(57) **CLAIM**

The ornamental design for a display screen or portion thereof with graphical user interface for biological slide scanning, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first embodiment of a display screen or portion thereof with graphical user interface for biological slide scanning showing our new design; and, FIG. 2 is a front view of a second embodiment thereof.

The dashed broken line rectangle illustrates a boundary of a display screen or a portion thereof and forms no part of the claimed design. Various texts presented in broken lines form no part of the claimed design.

Any trademarks are the property of their respective owners and do not form part of the claimed design.

Gradients or degrees of contrast or saturation that impart a tone do not form part of the claimed design.
