(57) **CLAIM**

The ornamental design for a speaker, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a speaker, which is capable of playing sound, in accordance with our new and ornamental design;

FIG. 2 is a front view thereof;

FIG. 3 is a rear view thereof;

FIG. 4 is a left side view thereof;

FIG. 5 is a right side view thereof;

FIG. 6 is a top plan view thereof; and,

FIG. 7 is a bottom plan view thereof.

With reference to FIG. 6, the concentric lines shown near the outer diameter correspond to the ribs shown in FIG. 5. There are a total of 14 ribs in the preferred embodiment. However, in FIG. 6, the number of lines representing these ribs has been reduced, in order to illustrate the design, whereby the lines are closer together as they approach the outer periphery, but without so many lines as to appear as a thick solid line.

The broken lines depict environmental aspects of a speaker which form no part of the claimed design.

1 Claim, 7 Drawing Sheets
