(57) **CLAIM**

The ornamental design for a projector, as shown and described.

DESCRIPTION

FIG. 1 is a left perspective view of a projector showing our new design;

FIG. 2 is a front view thereof;

FIG. 3 is a rear view thereof;

FIG. 4 is a top plan view thereof;

FIG. 5 is a bottom plan view thereof;

FIG. 6 is a right side view thereof;

FIG. 7 is a left side view thereof;

FIG. 8 is a left perspective view of a projector illustrating the situation that a lens barrier cylinder rises, showing our new design;

FIG. 9 is a front view thereof;

FIG. 10 is a left side view thereof;

FIG. 11 is a left perspective view of a projector illustrating the situation that a cover is moved backward;

FIG. 12 is a front view thereof;

FIG. 13 is a rear view thereof;

FIG. 14 is a top plan view thereof;

FIG. 15 is a bottom plan view thereof;

FIG. 16 is a right side view thereof;

FIG. 17 is a left side view thereof;

FIG. 18 is a left perspective view of a projector illustrating the situation that a handle is drawn upward, showing our new design;

FIG. 19 is a front view thereof;

FIG. 20 is a rear view thereof;

FIG. 21 is a top plan view thereof;

FIG. 22 is a bottom plan view thereof;

FIG. 23 is a right side view thereof;

FIG. 24 is a left side view thereof;

FIG. 25 is a left perspective view of a projector illustrating the situation that a lens is directed to first direction, showing our new design;

FIG. 26 is a front view thereof;

FIG. 27 is a rear view thereof;

FIG. 28 is a top plan view thereof;

FIG. 29 is a bottom plan view thereof;

FIG. 30 is a right side view thereof;

FIG. 31 is a left side view thereof;

FIG. 32 is a left perspective view of a projector illustrating the situation that the lens is directed to second direction, showing our new design;

FIG. 33 is a left perspective view of a projector illustrating the situation that the lens is directed to third direction, showing our new design;

(Continued)

