(57) **CLAIM**

The ornamental design for streetlight controller adapter, as shown and described.

DESCRIPTION

FIG. 1 is a top-down perspective view of a streetlight controller adapter, with the top and side shown, according to an embodiment of the present design;

FIG. 2 is a bottom-up perspective view of the streetlight controller adapter;

FIG. 3 is a top view of the streetlight controller adapter;

FIG. 4 is a bottom view of the streetlight controller adapter;

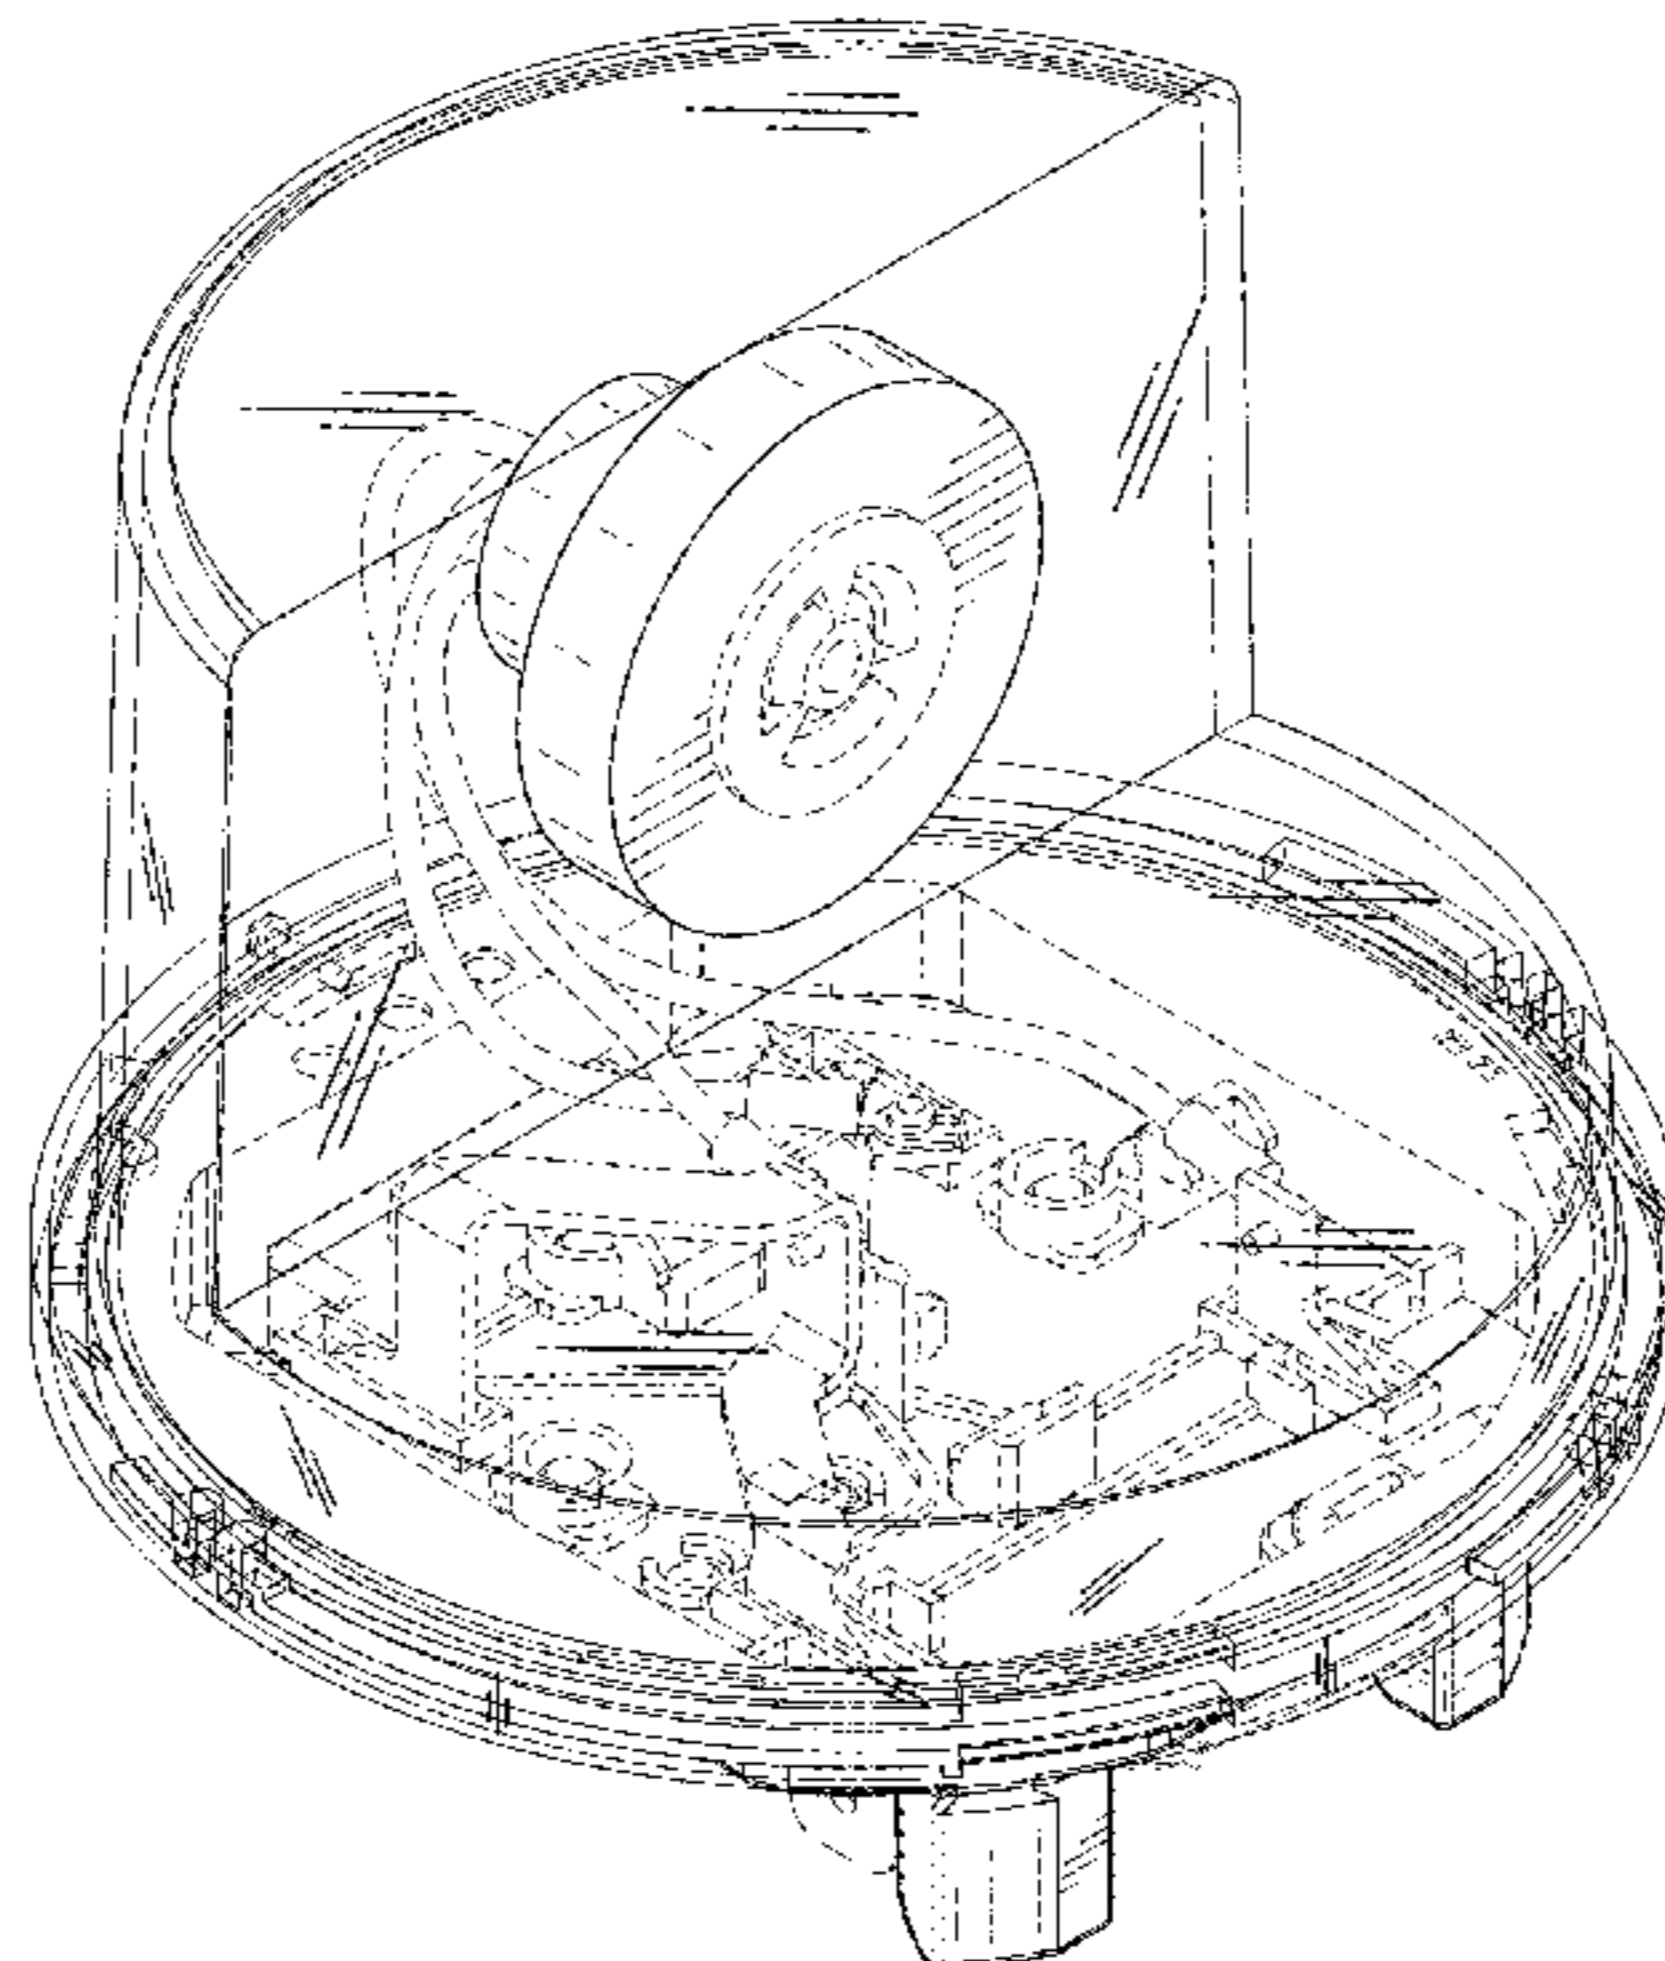

FIG. 5 is a side view of one side of the streetlight controller adapter, which is identical to the other side;

FIG. 6 is a side view of another (adjacent) side of the streetlight controller adapter, which is identical to the other side which is parallel thereto;

FIG. 7 is a front view of the streetlight controller adapter; and,

FIG. 8 is a back view of the streetlight controller adapter. Aspects that do not form part of the claimed design include the internal components of the streetlight controller adapter, as shown in FIGS. 1, 2, 3, 5, 6, 7 and 8, the central parts of the smaller circular structure as shown in FIGS. 1 and 7, and the rectangular prongs as shown in FIGS. 1, 2, 4, 5, and 6, each of which is illustrated with dashed lines. We also disclaim the details shown on the bottom side of the structure such as illustrated in FIG. 2, the teeth-like structures shown around the perimeter of the base as shown in FIGS. 1 and 2, and the narrower cylindrical portion of the dual-cylinder structure shown positioned above the base such as in FIGS. 2, 3, 5 and 6, and partially in FIG. 1.
