

US00D881928S

(12) **United States Design Patent**
Harmann et al.

(10) **Patent No.:** **US D881,928 S**
(45) **Date of Patent:** **** Apr. 21, 2020**

- (54) **DISPLAY SCREEN OR PORTION THEREOF WITH A GRAPHICAL USER INTERFACE**
- (71) Applicant: **Ignite Ventures LLC**, Lititz, PA (US)
- (72) Inventors: **Sean Harmann**, Lititz, PA (US);
Edward McFarlane, Lititz, PA (US);
Kirk Barrett, Lititz, PA (US); **Austin Haller**, Lititz, PA (US)
- (73) Assignee: **Ignite Ventures LLC**, Lititz, PA (US)
- (**) Term: **15 Years**
- (21) Appl. No.: **29/597,367**
- (22) Filed: **Mar. 16, 2017**
- (51) **LOC (12) Cl.** **14-04**
- (52) **U.S. Cl.**
USPC **D14/487**
- (58) **Field of Classification Search**

(57) **CLAIM**

The ornamental design for a display screen or portion thereof with a graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen or portion thereof with a graphical user interface showing a first image of a first embodiment of our new design.

FIG. 2 is a front view of a display screen or portion thereof with a graphical user interface showing a second image of our new design.

FIG. 3 is a front view of a display screen or portion thereof with a graphical user interface showing a third image of our new design.

FIG. 4 is a front view of a display screen or portion thereof with a graphical user interface showing a fourth image of our new design.

FIG. 5 is a front view of a display screen or portion thereof with a graphical user interface showing a fifth image of our new design.

FIG. 6 is a front view of a display screen or portion thereof with a graphical user interface showing a sixth image of our new design.

FIG. 7 is a front view of a display screen or portion thereof with a graphical user interface showing a seventh image of our new design.

In the first embodiment of the inventive design of the graphical user interface, the display of the images transitions sequentially from the first image through to the seventh image shown in FIGS. 1-7. The process or time for transition from one image to another image forms no part of the claimed design.

FIG. 8 is a front view of a display screen or portion thereof with a graphical user interface showing a first image of a second embodiment of our new design.

FIG. 9 is a front view of a display screen or portion thereof with a graphical user interface showing a second image of our new design.

FIG. 10 is a front view of a display screen or portion thereof with a graphical user interface showing a third image of our new design.

FIG. 11 is a front view of a display screen or portion thereof with a graphical user interface showing a fourth image of our new design.

FIG. 12 is a front view of a display screen or portion thereof with a graphical user interface showing a fifth image of our new design.

FIG. 13 is a front view of a display screen or portion thereof with a graphical user interface showing a sixth image of our new design.

FIG. 14 is a front view of a display screen or portion thereof with a graphical user interface showing a seventh image of our new design.

In the second embodiment of the inventive design of the graphical user interface, the display of the images transitions sequentially from the first image through to the seventh image shown in FIGS. 8-14. The process or time for transition from one image to another image forms no part of the claimed design.

FIG. 15 is a front view of a display screen or portion thereof with a graphical user interface showing a first image of a third embodiment of our new design.

FIG. 16 is a front view of a display screen or portion thereof with a graphical user interface showing a second image of our new design.

FIG. 17 is a front view of a display screen or portion thereof with a graphical user interface showing a third image of our new design.

FIG. 18 is a front view of a display screen or portion thereof with a graphical user interface showing a fourth image of our new design.

FIG. 19 is a front view of a display screen or portion thereof with a graphical user interface showing a fifth image of our new design.

FIG. 20 is a front view of a display screen or portion thereof with a graphical user interface showing a sixth image of our new design; and,

FIG. 21 is a front view of a display screen or portion thereof with a graphical user interface showing a seventh image of our new design.

In the third embodiment of the inventive design of the graphical user interface, the display of the images transitions sequentially from the first image through to the seventh image shown in FIGS. 15-21. The process or time for transition from one image to another image forms no part of the claimed design.

The outermost uneven-length broken lines of FIGS. 1-21 illustrate a display screen or portion thereof, in an environment of use of the design with an electronic device, and form no part of the claimed design. The even-length broken lines within the display screen or portion thereof, FIGS. 1-21 illustrate portions of the graphical user interface, and form no part of the claimed design.
