(57) **CLAIM**

We claim the ornamental design for a vessel for a candle, as shown and described.

**DESCRIPTION**

This application is related to three other U.S. design patent applications, each of them filed on the same date herewith, and all of them also titled “Concrete Vessel for a Candle.” These three applications have been assigned U.S. application Ser. Nos. 29/587,097, 29/587,107, and 29/587,111, respectively, and all of them are incorporated by reference herein in their entireties.

FIG. 1 is a perspective view of a vessel for a candle, showing our new design;

FIG. 2 is a side elevational view of the vessel, with all sides being identical;

FIG. 3 is a top plan view thereof; and,

FIG. 4 is a bottom plan view thereof.

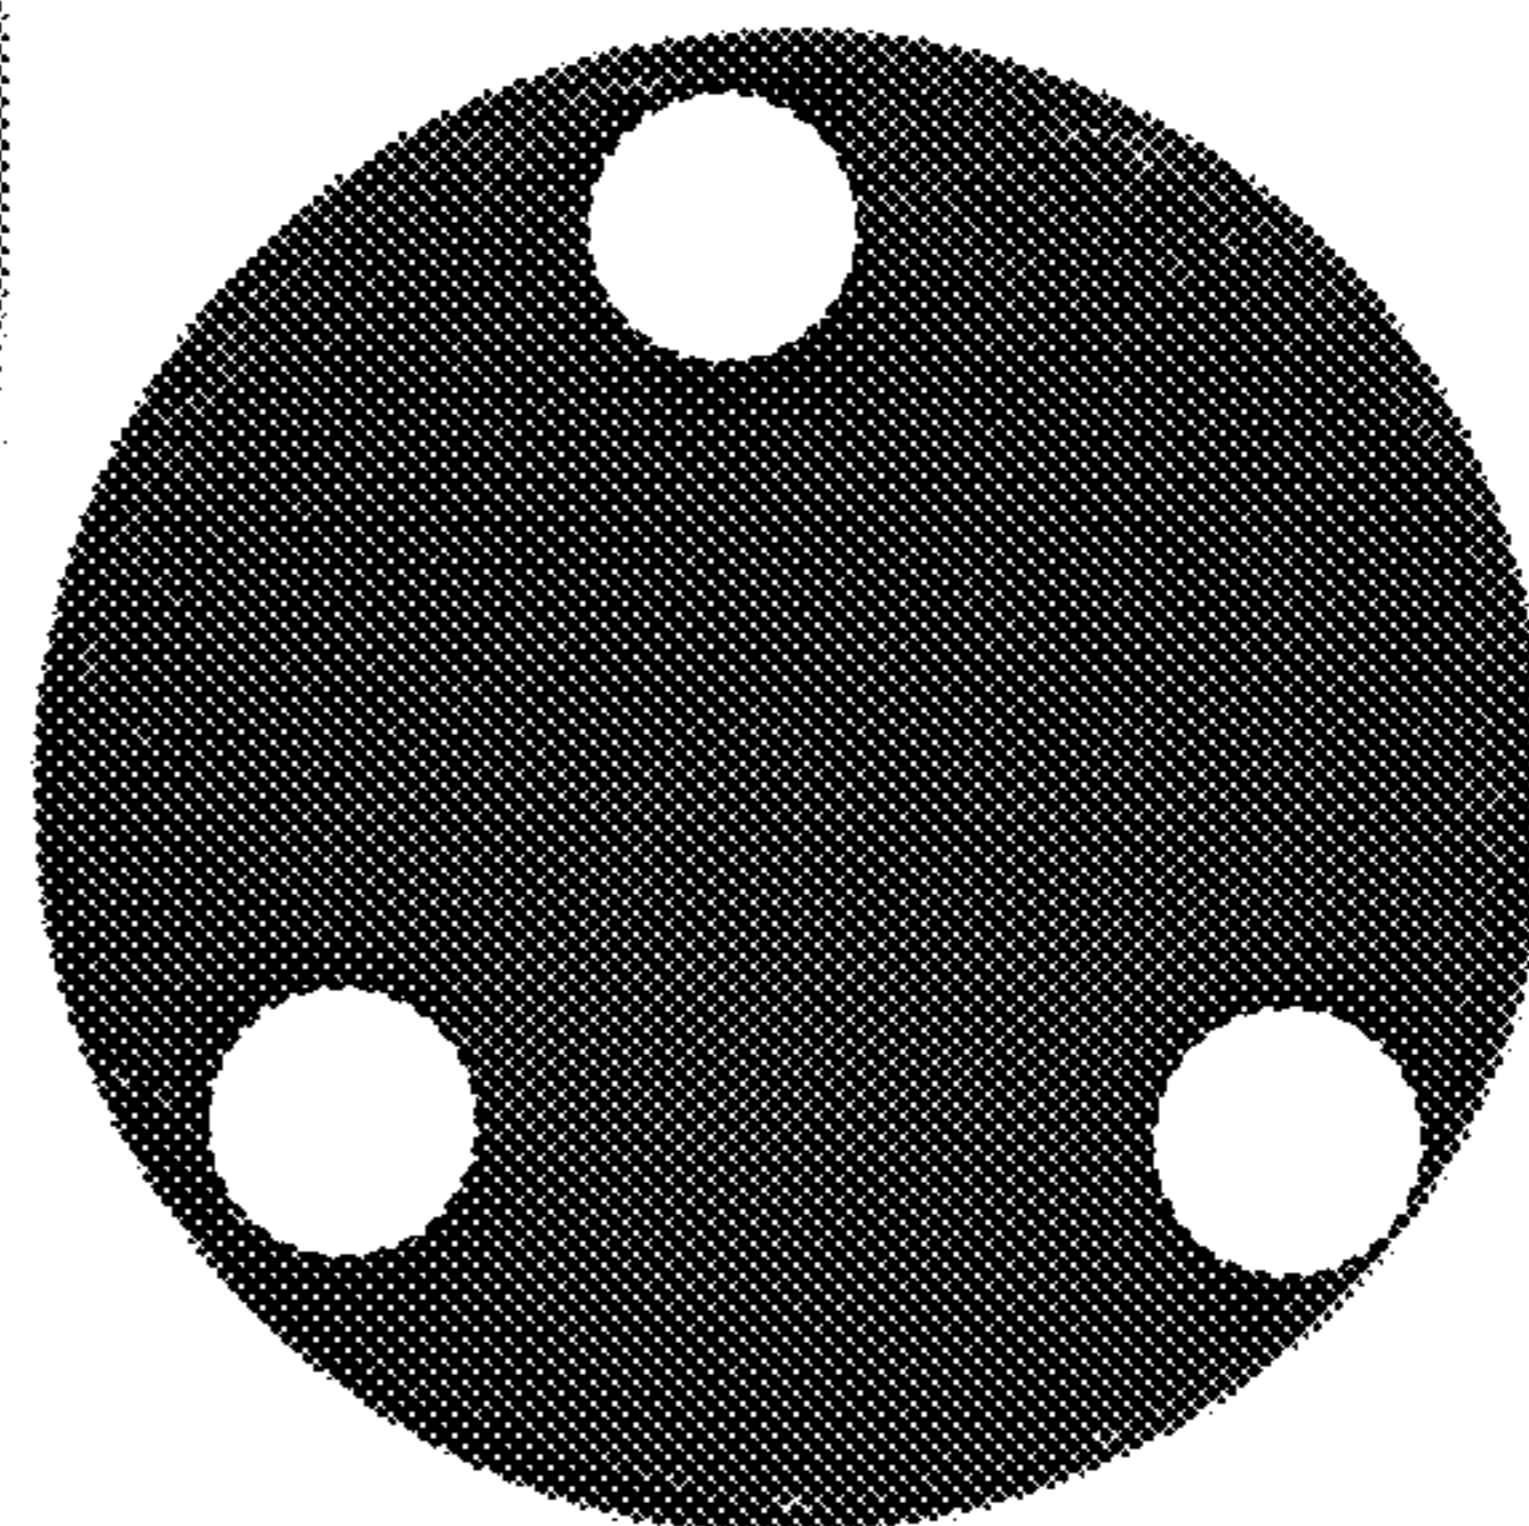

