(57) **CLAIM**

I claim the ornamental design for a dolly for an aircraft, as shown and described.

DESCRIPTION

FIG. 1 is a front, top perspective view of a dolly for an aircraft showing my new design; FIG. 2 is a rear, top perspective view thereof; and, FIG. 3 is another rear, top, perspective view thereof. The portions of the drawings depicted in broken lines illustrate structure or features that form no part of the claim design.

We understand embodiments of our inventions includes different combinations of such discrete components as illustrated by the drawings herein and in the applications incorporated by reference. Whereby we reserve the right and contemplate making solid lines dashed for any specific feature or component, part, or portion in the various embodiments illustrated herein and in the drawings of the applications incorporated by reference herein as we have contemplated such as being embodiments of our invention, and we reserve the right and contemplate making dashed lines solid for any specific feature or component, part, or portion.
