DESCRIPTION

FIG. 1 is a front view of a first image of a first embodiment of a display screen with transitional graphical user interface according to the claimed design;

FIG. 3 is a front view of a first image of a second embodiment of a display screen with transitional graphical user interface according to the claimed design; and,

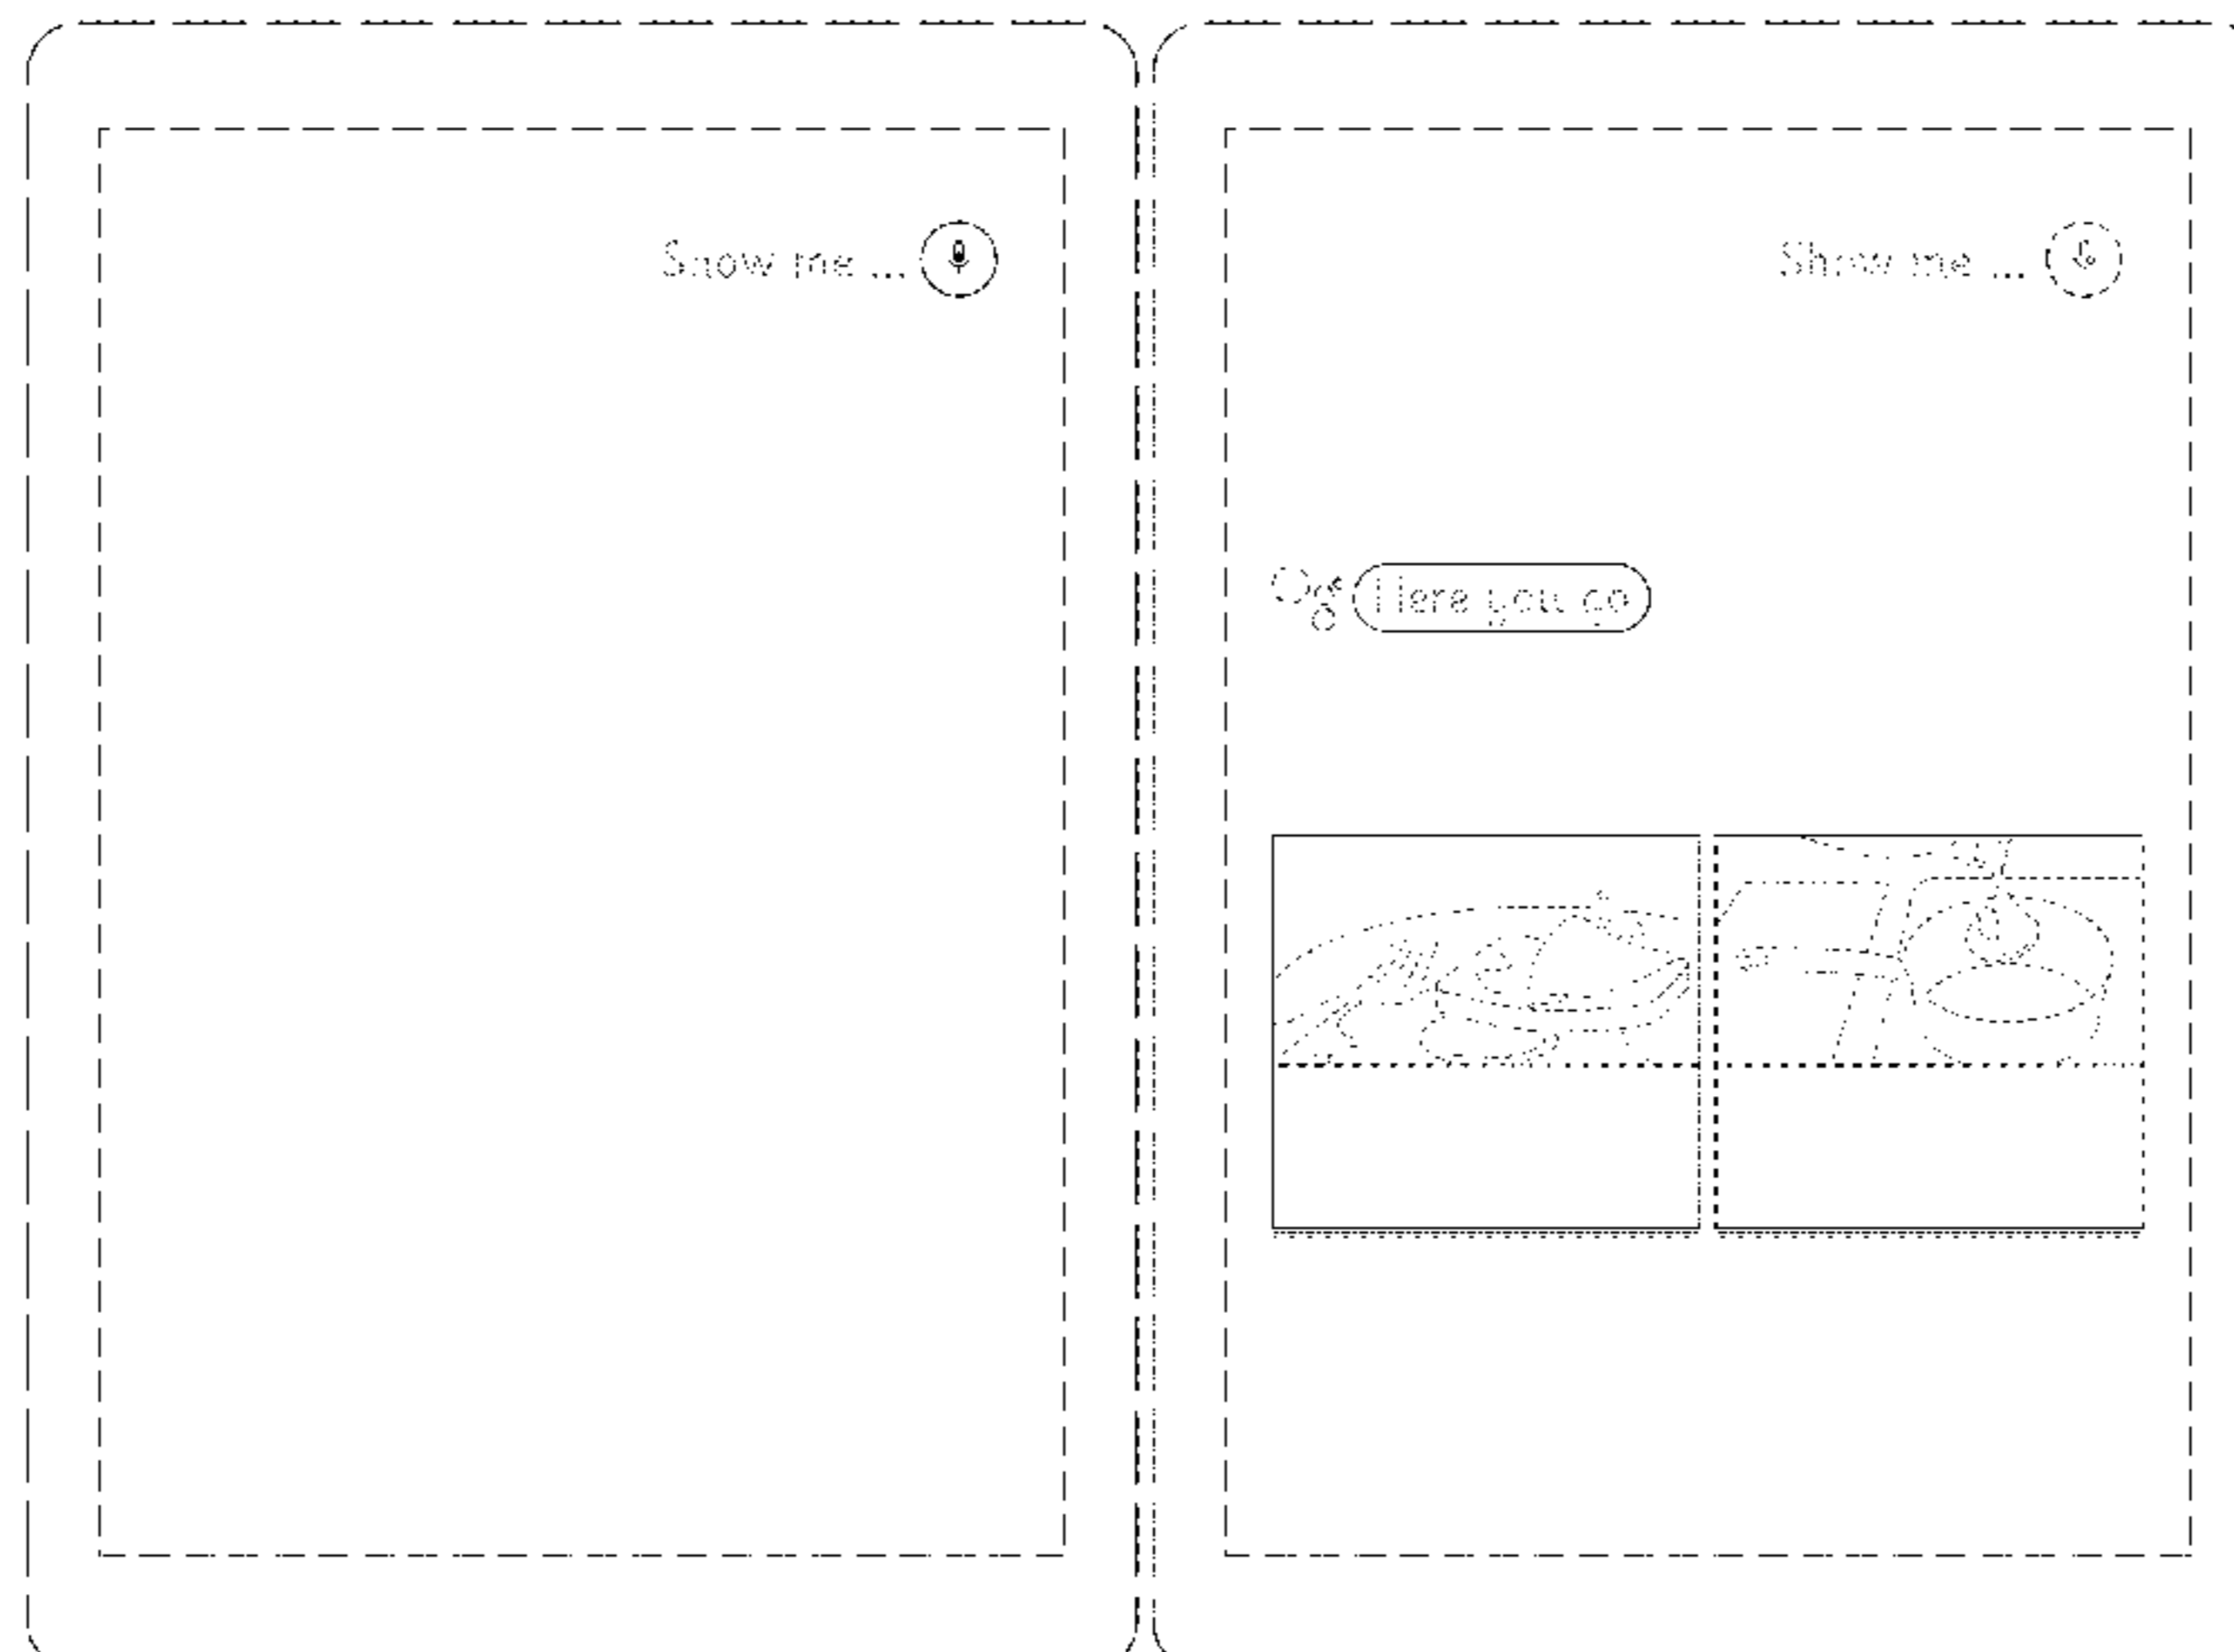

FIG. 4 is a front view of a second image thereof.

The appearance of the transition is sequential from FIG. 1 to FIG. 2 in the first embodiment and from FIG. 3 to FIG. 4 in the second embodiment. The process or period in which an image transitions to another image forms no part of the claimed design.
