

US00D877462S

(12) **United States Design Patent**  
**Teat et al.**

(10) **Patent No.:** **US D877,462 S**  
(45) **Date of Patent:** **\*\* Mar. 10, 2020**

(54) **COMBINATION SURGICAL CAP AND  
DEPLOYABLE BOUFFANT CAP**

(71) Applicant: **O&M Halyard, Inc.**, Mechanicsville,  
VA (US)

(72) Inventors: **Stephanie V. Teat**, Roswell, GA (US);  
**Kun-Chi Wu**, Johns Creek, GA (US);  
**Patrick F. Elliott**, Dunwoody, GA  
(US); **Brian E. Lin**, Cumming, GA  
(US); **Mary Rachel Taylor Henderson**,  
Decatur, GA (US); **Matthew G.  
Weatherly**, Woodstock, GA (US); **Ann  
Shupe**, Walker, MI (US); **Karen  
Duncan**, Wyoming, MI (US)

(73) Assignee: **O&M Halyard, Inc.**, Mechanicsville,  
VA (US)

(\*\*) Term: **15 Years**

(21) Appl. No.: **29/636,628**

(22) Filed: **Feb. 9, 2018**

(51) **LOC (12) Cl.** ..... **02-03**

(52) **U.S. Cl.**  
USPC ..... **D2/867**

(57) **CLAIM**

The ornamental design for a combination surgical cap and  
deployable bouffant cap, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a combination surgical cap  
and deployable bouffant cap according to the present design  
when the bouffant is in its undeployed state;

FIG. 2 is a front view of a combination surgical cap and  
deployable bouffant cap according to the present design  
when the bouffant is in its undeployed state;

FIG. 3 is a rear view of the combination surgical cap and  
deployable bouffant according to the present design when  
the bouffant is in its undeployed state;

FIG. 4 is a section cut view taken along line 4-4 in FIG. 7  
of the combination surgical cap and deployable bouffant  
according to the present design when the bouffant is in its  
undeployed state;

FIG. 5 is a left side view of the combination surgical cap and  
deployable bouffant cap according to the present design  
when the bouffant is in its undeployed state;

FIG. 6 is a right side view of the combination surgical cap  
and deployable bouffant cap according to the present design  
when the bouffant is in its undeployed state;

FIG. 7 is a top view of the combination surgical cap and  
deployable bouffant cap according to the present design  
when the bouffant is in its undeployed state;

(Continued)

