FIG. 1 is a front view of a first image in a sequence for a display screen with animated graphical user interface; FIG. 2 is a front view of a second image thereof; FIG. 3 is a front view of a third image thereof; and, FIG. 4 is a front view of a fourth image thereof.

See application file for complete search history.

The appearance of the animated graphical user interface sequentially transitions between the images shown in FIGS. 1-4. The process or period in which an image transitions to another forms no part of the claimed design. The broken lines corresponding to a mobile device and display screen forms no part of the claimed design. The broken lines corresponding to circles relating to interaction with the graphical user interface form no part of the claimed design. The remaining broken lines, including the closely spaced broken lines showing text, faces, and icons, show portions of the graphical user interface that form no part of the claimed design.
