(57) **CLAIM**

The ornamental design for a display screen or portion thereof with a transitional mixed reality graphical user interface, as shown and described.

**DESCRIPTION**

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the Office upon request and payment of the necessary fee. FIG. 1 is a front view of a portion of a display panel with a transitional mixed reality graphical user interface component showing a first image in a sequence of our design; FIG. 2 is a front view of a second image in the sequence thereof; FIG. 3 is a front view of a third image in the sequence thereof; FIG. 4 is a front view of a fourth image in the sequence thereof; and, FIG. 5 is a front view of a fifth image in the sequence thereof. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-5. The process or period in which one image transitions to another image forms no part of the claimed design. The broken lines show a portion of a display panel of a computing device and form no part of the claimed design.
