(57) **CLAIM**

The ornamental design for a portion of a display panel with a transitional mixed reality graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a portion of a display panel with a transitional mixed reality graphical user interface component showing a first image in a first sequence of the design; FIG. 2 is a front view of a second image in the first sequence; FIG. 3 is a front view of a third image in the first sequence; FIG. 4 is a front view of a fourth image in the first sequence; FIG. 5 is a front view of a fifth image in the first sequence; FIG. 6 is a front view of a sixth image in the first sequence; FIG. 7 is a front view of a seventh image in the first sequence; FIG. 8 is a front view of an eighth image in the first sequence; FIG. 9 is a front view of a portion of a display panel with a transitional mixed reality graphical user interface component showing a first image in a second sequence of the design; FIG. 10 is a front view of a second image in the second sequence; FIG. 11 is a front view of a third image in the second sequence; FIG. 12 is a front view of a fourth image in the second sequence; FIG. 13 is a front view of a fifth image in the second sequence; FIG. 14 is a front view of a sixth image in the second sequence; FIG. 15 is a front view of a seventh image in the second sequence; FIG. 16 is a front view of an eighth image in the second sequence; and, FIG. 17 is a third person rear perspective view of the transitional mixed reality graphical user interface component showing the first to eight images in the first and second sequences, shown separately for completeness of illustration.

The subject matter of the present disclosure includes graphical user interface components present within a mixed reality interface. The subject matter of the present disclosure includes a process or period during which one computer graphical user interface component changes into another. In particular, the appearance of the image transitions between the images shown in FIGS. 1 to 8 and between the images shown in FIGS. 9 to 16. This process or period in which one computer graphical user interface component transitions into another computer graphical user interface component forms no part of the claimed design.

(Continued)

The broken lines including the showing of a portion of a display panel of a computing device are included for the purpose of illustrating environmental structure and form no part of the claimed design. The broken lines forming part of the graphical user interface are included for illustrating environmental aspects of a portion of a display panel with a transitional mixed reality graphical user interface and form no part of the claimed design.
