(57) **CLAIM**

The ornamental design for a display screen or portion thereof with an animated graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a display screen or portion thereof with an animated graphical user interface showing a first image of a first embodiment of our new design.

FIG. 2 is a front view of a display screen or portion thereof with an animated graphical user interface showing a second image of our new design.

FIG. 3 is a front view of a display screen or portion thereof with an animated graphical user interface showing a third image of our new design.

FIG. 4 is a front view of a display screen or portion thereof with an animated graphical user interface showing a fourth image of our new design.

FIG. 5 is a front view of a display screen or portion thereof with an animated graphical user interface showing a fifth image of our new design.

FIG. 6 is a front view of a display screen or portion thereof with an animated graphical user interface showing a sixth image of our new design.

FIG. 7 is a front view of a display screen or portion thereof with an animated graphical user interface showing a seventh image of our new design.

FIG. 8 is a front view of a display screen or portion thereof with an animated graphical user interface showing an eighth image of our new design.

FIG. 9 is a front view of a display screen or portion thereof with an animated graphical user interface showing a ninth image of our new design.

FIG. 10 is a front view of a display screen or portion thereof with an animated graphical user interface showing a tenth image of our new design.

FIG. 11 is a front view of a display screen or portion thereof with an animated graphical user interface showing an eleventh image of our new design.

The first embodiment of the inventive design of the animated graphical user interface transitions sequentially between the images of FIGS. 1-11. The process or time for transition from one image to another of FIGS. 1-11 forms no part of the claimed design.

FIG. 12 is a front view of a display screen or portion thereof with an animated graphical user interface showing a first image of a second embodiment of our new design.

FIG. 13 is a front view of a display screen or portion thereof with an animated graphical user interface showing a second image of our new design.

FIG. 14 is a front view of a display screen or portion thereof with an animated graphical user interface showing a third image of our new design.

FIG. 15 is a front view of a display screen or portion thereof with an animated graphical user interface showing a fourth image of our new design.

FIG. 16 is a front view of a display screen or portion thereof with an animated graphical user interface showing a fifth image of our new design.

FIG. 17 is a front view of a display screen or portion thereof with an animated graphical user interface showing a sixth image of our new design.

FIG. 18 is a front view of a display screen or portion thereof with an animated graphical user interface showing a seventh image of our new design.

FIG. 19 is a front view of a display screen or portion thereof with an animated graphical user interface showing an eighth image of our new design.

FIG. 20 is a front view of a display screen or portion thereof with an animated graphical user interface showing a ninth image of our new design.

FIG. 21 is a front view of a display screen or portion thereof with an animated graphical user interface showing a tenth image of our new design.

FIG. 22 is a front view of a display screen or portion thereof with an animated graphical user interface showing an eleventh image of our new design.

The second embodiment of the inventive design of the animated graphical user interface transitions sequentially between the images of FIGS. 12-22. The process or time for transition from one image to another of FIGS. 12-22 forms no part of the claimed design.

FIG. 23 is a front view of a display screen or portion thereof with an animated graphical user interface showing a first image of a third embodiment of our new design.

FIG. 24 is a front view of a display screen or portion thereof with an animated graphical user interface showing a second image of our new design.

FIG. 25 is a front view of a display screen or portion thereof with an animated graphical user interface showing a third image of our new design.

FIG. 26 is a front view of a display screen or portion thereof with an animated graphical user interface showing a fourth image of our new design.

FIG. 27 is a front view of a display screen or portion thereof with an animated graphical user interface showing a fifth image of our new design.

FIG. 28 is a front view of a display screen or portion thereof with an animated graphical user interface showing a sixth image of our new design.

FIG. 29 is a front view of a display screen or portion thereof with an animated graphical user interface showing a seventh image of our new design.

FIG. 30 is a front view of a display screen or portion thereof with an animated graphical user interface showing an eighth image of our new design.

FIG. 31 is a front view of a display screen or portion thereof with an animated graphical user interface showing a ninth image of our new design.

FIG. 32 is a front view of a display screen or portion thereof with an animated graphical user interface showing a tenth image of our new design; and,

FIG. 33 is a front view of a display screen or portion thereof with an animated graphical user interface showing an eleventh image of our new design.

The third embodiment of the inventive design of the animated graphical user interface transitions sequentially between the images of FIGS. 23-33. The process or time for transition from one image to another of FIGS. 23-33 forms no part of the claimed design.

The outermost uneven-length broken lines of FIGS. 1-33 illustrate a display screen or portion thereof, in an environment of use of the design with an electronic device, and form no part of the claimed design. The even-length broken lines

within the display screen or portion thereof, FIGS. 1-33 illustrate portions of the graphical user interface, and form no part of the claimed design.
