(57) **CLAIM**

The ornamental design for an automated transaction machine, as shown and described.

DESCRIPTION

FIG. 1 is a right-front perspective view of an automated transaction machine design of the present invention.

FIG. 2 is left-back perspective view of an automated transaction machine design of the present invention.

FIG. 3 is a front view of an automated transaction machine design of the present invention.

FIG. 4 is view of the right side of an automated transaction machine design of the present invention.

FIG. 5 is view of the left side of an automated transaction machine design of the present invention.

FIG. 6 is a back view of the design of an automated transaction machine of the present invention; and,

FIG. 7 is a top view of an automated transaction machine design of the present invention.

The bottom of the automated transaction machine is flat and devoid of ornamentation.

The broken lines immediately adjacent shaded areas represent the bounds of the claimed design. All other broken lines represent environment. The broken lines form no part of the claim.