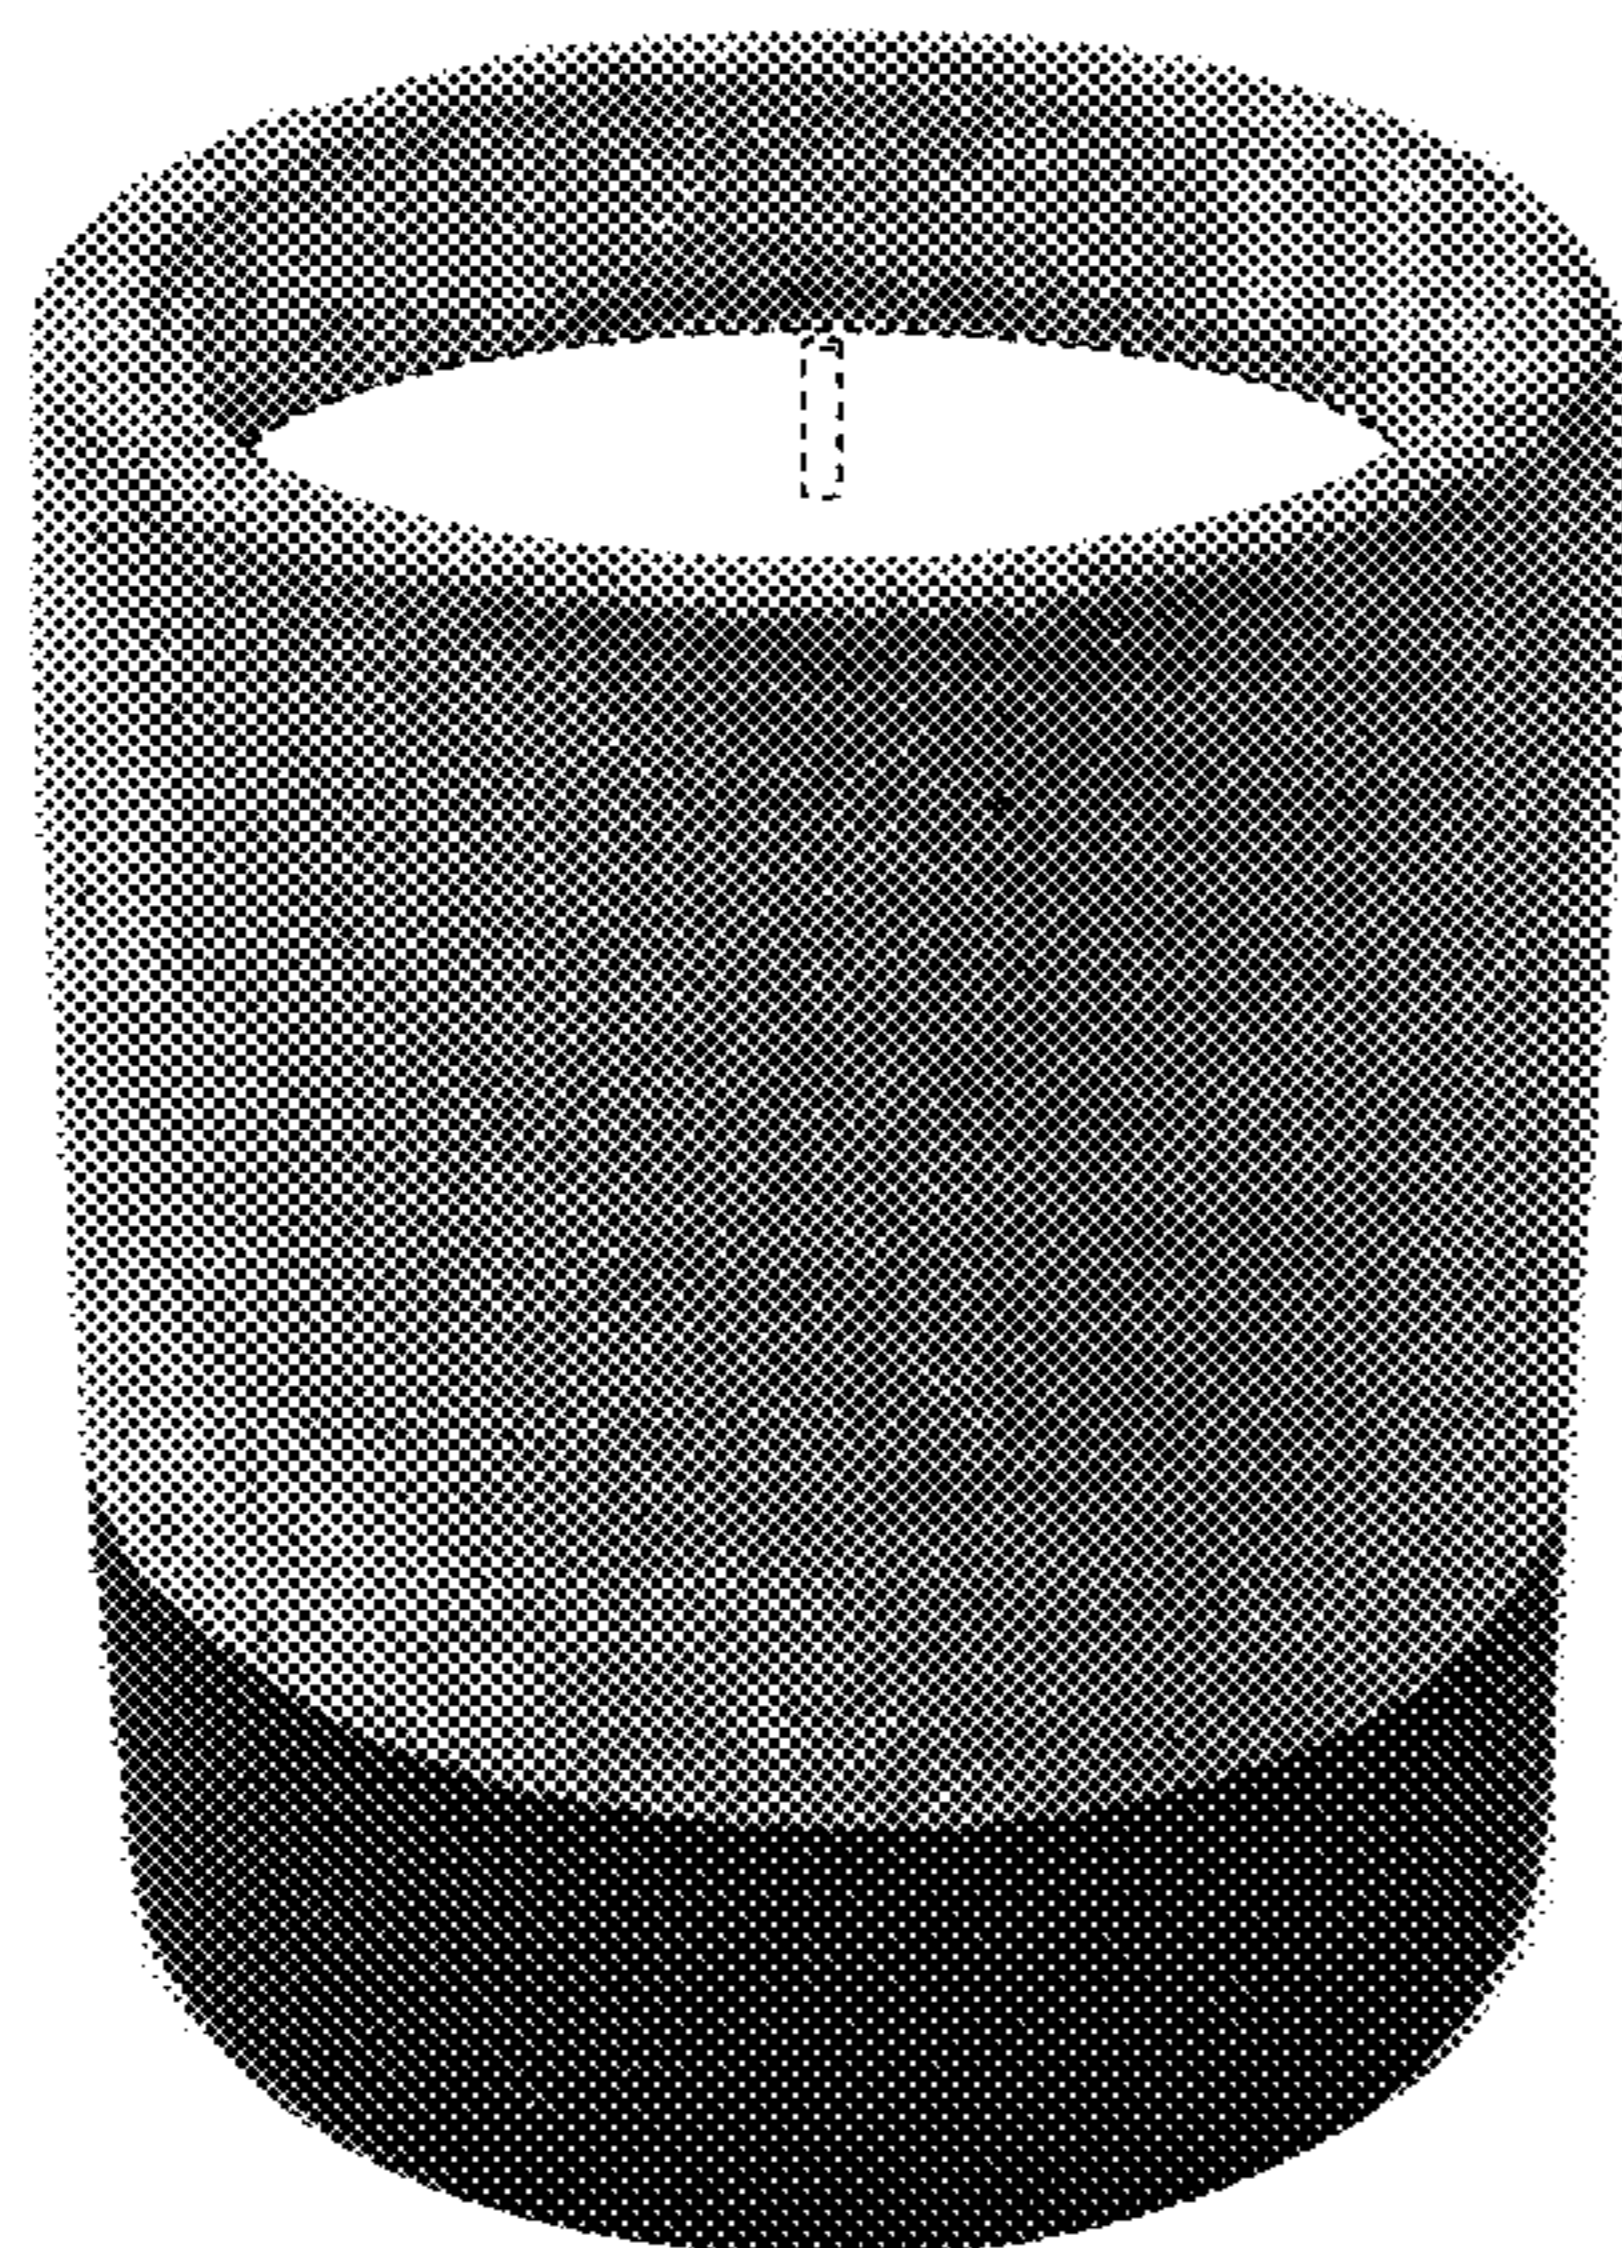

The short-dashed broken lines in the central cavity of the vessel indicate environmental structure—the candle wax and wicks—that forms no part of the claimed design.
