(57) **CLAIM**

The ornamental design for a tire tread, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a tire including the tire tread of the present application taken generally from the front and a first side of the tire;

FIG. 2 is a front view of the tire, and any top, bottom, or rear view thereof would be the same as the front view;

FIG. 3 is a side view of the first side of the tire, the second side being the same as the first side view;

FIG. 4 is an enlarged, partial perspective view thereof taken generally from the front and first side of the tire;

FIG. 5 is an enlarged, partial front view thereof; and,

FIG. 6 is an enlarged, partial side view of the first side thereof.

The broken lines and the region between the broken lines defining the inner beads and the first and second sidewalls, and the broken lines representing possible stud locations, depict subject matter that forms no part of the claimed tire tread design, and are included for the purpose of illustrating the full tire. Likewise, the tire interior forms no part of the claim. The tread pattern is understood to repeat uniformly throughout the circumference of the tire.
