(57) **CLAIM**

The ornamental design for a display screen or portion thereof with animated graphical user interface element incorporating warped circles, as shown and described.

DESCRIPTION

The file of this patent contains at least one drawing executed in color. Copies of this patent with color drawings will be provided by the Office upon request and payment of the necessary fee.

FIG. 1 is a front elevational view of a first image for a first embodiment of a display screen or portion thereof with animated graphical user interface element incorporating warped circles;

FIG. 2 is a front elevational view of a second image for the first embodiment;

FIG. 3 is a front elevational view of a first image for a second embodiment of a display screen or portion thereof with animated graphical user interface element incorporating warped circles; and,

FIG. 4 is a front elevational view of a second image for the second embodiment.

The broken lines showing boundaries of the display screen portion and the remainder of the graphical user interface form no part of the claimed design.

The subject matter in this patent includes a process or period in which an image changes into another image. This process or period in which one image transitions to another forms no part of the claimed design.
