(57) **CLAIM**

The ornamental design for a constant velocity joint, as shown and described.

DESCRIPTION

FIG. 1 is a front, left, top perspective view looking rearward of a constant velocity joint according to one embodiment of the present invention;
 FIG. 2 is a right, rear, top perspective view looking forward thereof;
 FIG. 3 is a left side elevational view thereof, the right side elevational, top plan view and bottom plan view being identical;
 FIG. 4 is a front elevational end view thereof;
 FIG. 5 is a rear elevational end view thereof;
 FIG. 6 is a perspective view of a portion thereof shown installed in a vehicle.
 FIG. 7 is a front, left, top perspective view looking rearward of a constant velocity joint according to another embodiment of the present invention, and with a cross hatch pattern shown on a portion of the device indicating that portion of the device to be colored orange;
 FIG. 8 is a right, rear, top perspective view looking forward thereof;
 FIG. 9 is a left side elevational view thereof, the right side elevational, top plan view and bottom plan view being identical;
 FIG. 10 is a front elevational end view thereof;
 FIG. 11 is a rear elevational end view thereof; and,
 FIG. 12 is a perspective view of a portion thereof shown installed in a vehicle.
 The broken line showing of the constant velocity joint is included for the purpose of illustrating environment and forms no part of the claimed design.

1 Claim, 6 Drawing Sheets
