(57) **CLAIM**

The ornamental design for a display screen with transitional graphical user interface, as shown and described.

**DESCRIPTION**

The file of this patent contains at least one drawing/photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee.

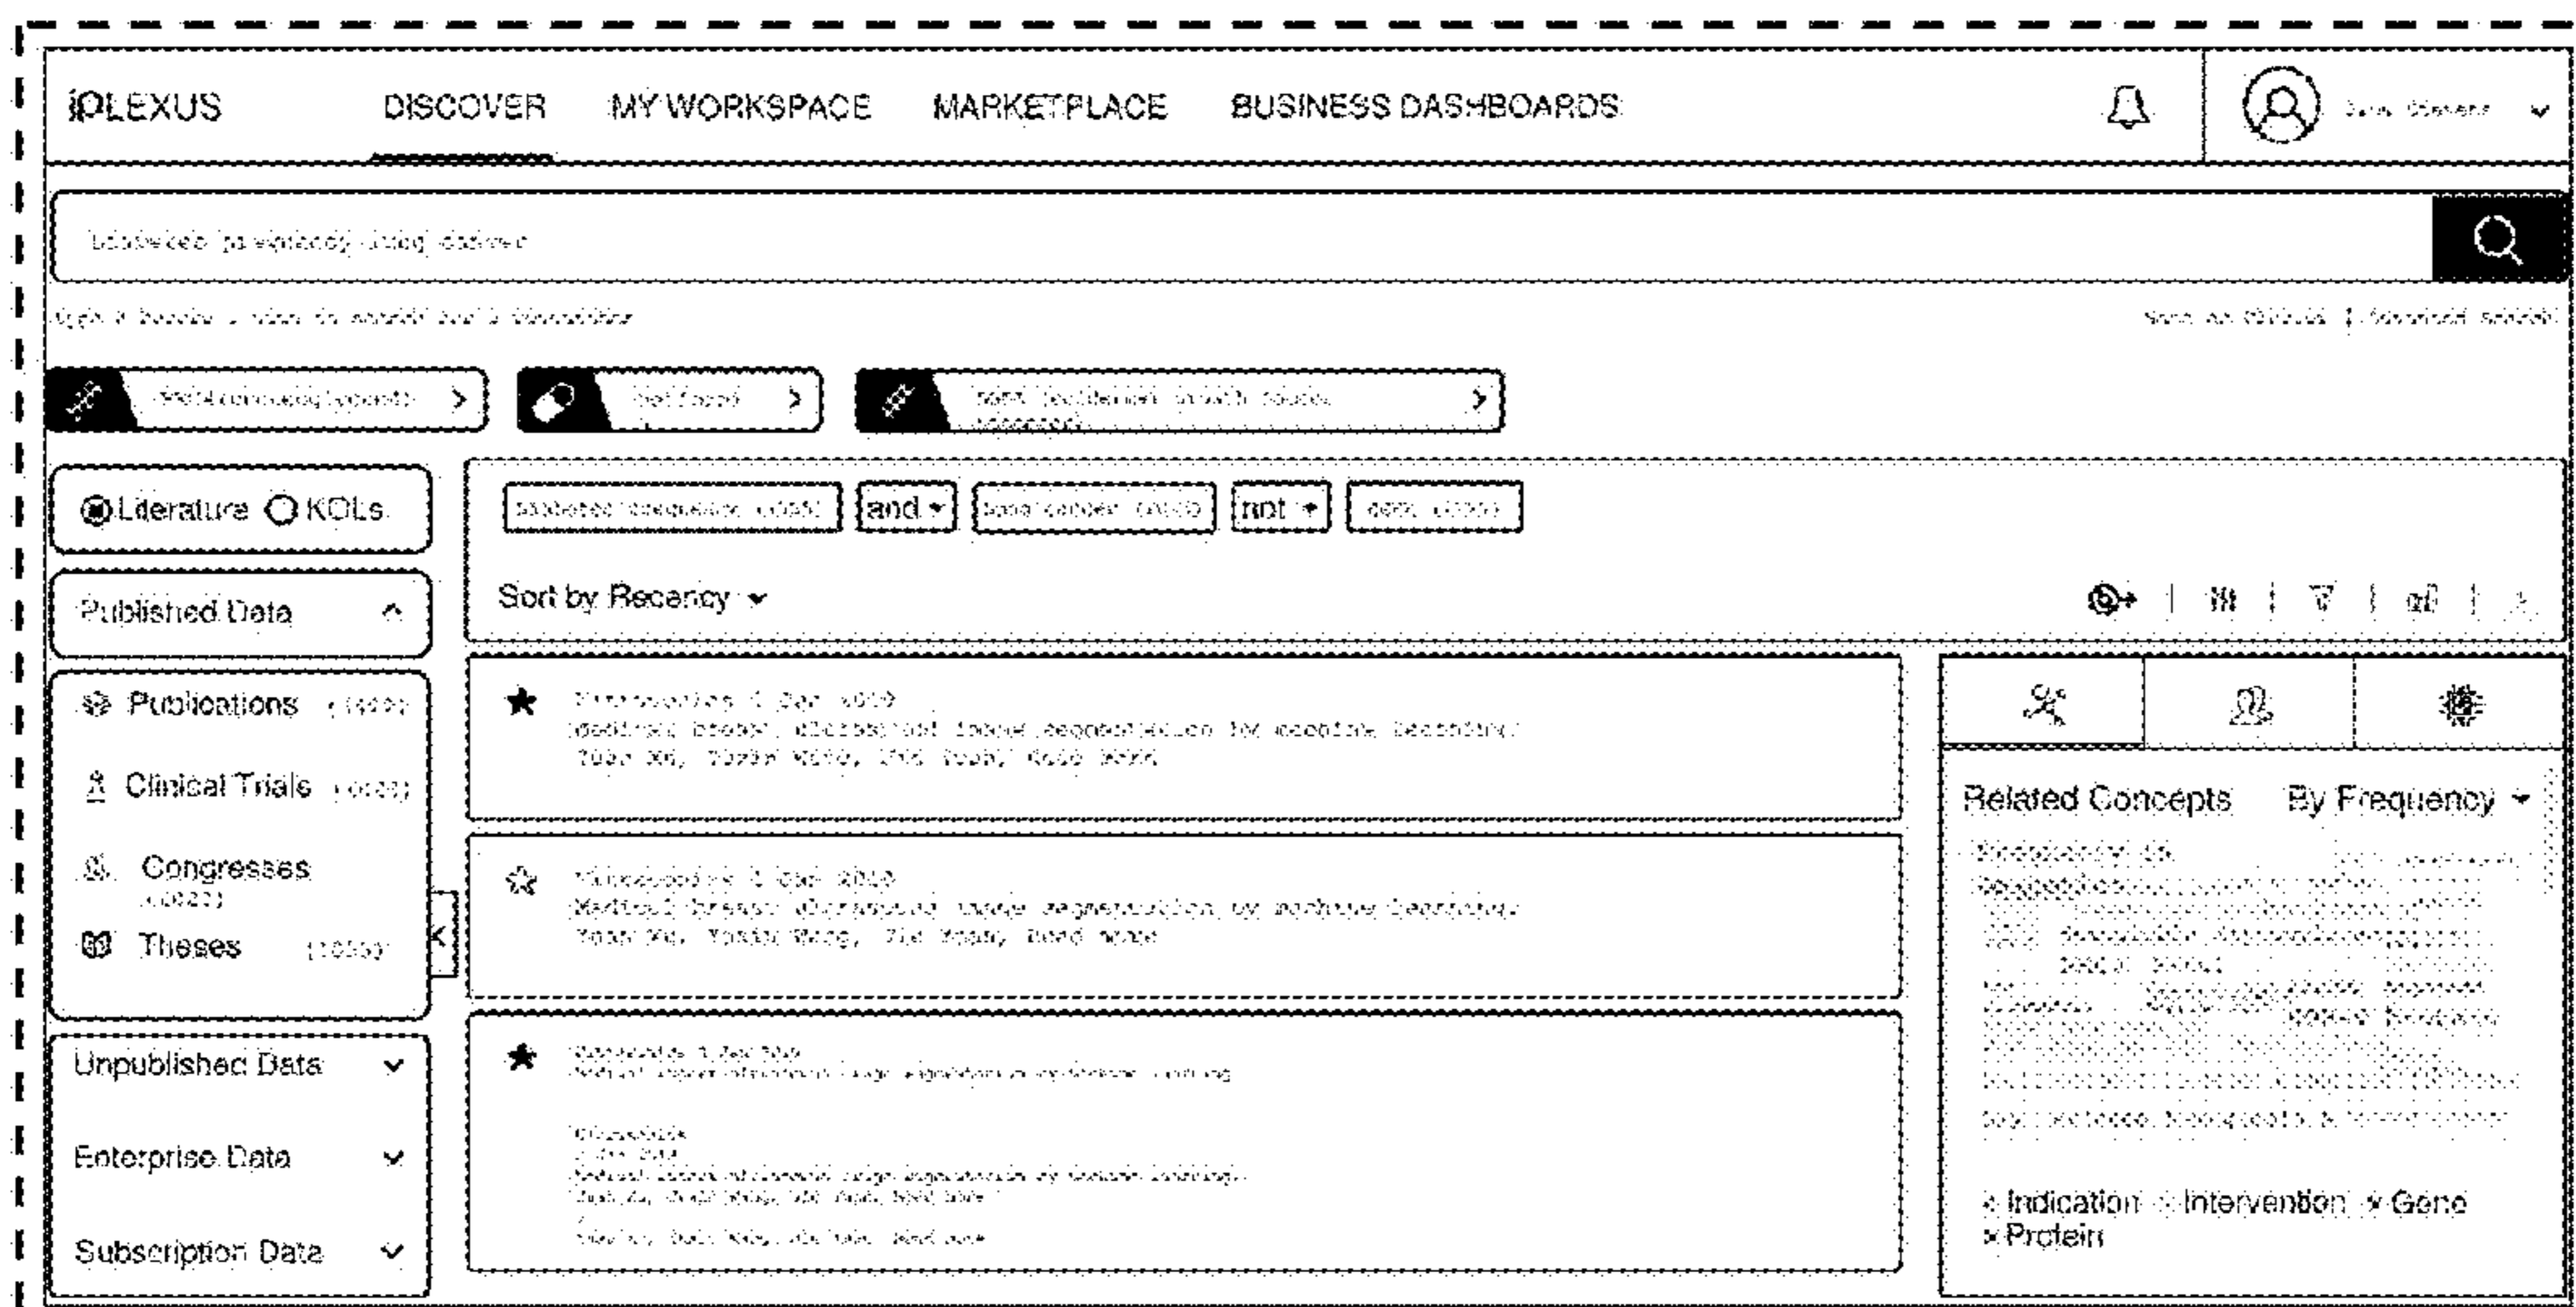

FIG. 1 is a front view of a first image in a sequence of a display screen with transitional graphical user interface.

FIG. 2 is a front view of a second image in the sequence of the display screen with transitional graphical user interface.

FIG. 3 is a front view of a third image in the sequence of the display screen with transitional graphical user interface; and, FIG. 4 is a front view of a fourth image in the sequence of the display screen with transitional graphical user interface.

The appearance of the transitional graphical user interface of the embodiment sequentially transitions between the images shown in FIGS. 1-4. The process or period in which one image transitions to another image forms no part of the claimed design. The broken lines illustrate a display screen and form no part of the claimed design.
