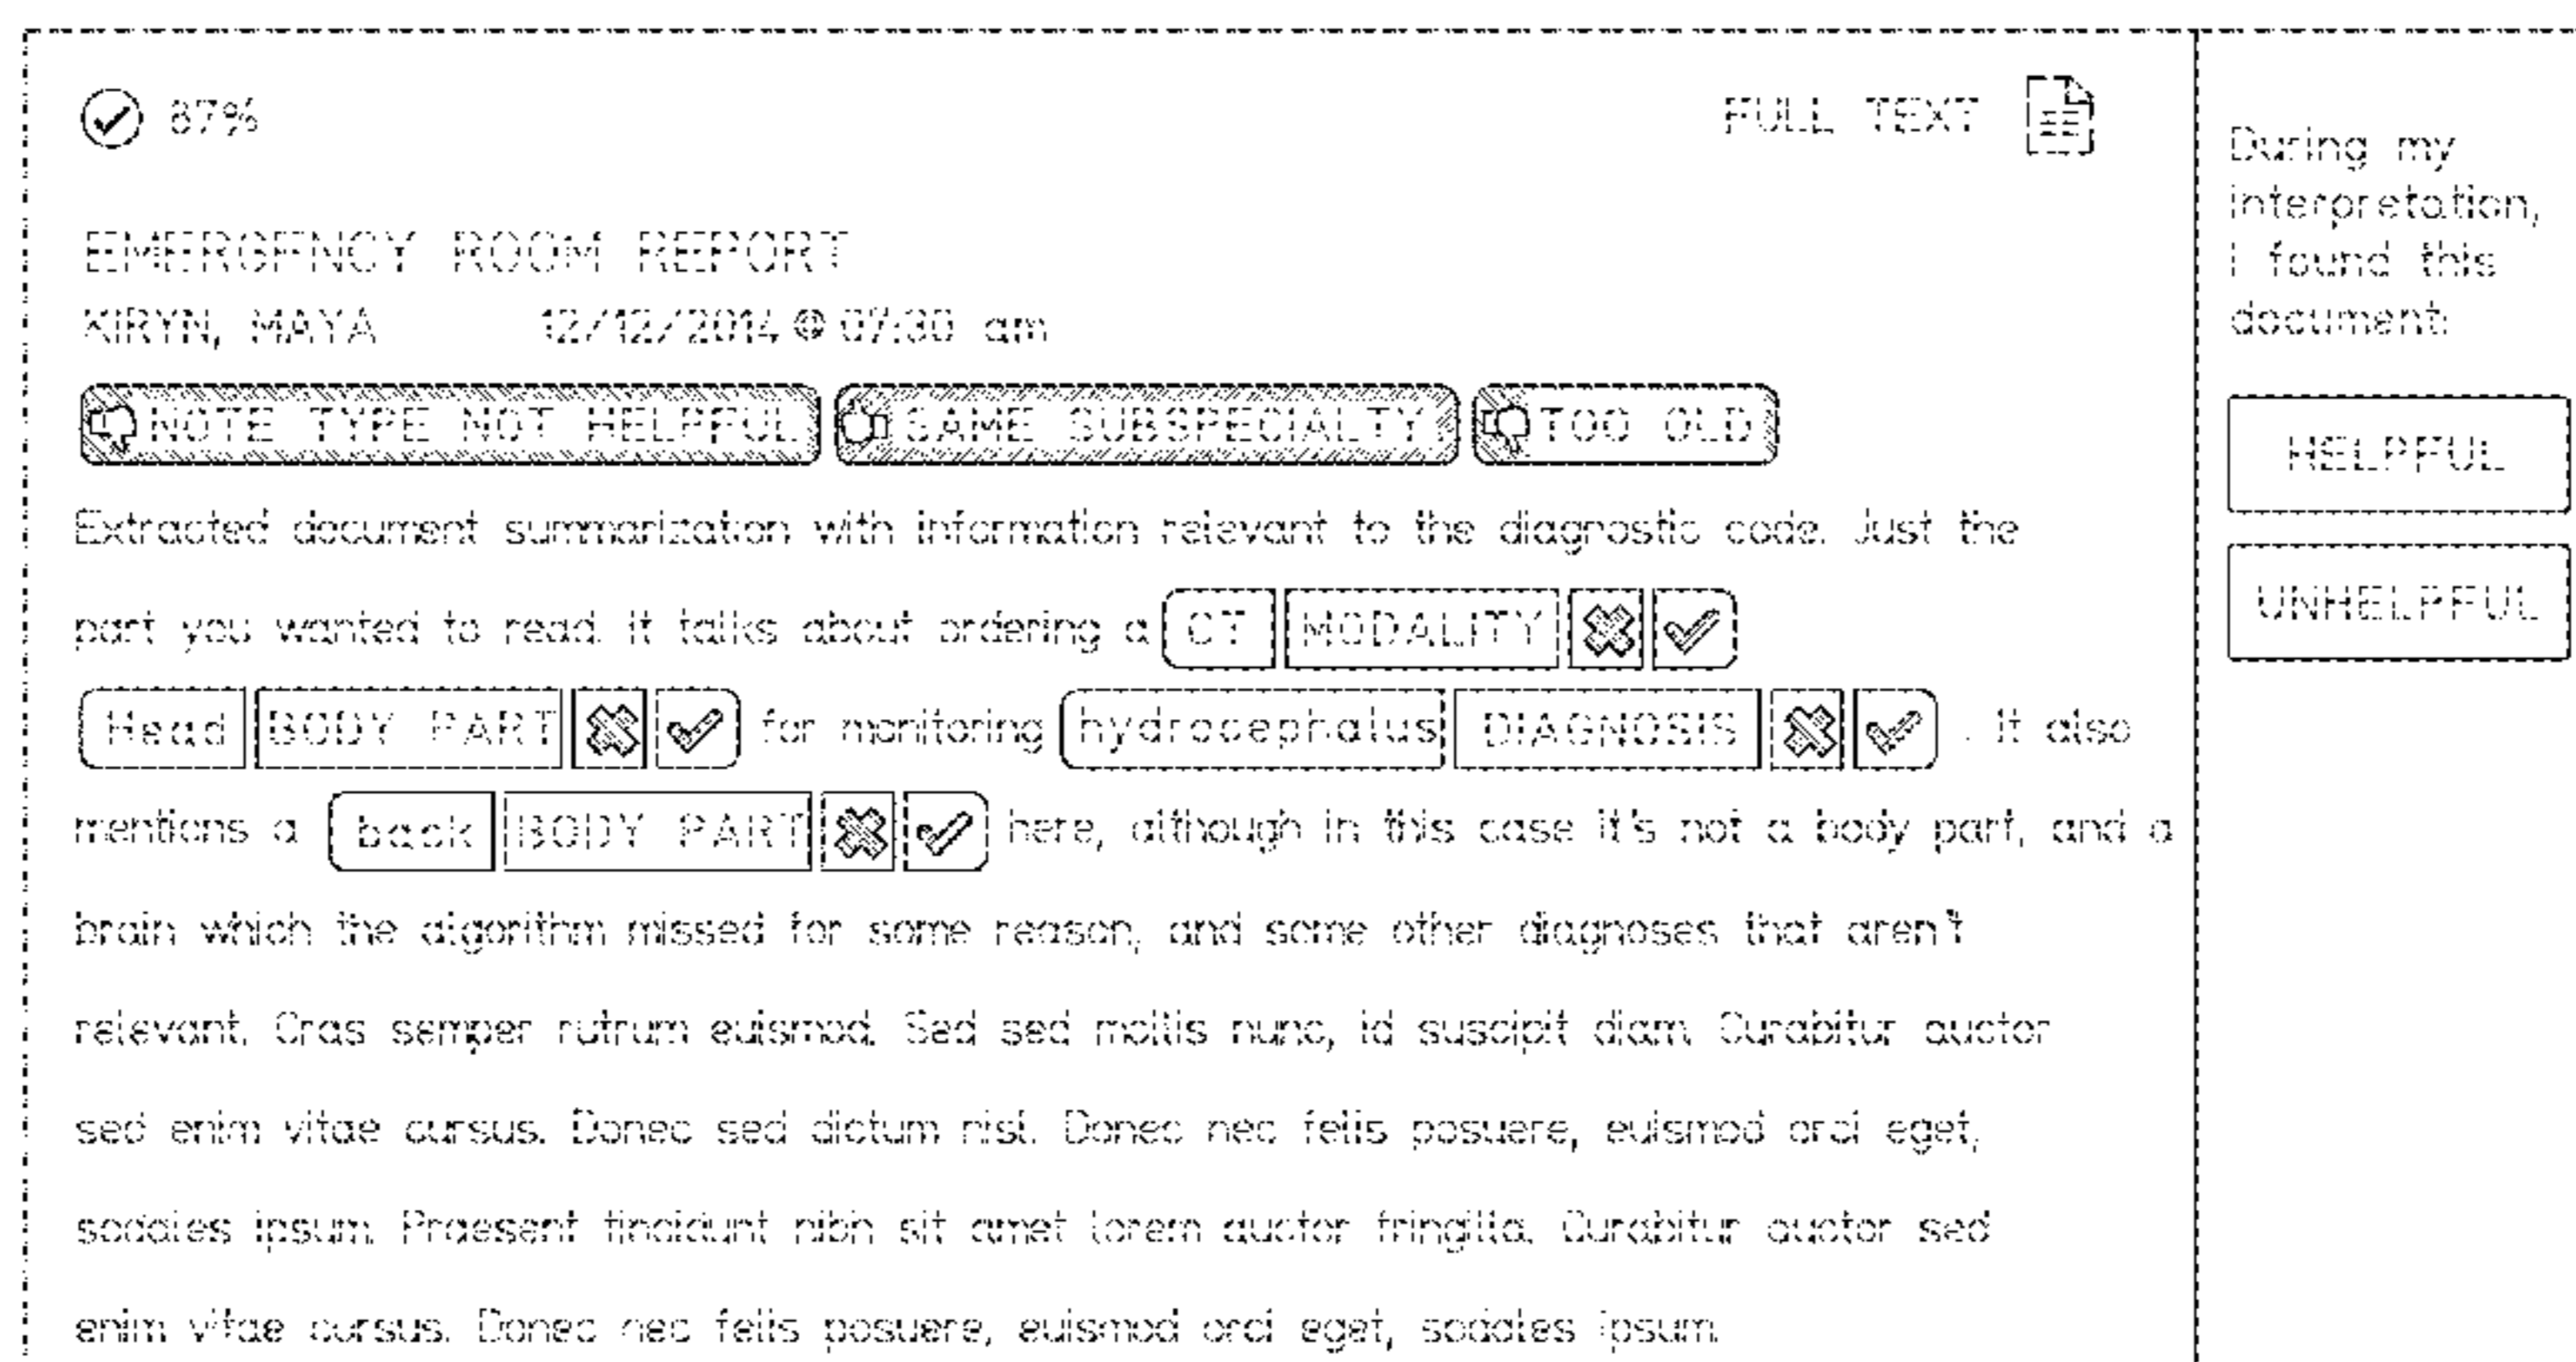

DESCRIPTION

A portion of the disclosure of this patent document contains material for which a claim for copyright is made. The copyright owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the US Patent and Trademark Office patent file or records, but reserves all other copyrights whatsoever.

The FIGURE is a front view of a display screen or portion thereof with graphical user interface.

The outermost broken line showing of a display screen or portion thereof forms no part of the claimed design. All other broken lines illustrate portions of the graphical user interface that form no part of the claimed design.

EMERGENCY ROOM REPORT

KIRYN, MAYA 12/12/2014 @ 07:30 am

NOTE TYPE NOT HELPFUL **SAME SUBSPECIALTY** **TOO OLD**

Extracted document summarization with information relevant to the diagnostic code. Just the part you wanted to read. It talks about ordering a **CT MODALITY** for monitoring **hydrocephalus**. It also mentions a **back BODY PART** here, although in this case it's not a body part, and a brain which the algorithm missed for some reason, and some other diagnoses that aren't relevant. Cras semper rutrum euismod. Sed sed mollis nunc, id suscipit diam. Curabitur auctor sed enim vitae cursus. Donec sed dictum nisl. Donec nec felis posuere, euismod orci eget, sodales ipsum. Praesent tincidunt nibh sit amet lorem auctor fringilla. Curabitur auctor sed enim vitae cursus. Donec nec felis posuere, euismod orci eget, sodales ipsum.
