(57) **CLAIM**

The ornamental design for a display screen for packaged medicine inspection apparatus with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen for packaged medicine inspection apparatus with transitional graphical user interface showing the first image in a sequence; FIG. 2 is another view thereof showing the second image in a sequence; and, FIG. 3 is a top, front and right side perspective view of a packaged medicine inspection apparatus shown without the graphical user interface shown on the display screen, for ease of illustration.

The appearance of the graphical user interface transitions sequentially between the images shown in FIGS. 1 and 2. The process or period in which one image transitions to another forms no part of the claimed design.

The broken lines in FIGS. 1 and 2 illustrate portions of the graphical user interface. The broken lines in FIG. 3 illustrate a packaged medicine inspection apparatus. None of the broken lines form part of the claimed design.

1 Claim, 3 Drawing Sheets
