(57) **CLAIM**

The ornamental design for an electronic device with graphical user interface for continuous blood glucose values and associated data, as shown and described.

DESCRIPTION

The patent or patent application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawings will be provided by the Office upon request and payment of the necessary fee. The FIGURE is a front view of an electronic device with graphical user interface for continuous blood glucose values and associated data.

The broken lines showing the electronic device and the remainder of the graphical user interface are included for purposes of illustrating environment and form no part of the claimed design.
