(57) **CLAIM**

The ornamental design for a tube for cosmetic products, as shown and described.

DESCRIPTION

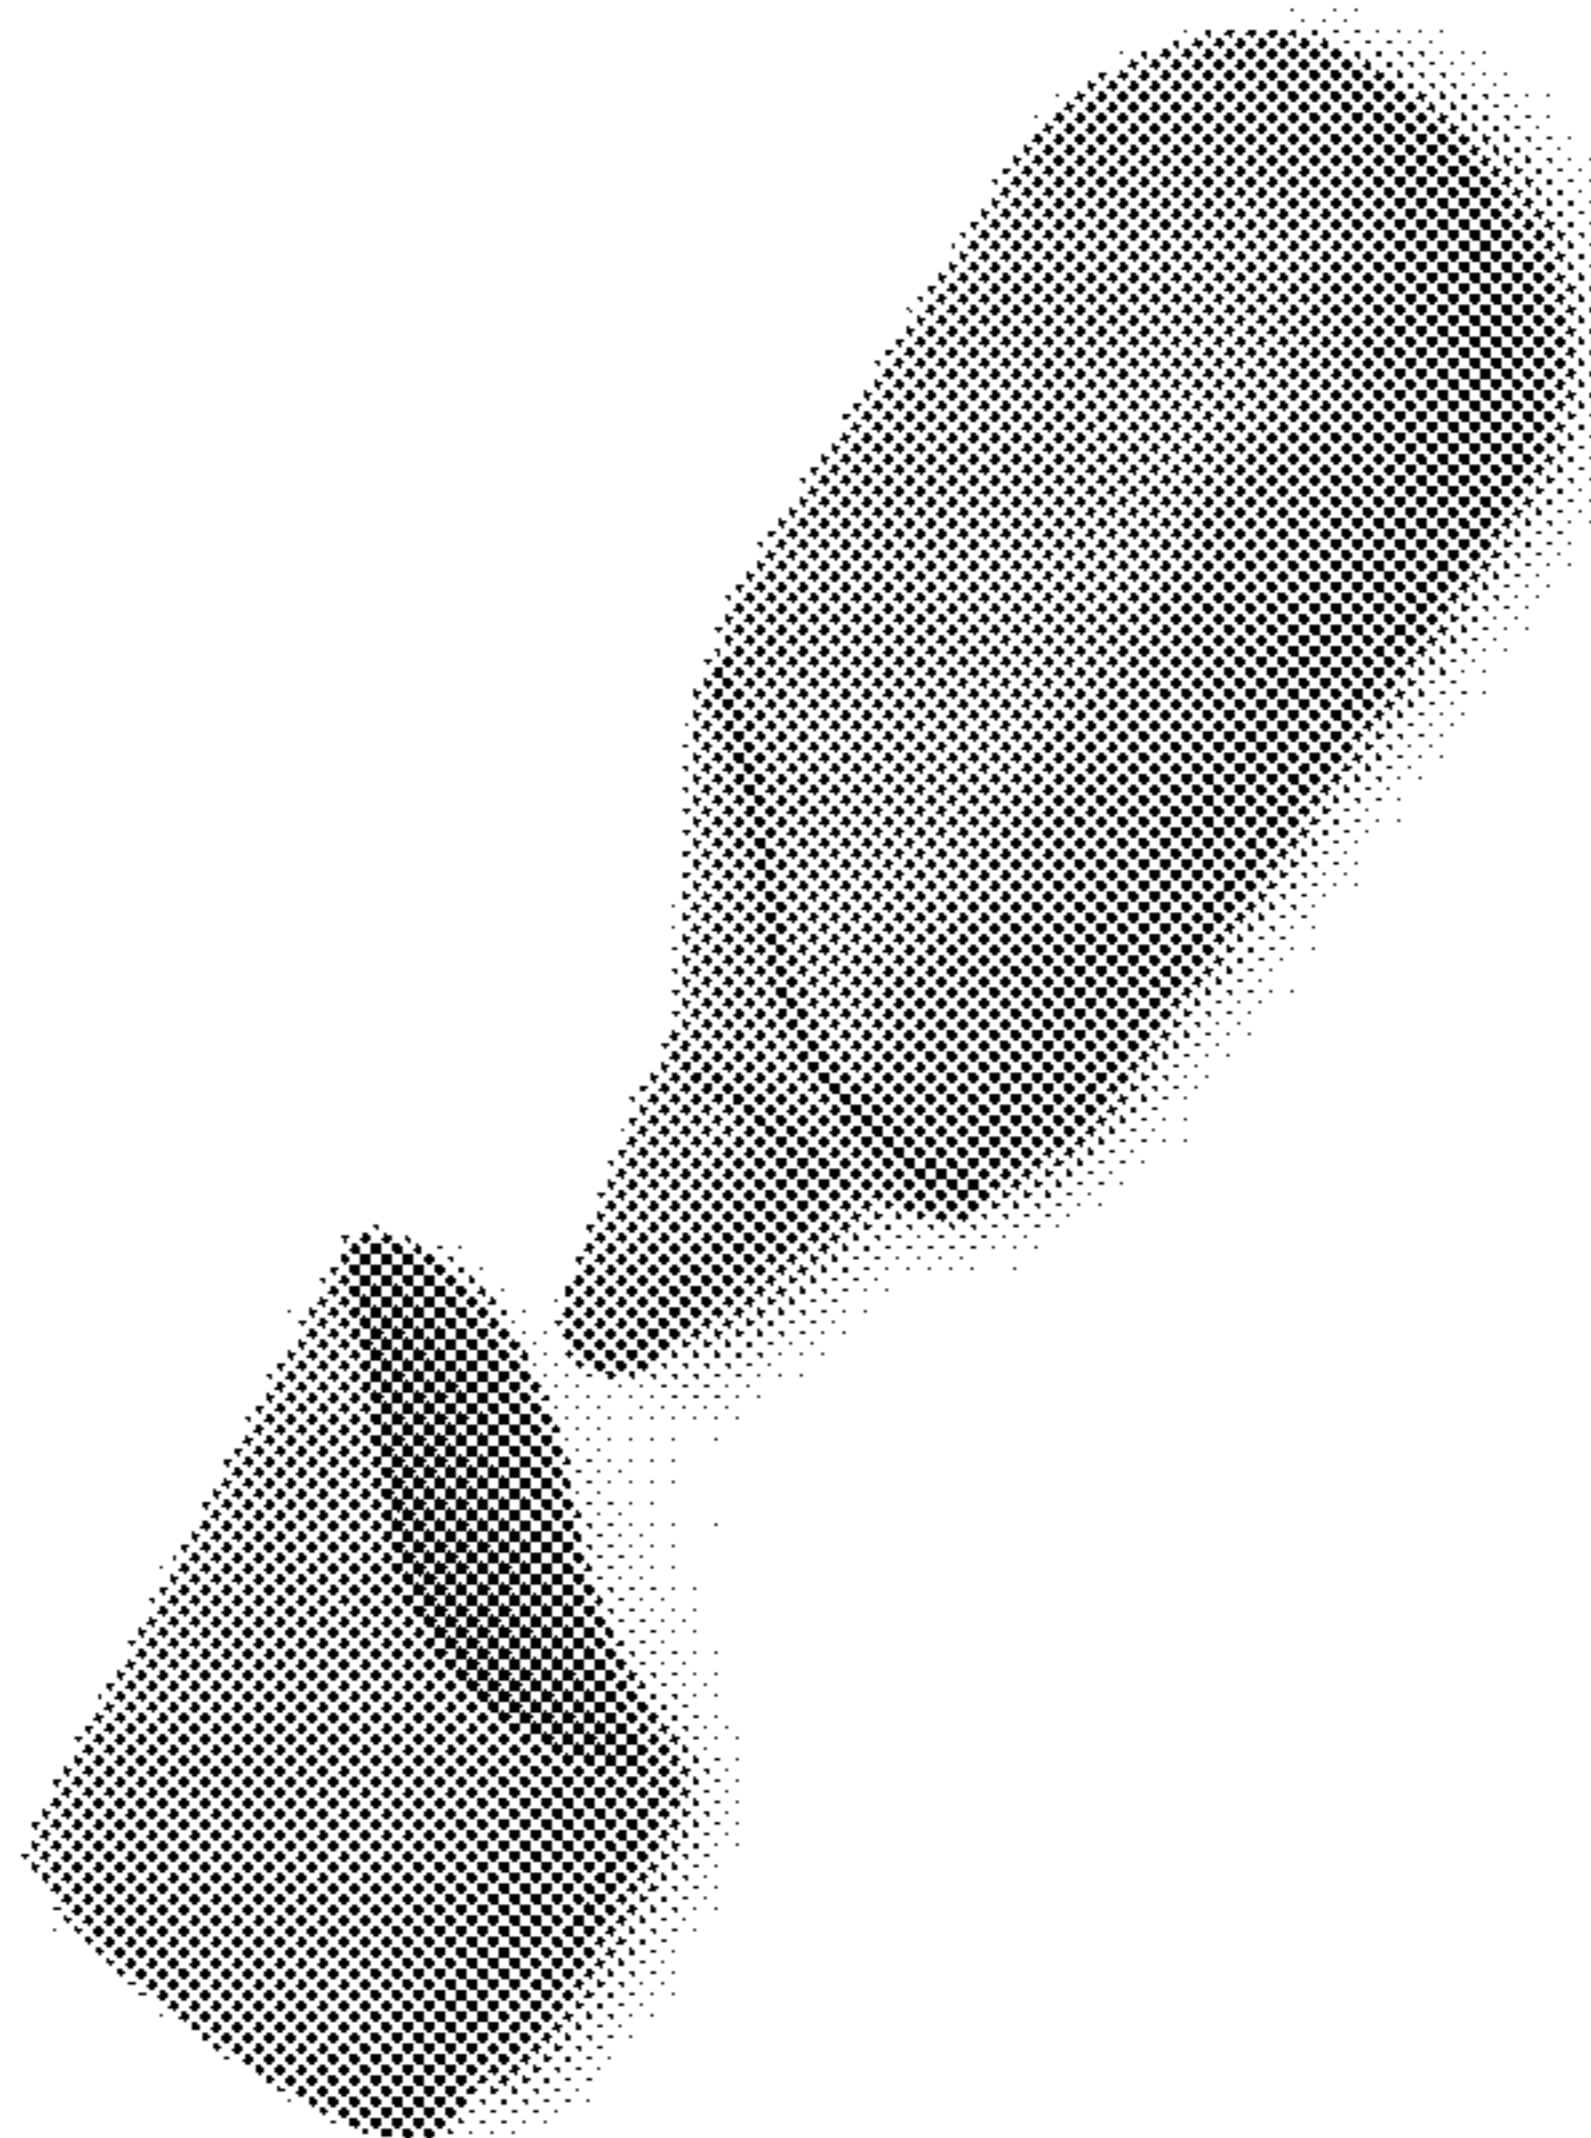

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application

publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee.

- 1. Tube for cosmetic products
- 1.1 : Exploded perspective view
- 1.2 : Front
- 1.3 : Back
- 1.4 : Left
- 1.5 : Top
- 1.6 : Bottom
- 1.7 : Exploded top view

The tube for cosmetic products, as can be seen in images 1.1 to 1.7, is characterized by two parts namely the upper part which represents the body of the tube and the lower part which represents the lid; the body of the tube is shaped in the form of a deformed cylinder and its cross-section is ellipsoidal; the body of the tube, in the upper part, is characterized by a narrower end, where the front and back wall of the tube body bend and touch with their edges at the top at an obtuse angle and that edge is semi-circular, and the vertical, transversal, cross-section of the narrow part of the tube body is semi-ellipsoidal; the body of the tube, in the lower part, along the whole circumference of the body, is importantly characterized by one cascade whose edge, viewed from the front and back side of the body, has the shape of a sine wave; the body of the tube, in the lower part, right, is characterized by a part shaped in the form of the coating of the deformed reverse truncated cone; in the continuation downwards the body of the tube is characterized by a palp, which upper part, is characterized by a lower cylindrical part, in the continuation downwards the palp is in the shape of a reverse cone, whose tip is rounded in the form of a section of a spherical coating, and the center of the top of the palp is characterized by a circular opening; the lid is in the shape of a deformed cylinder and its cross-section is ellipsoidal; the lower wall of the lid is ellipsoidal; the upper edge of the lid, from the front and back side, has the appearance of a sine wave and the upper edge of the lid is compatible with the cascade edge of the tube body.
