(57) **CLAIM**

The ornamental design for a dispenser for a darkening drape, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a dispenser for a darkening drape showing our new design.

FIG. 2 is a top view thereof.

FIG. 3 is a side view thereof.

FIG. 4 is a side view thereof, shown in an environment;

FIG. 5 is a top view thereof, shown in an environment; and,

FIG. 6 is a side view thereof, shown in an environment.

The broken lines showing a darkening drape on the dispenser for a darkening drape in FIGS. 4-6 are provided for the purpose of illustrating environmental structure; whereas all other broken lines show portions of the dispenser for a darkening drape. The broken line showings of the darkening drape and portions of the dispenser for a darkening drape do not form part of the claimed design.

The light weight lines in the figures show surface contour and material and not surface ornamentation.

It would be understood that a front view, back view, right side view, and left side view of the dispenser for a darkening drape would all be identical, and are each represented by the side view of the dispenser for a darkening drape of FIG. 3. A bottom view of the dispenser for a darkening drape is omitted as the bottom view forms no part of the claimed design.

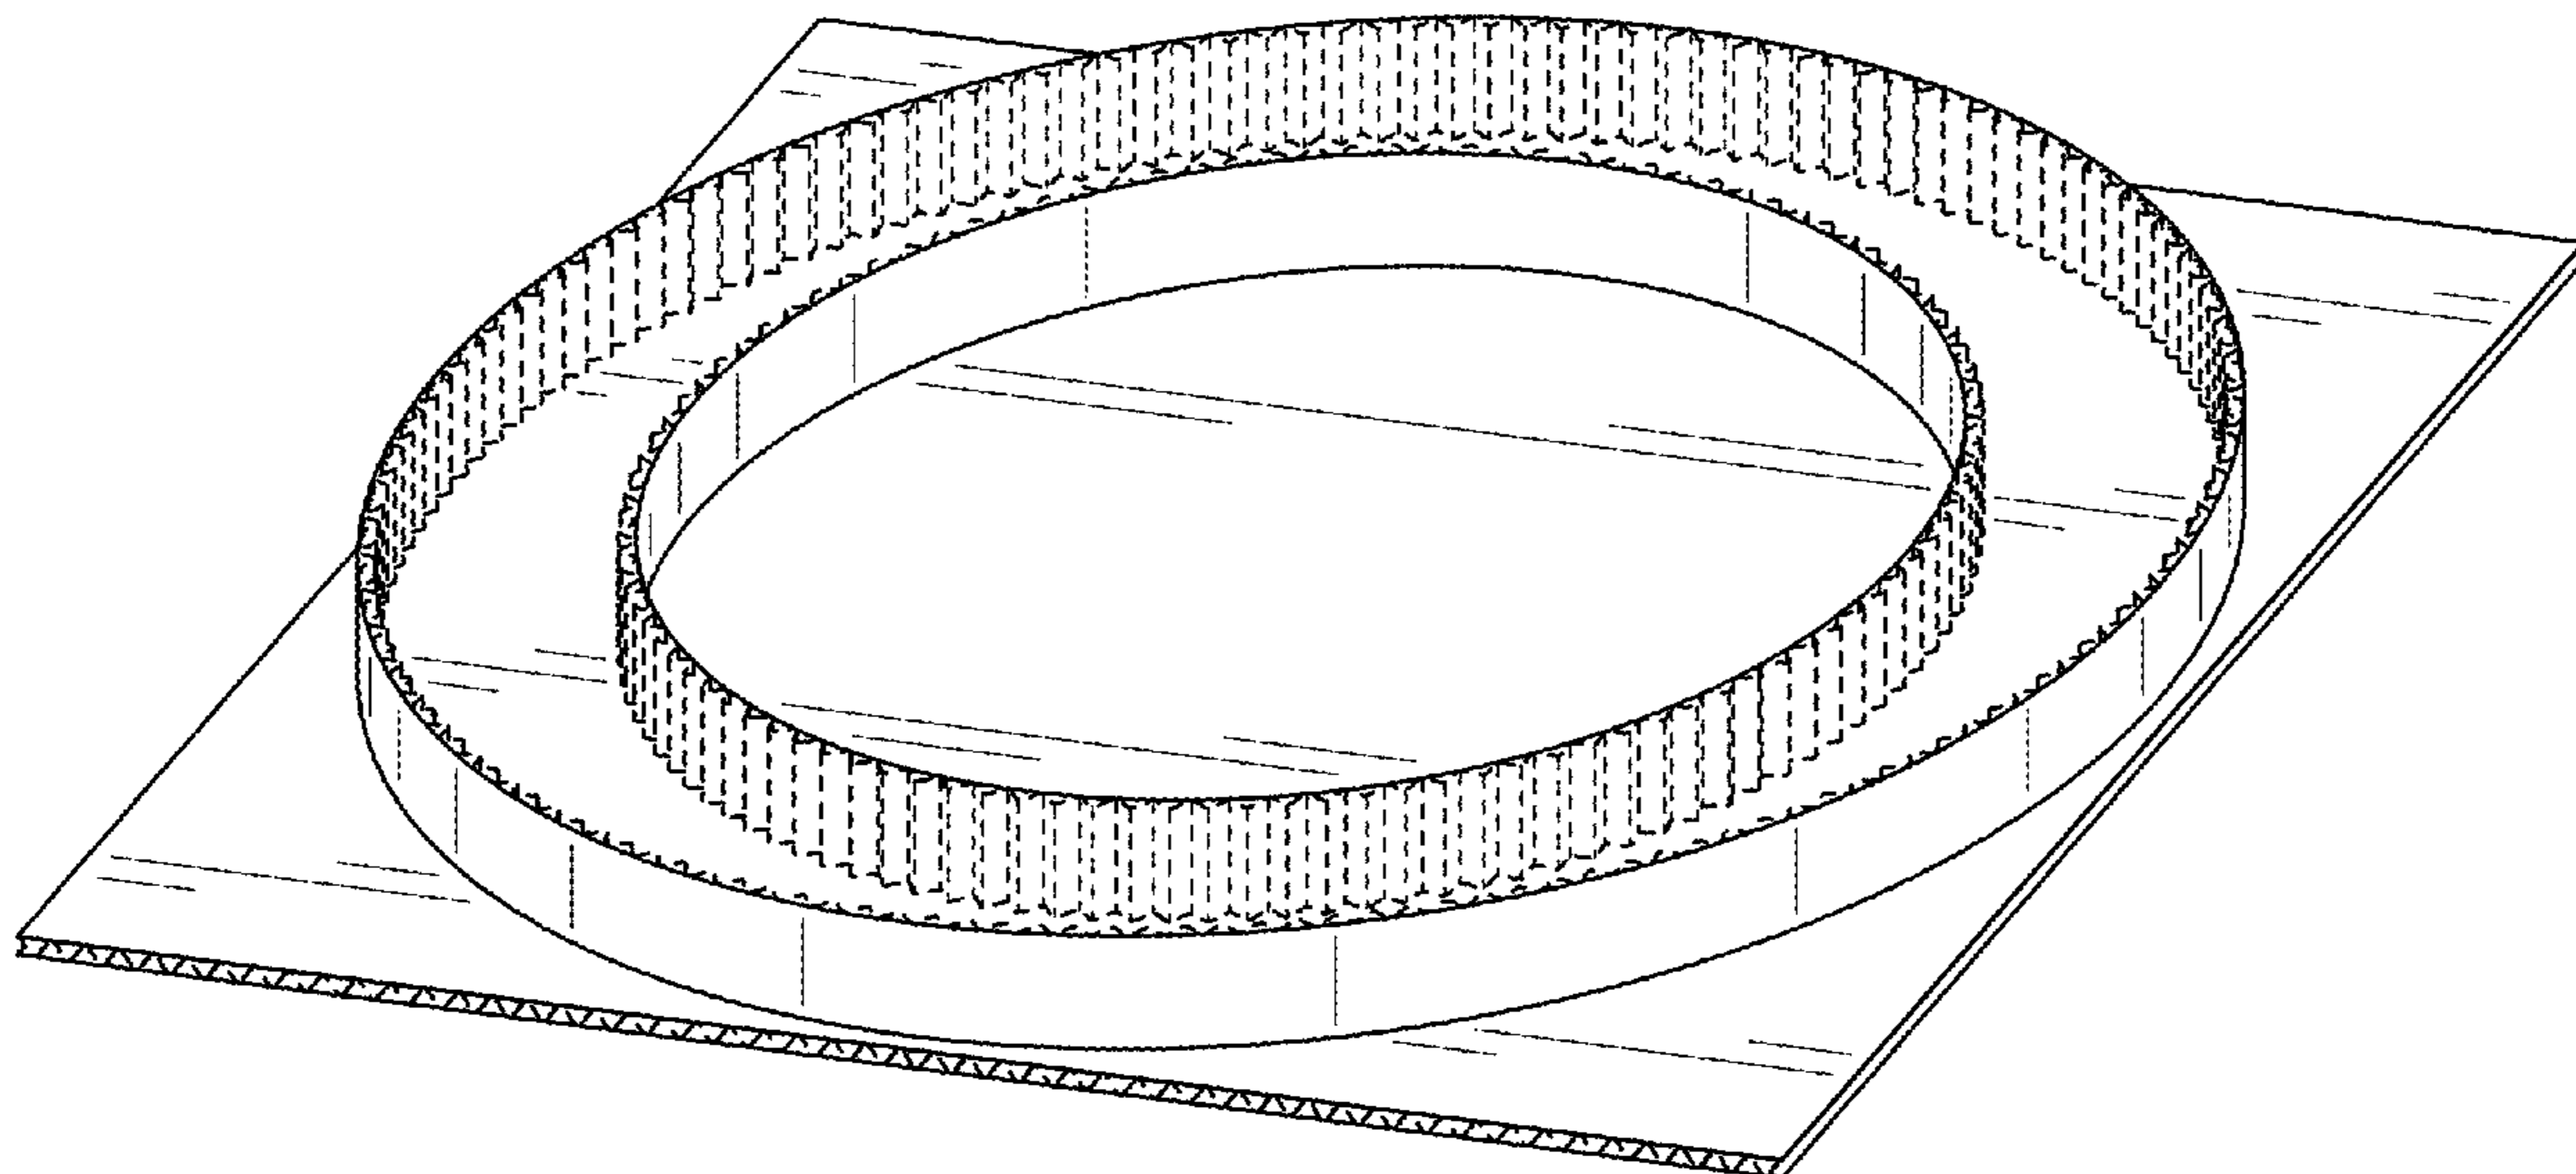

The dispenser for a darkening drape is not limited to the scale shown herein.

1 Claim, 5 Drawing Sheets
