(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of an image in a sequence for a display screen with transitional graphical user interface according to a new design; and, FIG. 2 is a second image thereof. The appearance of the transitional image sequentially transitions between the images shown in FIGS. 1-2. The process or period in which an image transitions to another image forms no part of the claimed design. Shading indicates a contrast in appearance. The outermost broken line rounded rectangle showing an electronic device illustrates environmental subject matter. The broken line showing a display screen, and all other broken lines showing portions of the graphical user interface illustrate portions of the article. None of the aforementioned broken line subject matter forms part of the claimed design.

1 Claim, 2 Drawing Sheets