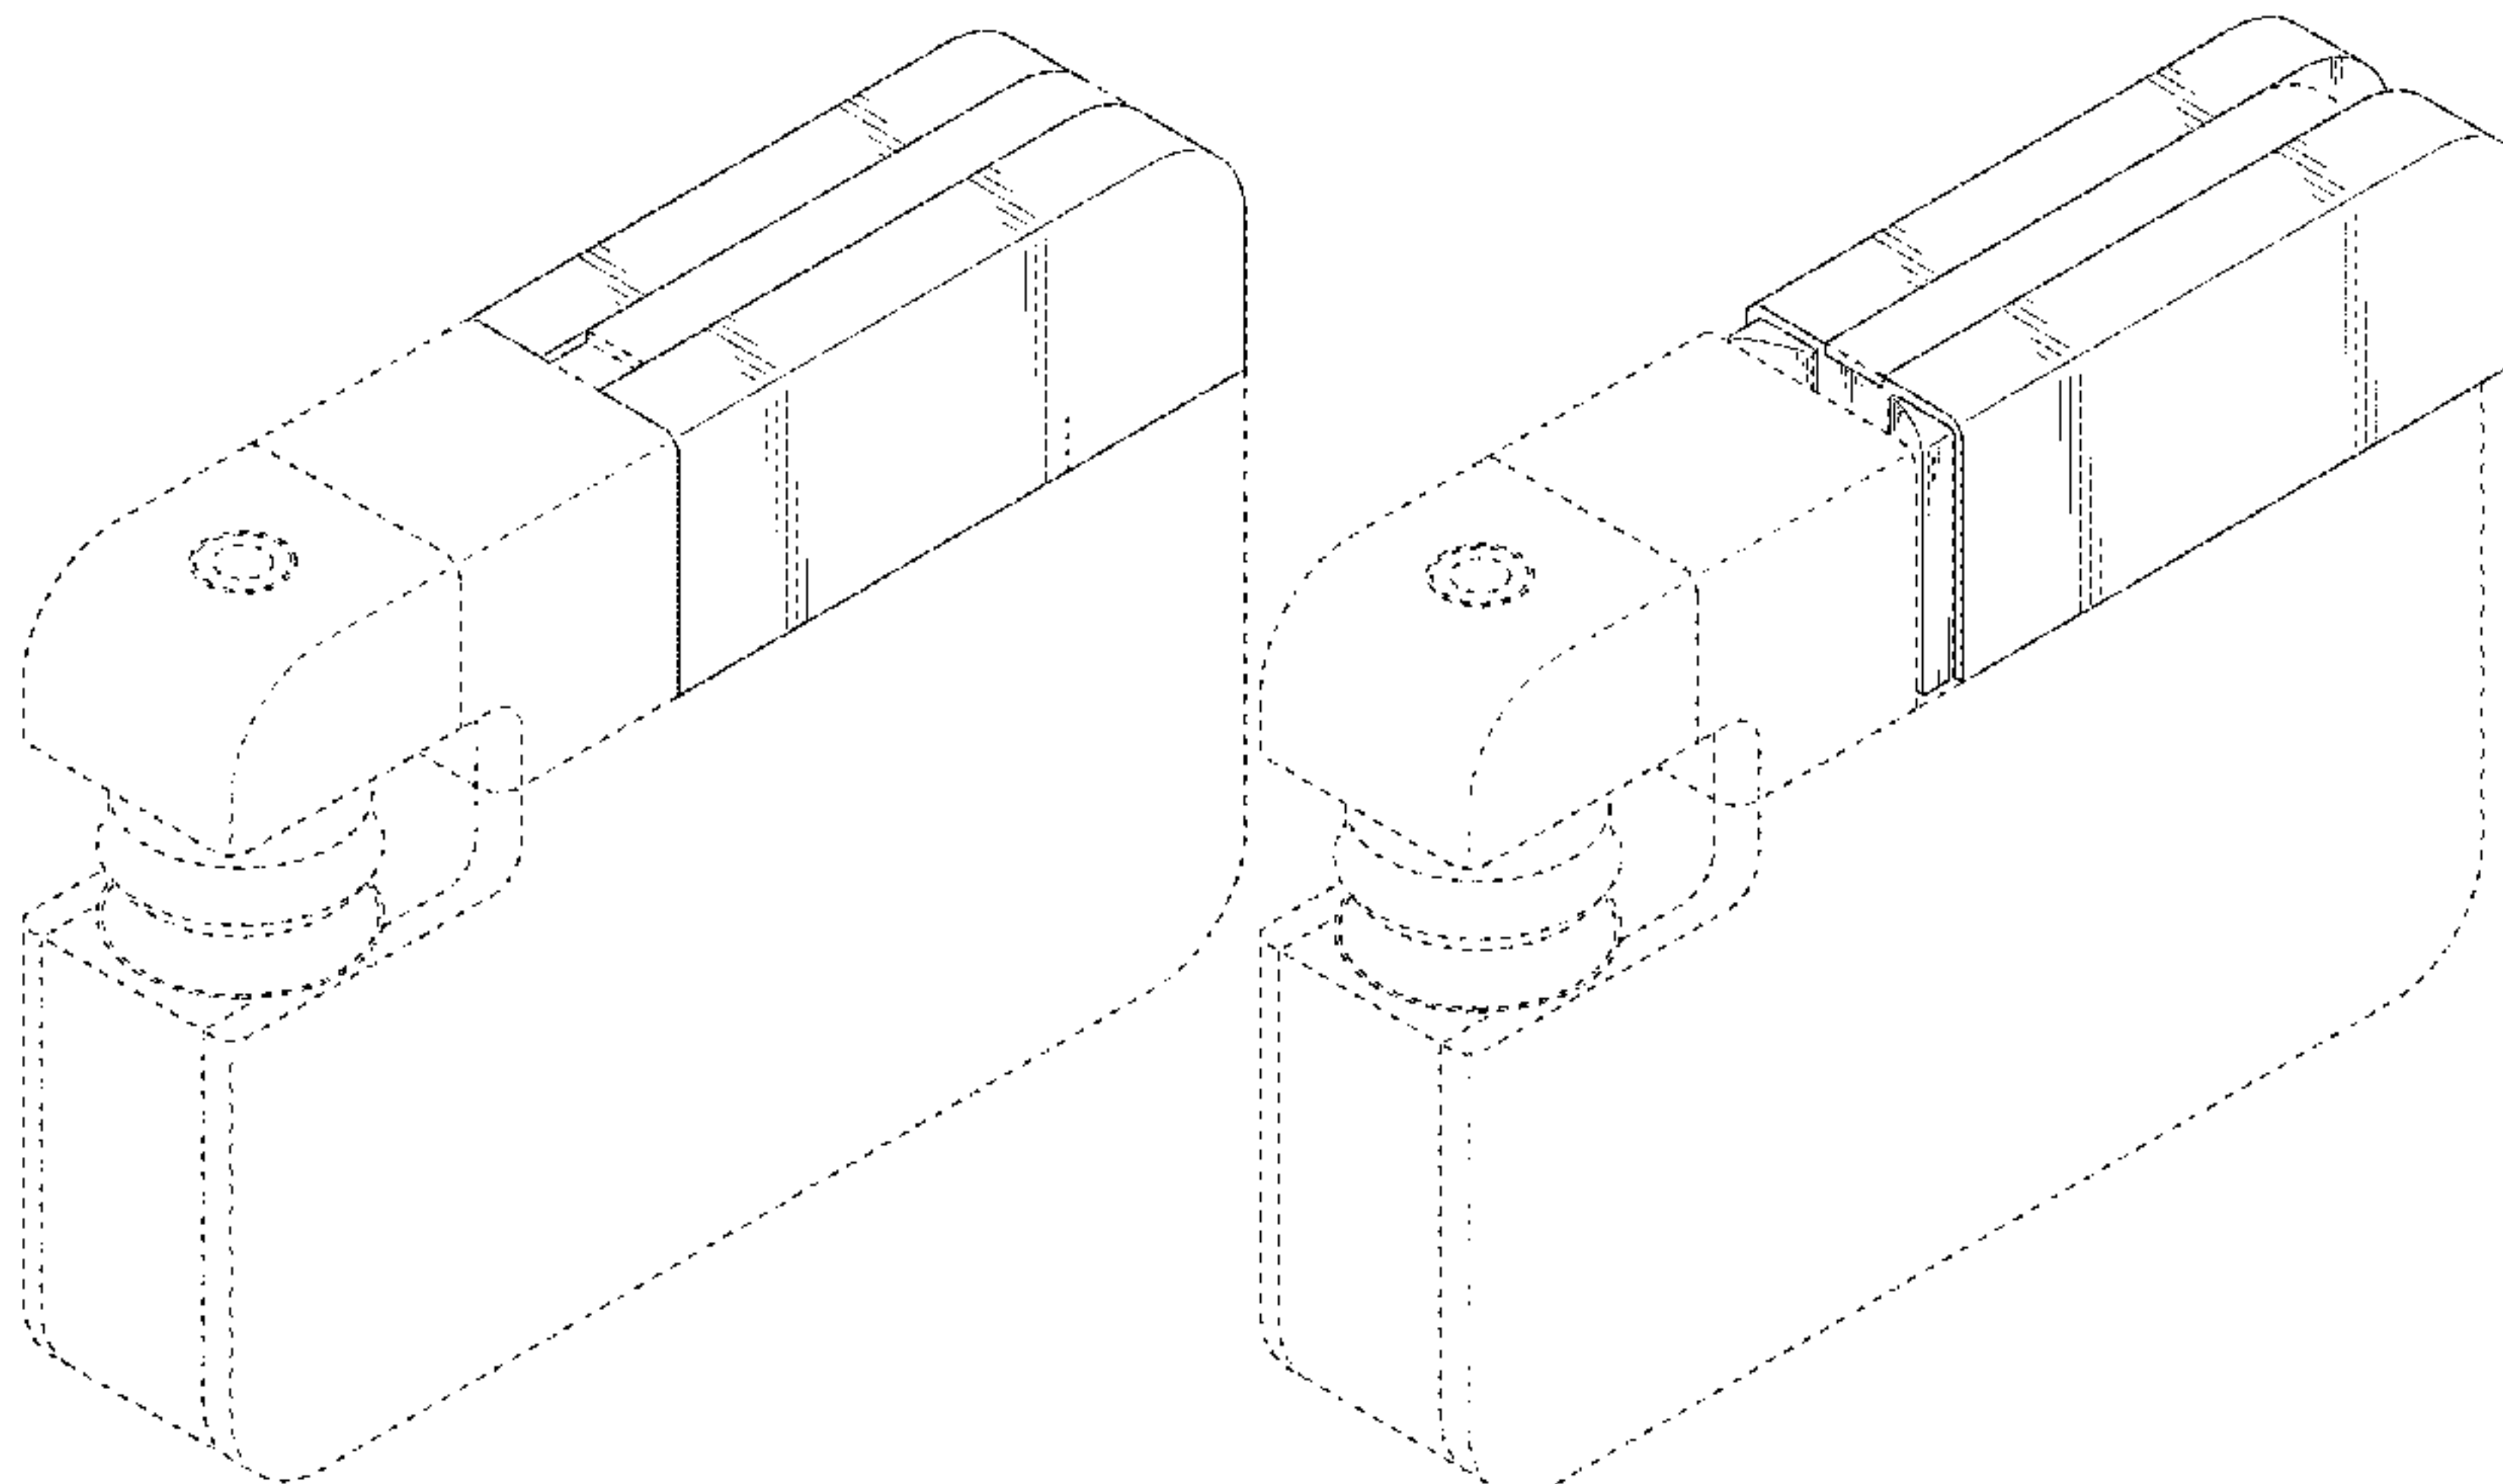

FIG. 34 is a left perspective view of a projector illustrating the situation that the lens is directed to fourth direction, showing our new design;

FIG. 35 is a left perspective view of a projector illustrating the situation that the lens is directed to fifth direction, showing our new design;

FIG. 36 is a left perspective view of a projector illustrating the situation that the lens is directed to sixth direction, showing our new design;

FIG. 37 is a left perspective view of a projector illustrating the situation that the lens is directed to seventh direction, showing our new design;

FIG. 38 is a left perspective view of a projector illustrating the situation that the lens is directed to eighth direction, showing our new design;

FIG. 39 is a left perspective view of a projector illustrating the situation that the lens is directed to ninth direction, showing our new design;

FIG. 40 is a left perspective view of a projector illustrating the situation that the lens is directed to tenth direction, showing our new design; and,

FIG. 41 is a left perspective view of a projector illustrating the situation that the lens is directed to eleventh direction, showing our new design.

The broken lines depict portions of the projector in which the design is embodied that form no part of the claimed design.

1 Claim, 37 Drawing Sheets
