(57) **CLAIM**

The ornamental design for a display screen with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 illustrates a first image in a sequence for a display screen with a graphical user interface; and, FIG. 2 illustrates the second image in the sequence for the display screen with the graphical user interface. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-2. The outermost broken-line rectangle illustrates the perimeter of a display screen and forms no part of the claimed design. The remaining broken lines illustrate portions of a graphical user interface and form no part of the claimed design. The different line patterns within the squares illustrate areas of contrasting appearance. The process or period in which one image transitions to another image forms no part of the claimed design.
