(57) **CLAIM**

The ornamental design for a projector, as shown and described.

DESCRIPTION

FIG. 1 is a top left perspective view of a projector showing a first embodiment of our new design;

FIG. 2 is a front view thereof;

FIG. 3 is a rear view thereof;

FIG. 4 is a top plan view thereof;

FIG. 5 is a bottom plan view thereof;

FIG. 6 is a right side view thereof;

FIG. 7 is a left side view thereof;

FIG. 8 is a top left perspective view of the projector showing the first embodiment, with a lens directed to a first direction;

FIG. 9 is a front view thereof;

FIG. 10 is a rear view thereof;

FIG. 11 is a top plan view thereof;

FIG. 12 is a bottom plan view thereof;

FIG. 13 is a right side view thereof;

FIG. 14 is a left side view thereof;

FIG. 15 is a top left perspective view of the projector showing the first embodiment, with the lens directed to a second direction;

FIG. 16 is a top left perspective view of the projector showing the first embodiment, with the lens directed to a third direction;

FIG. 17 is a top left perspective view of the projector showing the first embodiment, with the lens directed to a fourth direction;

FIG. 18 is a top left perspective view of the projector showing the first embodiment, with the lens directed to a fifth direction;

FIG. 19 is a top left perspective view of the projector showing the first embodiment, with the lens directed to a sixth direction;

(Continued)

FIG. 20 is a top left perspective view of the projector showing the first embodiment, with the lens directed to a seventh direction;

FIG. 21 is a top left perspective view of the projector showing the first embodiment, with the lens directed to an eighth direction;

FIG. 22 is a top left perspective view of the projector showing the first embodiment, with the lens directed to a ninth direction;

FIG. 23 is a top left perspective view of the projector showing the first embodiment, with the lens directed to a tenth direction;

FIG. 24 is a top left perspective view of the projector showing the first embodiment, with the lens directed to an eleventh direction;

FIG. 25 is a top left perspective view of a projector showing a second embodiment of our new design;

FIG. 26 is a front view thereof;

FIG. 27 is a rear view thereof;

FIG. 28 is a top plan view thereof;

FIG. 29 is a bottom plan view thereof;

FIG. 30 is a right side view thereof;

FIG. 31 is a left side view thereof;

FIG. 32 is a top left perspective view of the projector showing the second embodiment, with a lens directed to a first direction;

FIG. 33 is a front view thereof;

FIG. 34 is a rear view thereof;

FIG. 35 is a top plan view thereof;

FIG. 36 is a bottom plan view thereof;

FIG. 37 is a right side view thereof;

FIG. 38 is a left side view thereof;

FIG. 39 is a top left perspective view of the projector showing the second embodiment, with the lens directed to a second direction;

FIG. 40 is a top left perspective view of the projector showing the second embodiment, with the lens directed to a third direction;

FIG. 41 is a top left perspective view of the projector showing the second embodiment, with the lens directed to a fourth direction;

FIG. 42 is a top left perspective view of the projector showing the second embodiment, with the lens directed to a fifth direction;

FIG. 43 is a top left perspective view of the projector showing the second embodiment, with the lens directed to a sixth direction;

FIG. 44 is a top left perspective view of the projector showing the second embodiment, with the lens directed to a seventh direction;

FIG. 45 is a top left perspective view of the projector showing the second embodiment, with the lens directed to an eighth direction;

FIG. 46 is a top left perspective view of the projector showing the second embodiment, with the lens directed to a ninth direction;

FIG. 47 is a top left perspective view of the projector showing the second embodiment, with the lens directed to a tenth direction; and,

FIG. 48 is a top left perspective view of the projector showing the second embodiment, with the lens directed to an eleventh direction.

The broken lines illustrate portions of the projector and form no part of the claimed design.

The design of a lens of the projector as the lens transitions from any one of the first to the eleventh positions to another of the first to the eleventh positions forms no part of the claimed design.

1 Claim, 44 Drawing Sheets