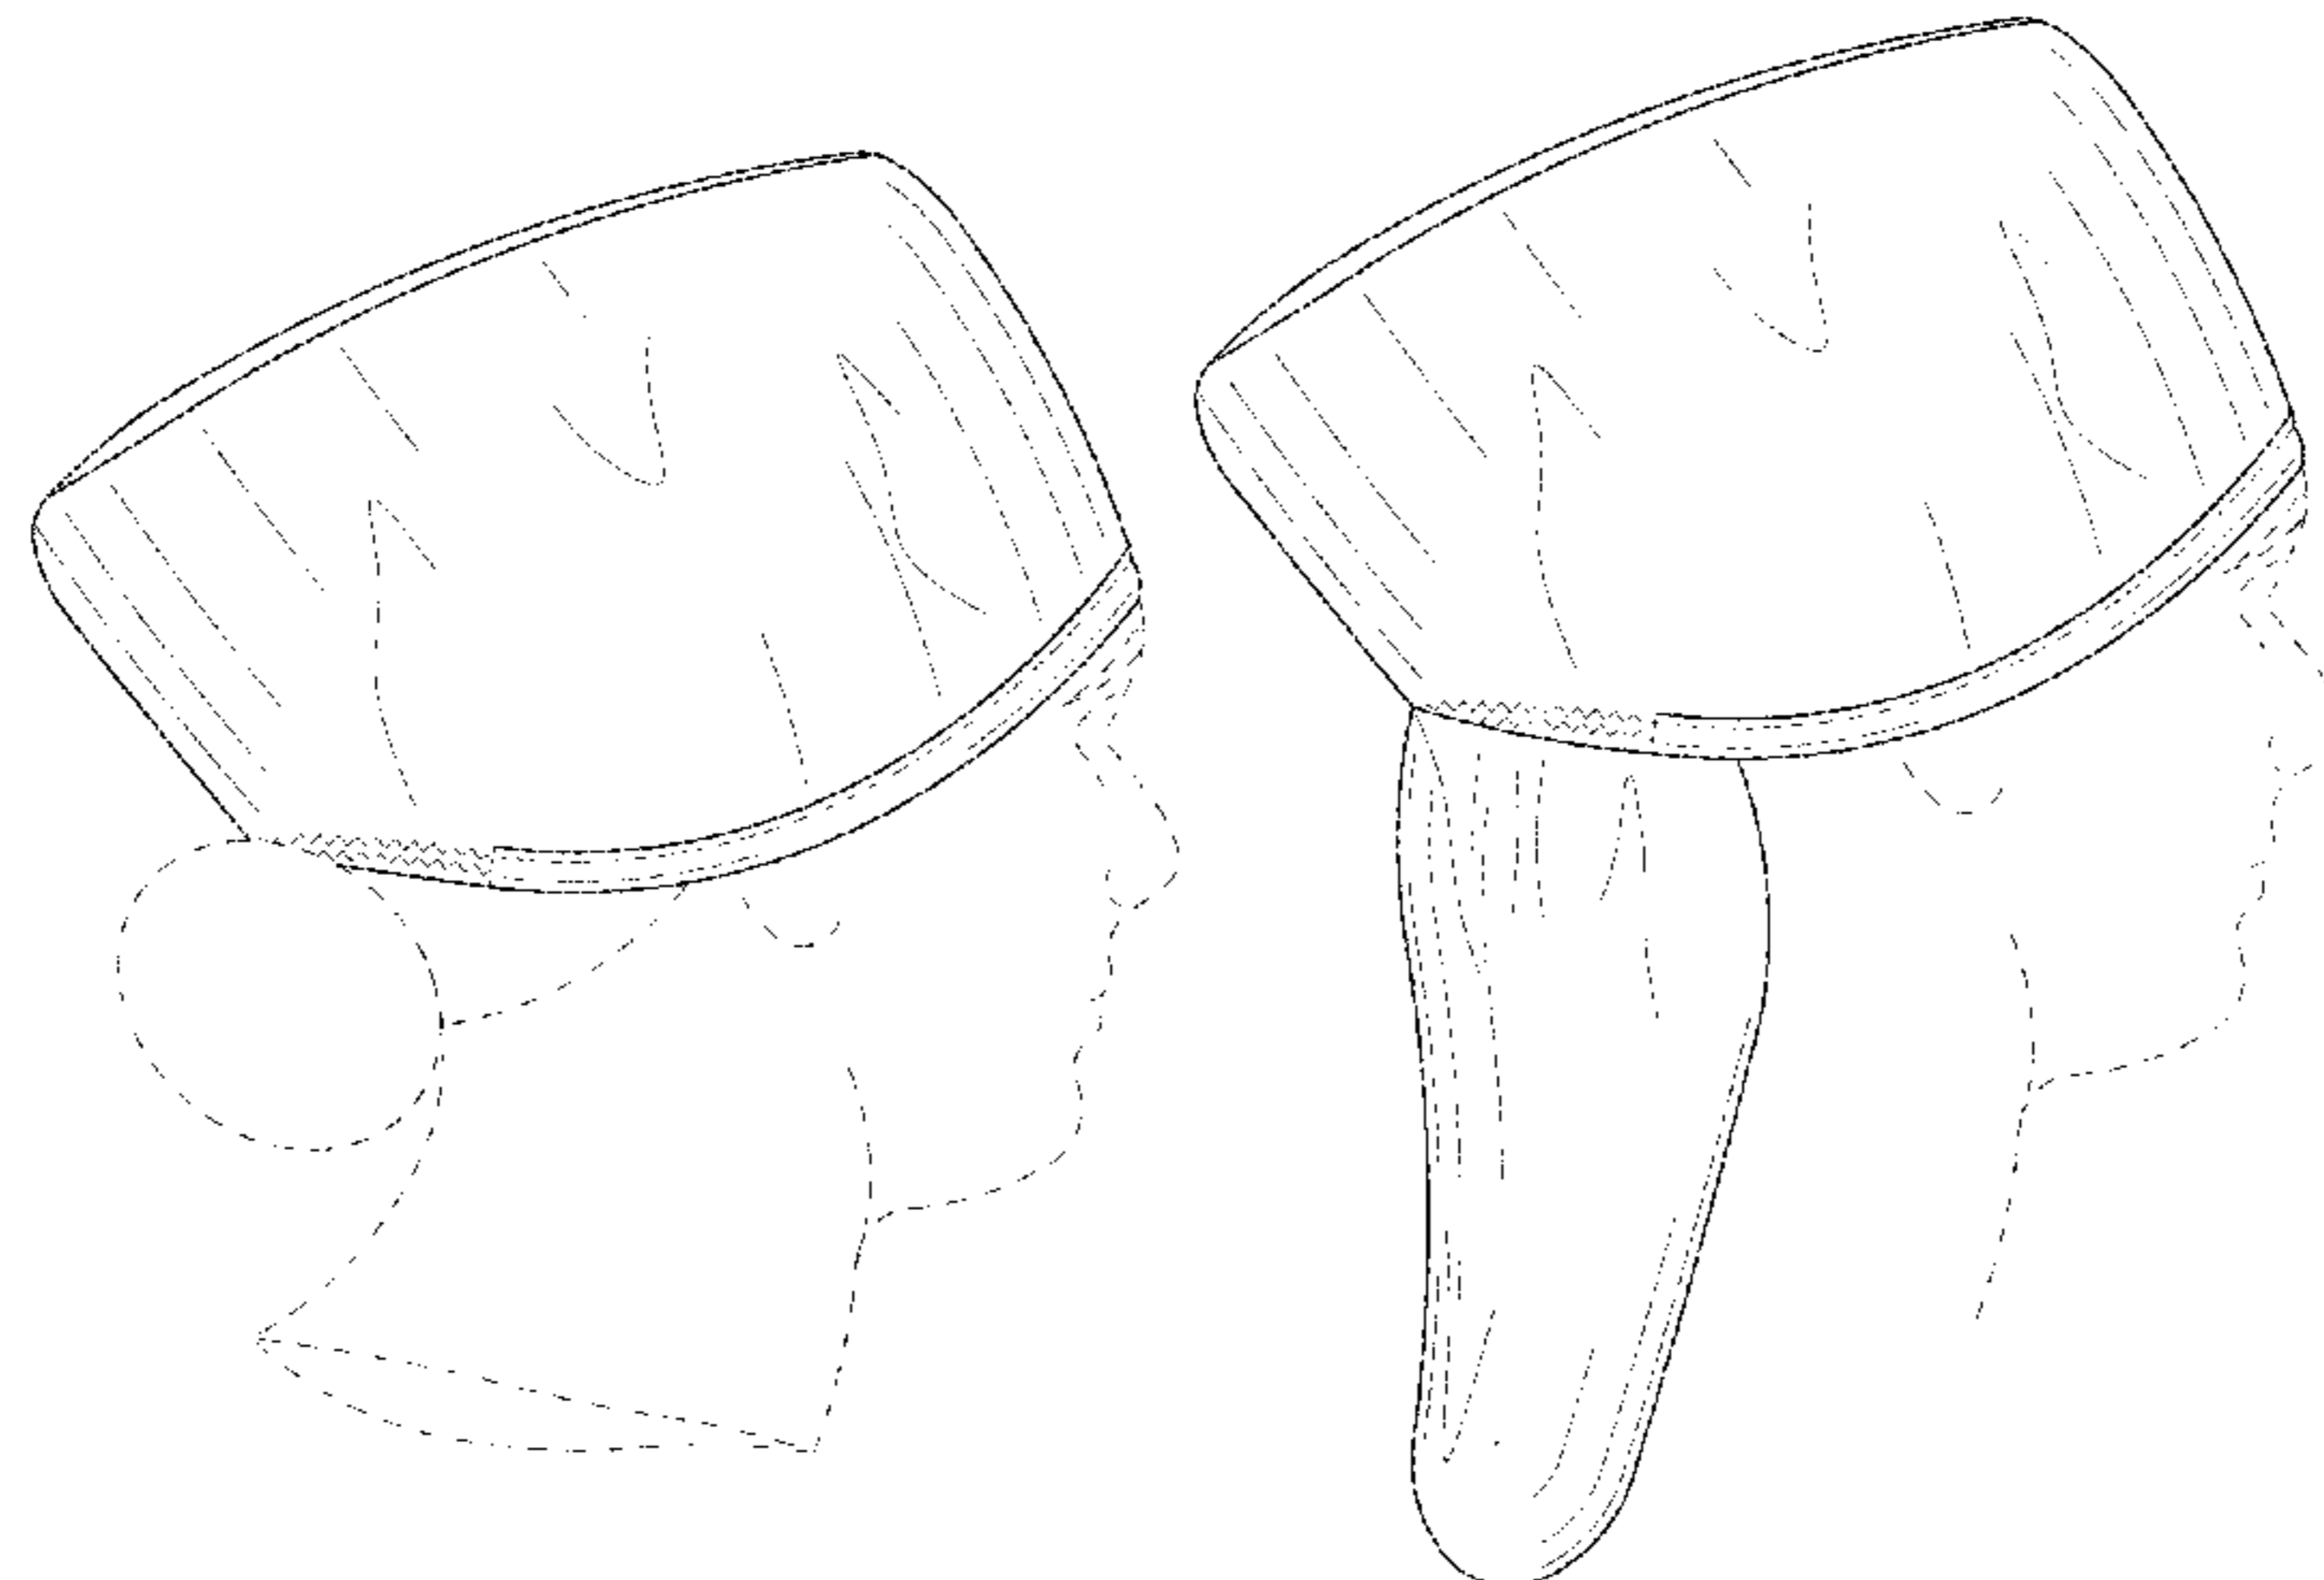

FIG. 8 is a bottom view of the combination surgical cap and deployable bouffant cap according to the present design when the bouffant is in its undeployed state;

FIG. 9 is a perspective view of a combination surgical cap and deployable bouffant cap according to the present design when the bouffant is in its deployed state

FIG. 10 is a front view of a combination surgical cap and deployable bouffant cap according to the present design when the bouffant is in its deployed state;

FIG. 11 is a rear view of the combination surgical cap and deployable bouffant according to the present design when the bouffant is in its deployed state;

FIG. 12 is a section cut view taken along line 12-12 in FIG. 15 of the combination surgical cap and deployable bouffant according to the present design when the bouffant is in its deployed state;

FIG. 13 is a left side view of the combination surgical cap and deployable bouffant cap according to the present design when the bouffant is in its deployed state;

FIG. 14 is a right side view of the combination surgical cap and deployable bouffant cap according to the present design when the bouffant is in its deployed state;

FIG. 15 is a top view of the combination surgical cap and deployable bouffant cap according to the present design when the bouffant is in its deployed state; and,

FIG. 16 is a bottom view of the combination surgical cap and deployable bouffant cap according to the present design when the bouffant is in its deployed state.

The broken-line outline of the partial human figures assists in illustrating how the claimed design may appear when worn, but forms no part of the claimed design. The broken lines along the surfaces of the combination surgical cap and deployable bouffant cap depict environmental structure that forms no part of the claimed design.
