(57) **CLAIM**

The ornamental design for a measurement device display screen with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a measurement device display screen with graphical user interface showing our new design separately in an example environment for completeness of illustration;

FIG. 2 is an enlarged screen view showing a first image thereof;

FIG. 3 is an enlarged screen view showing a second image thereof;

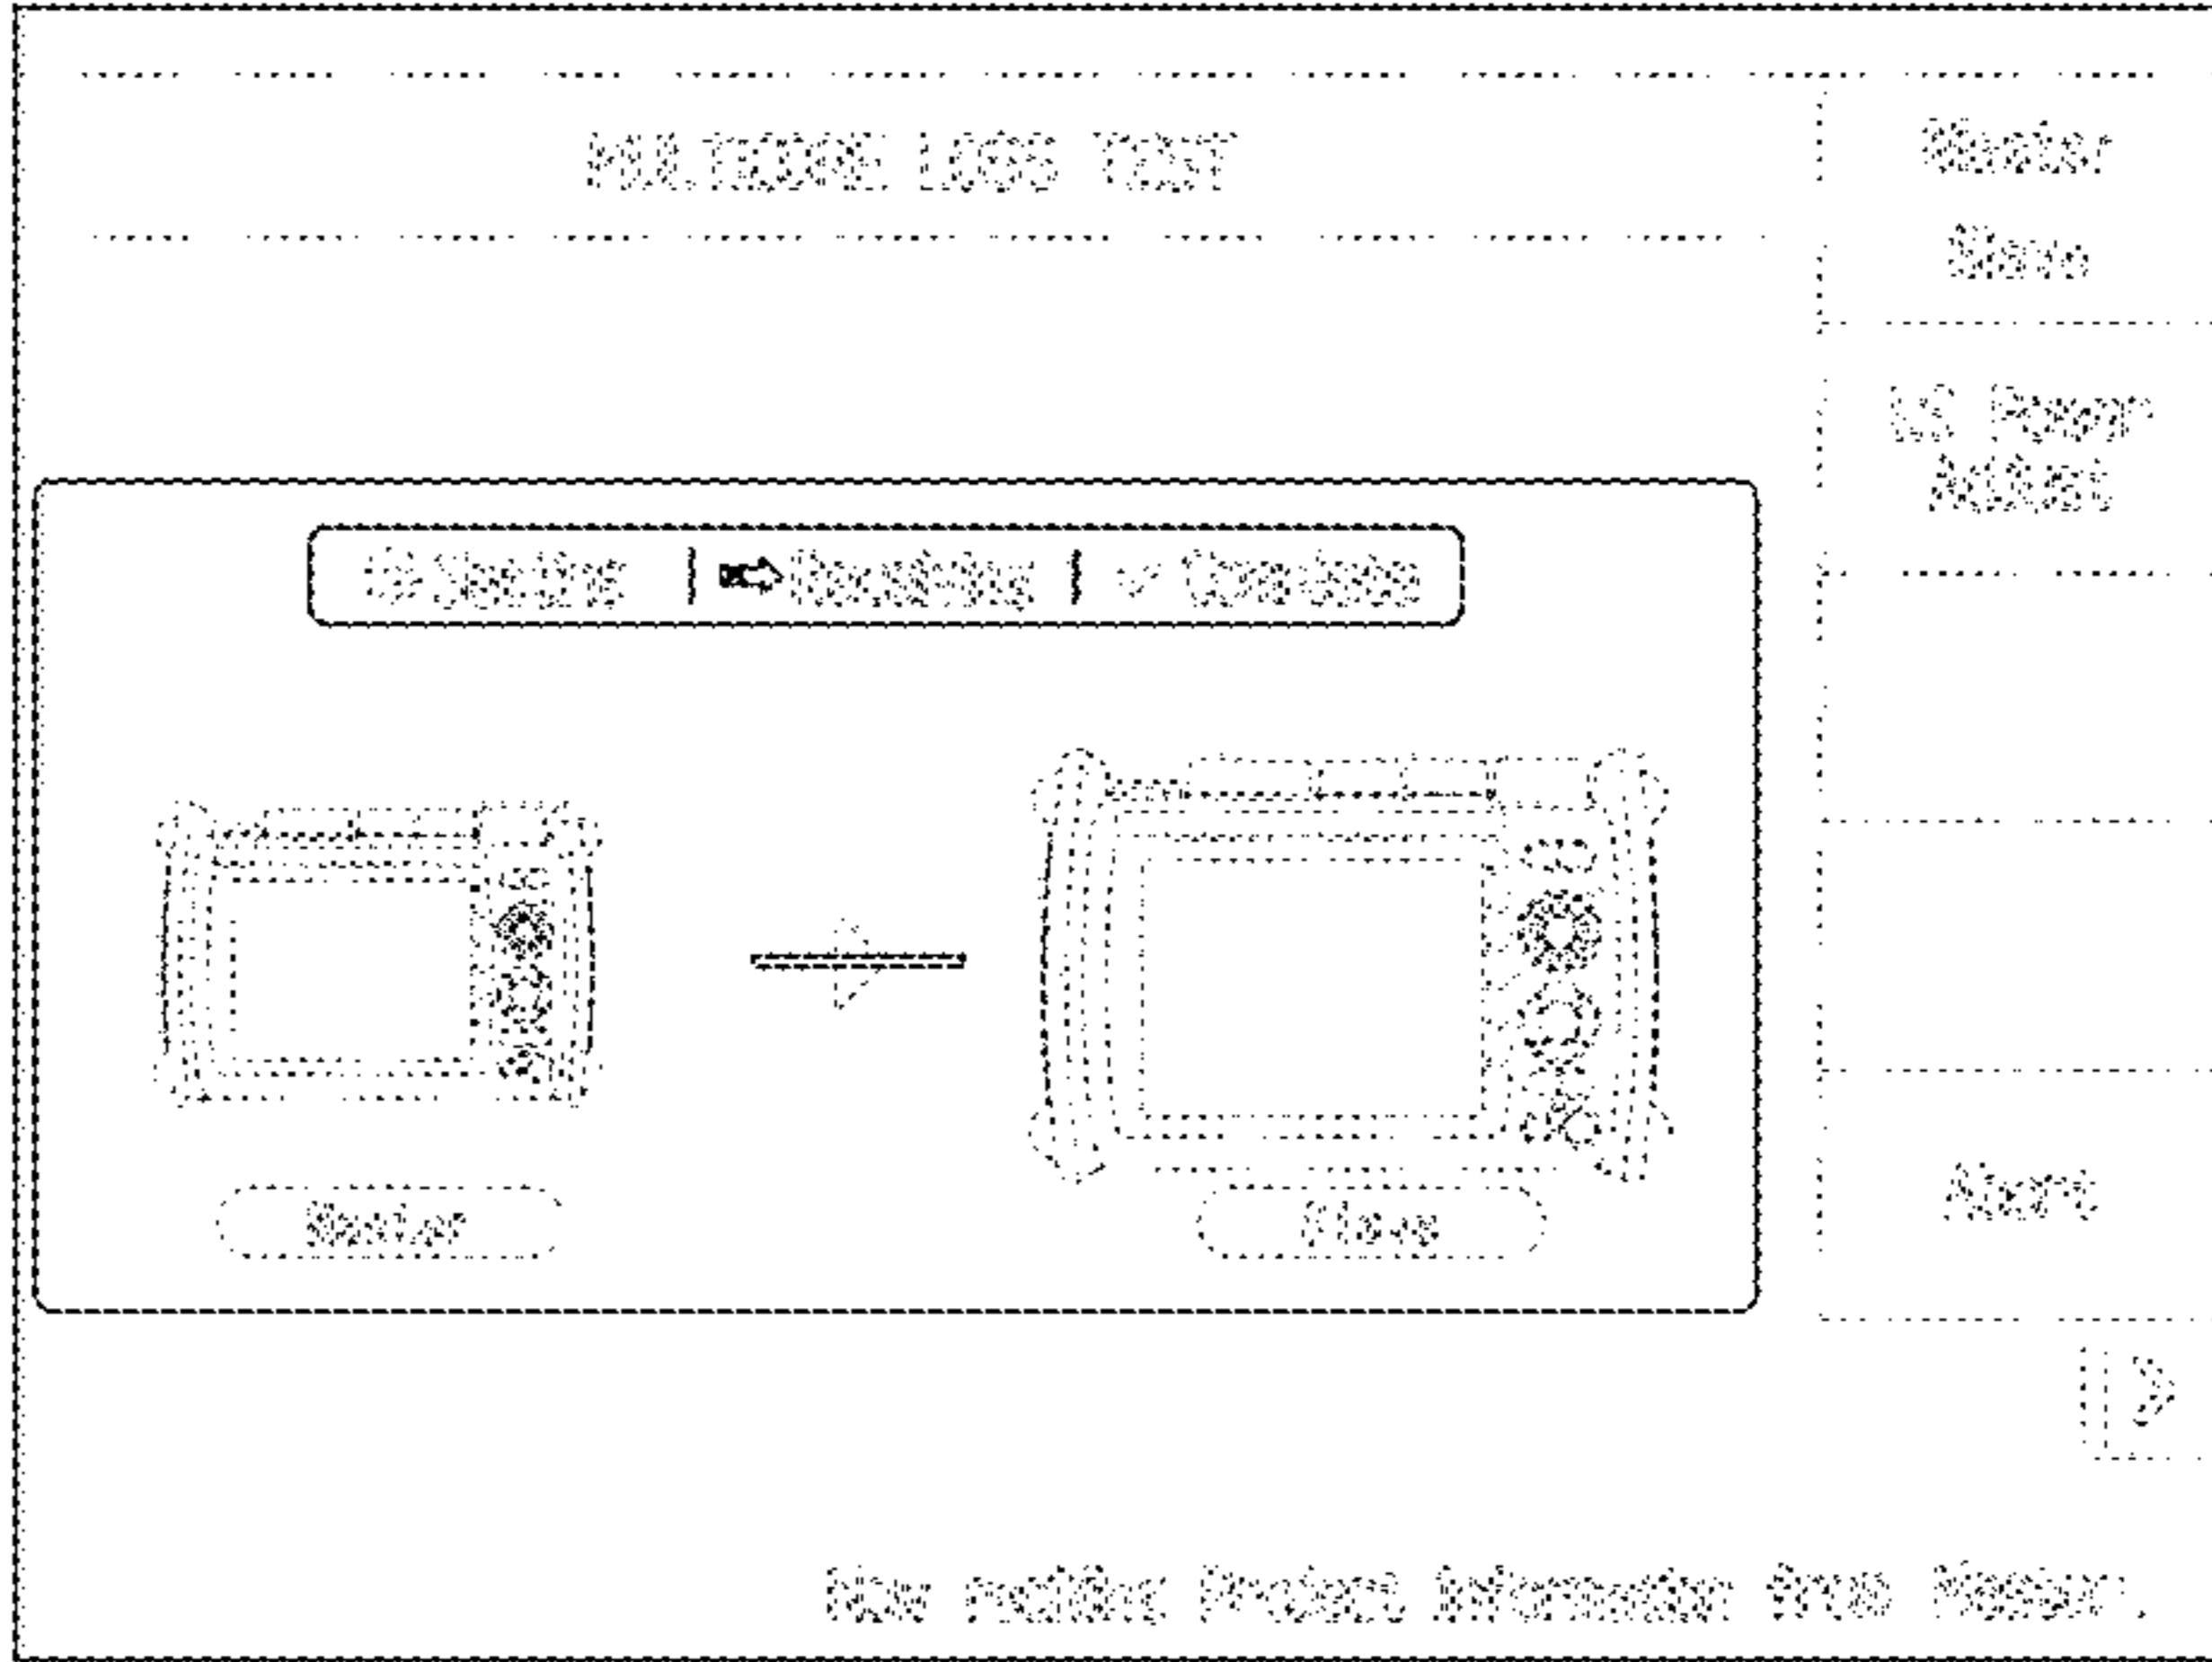

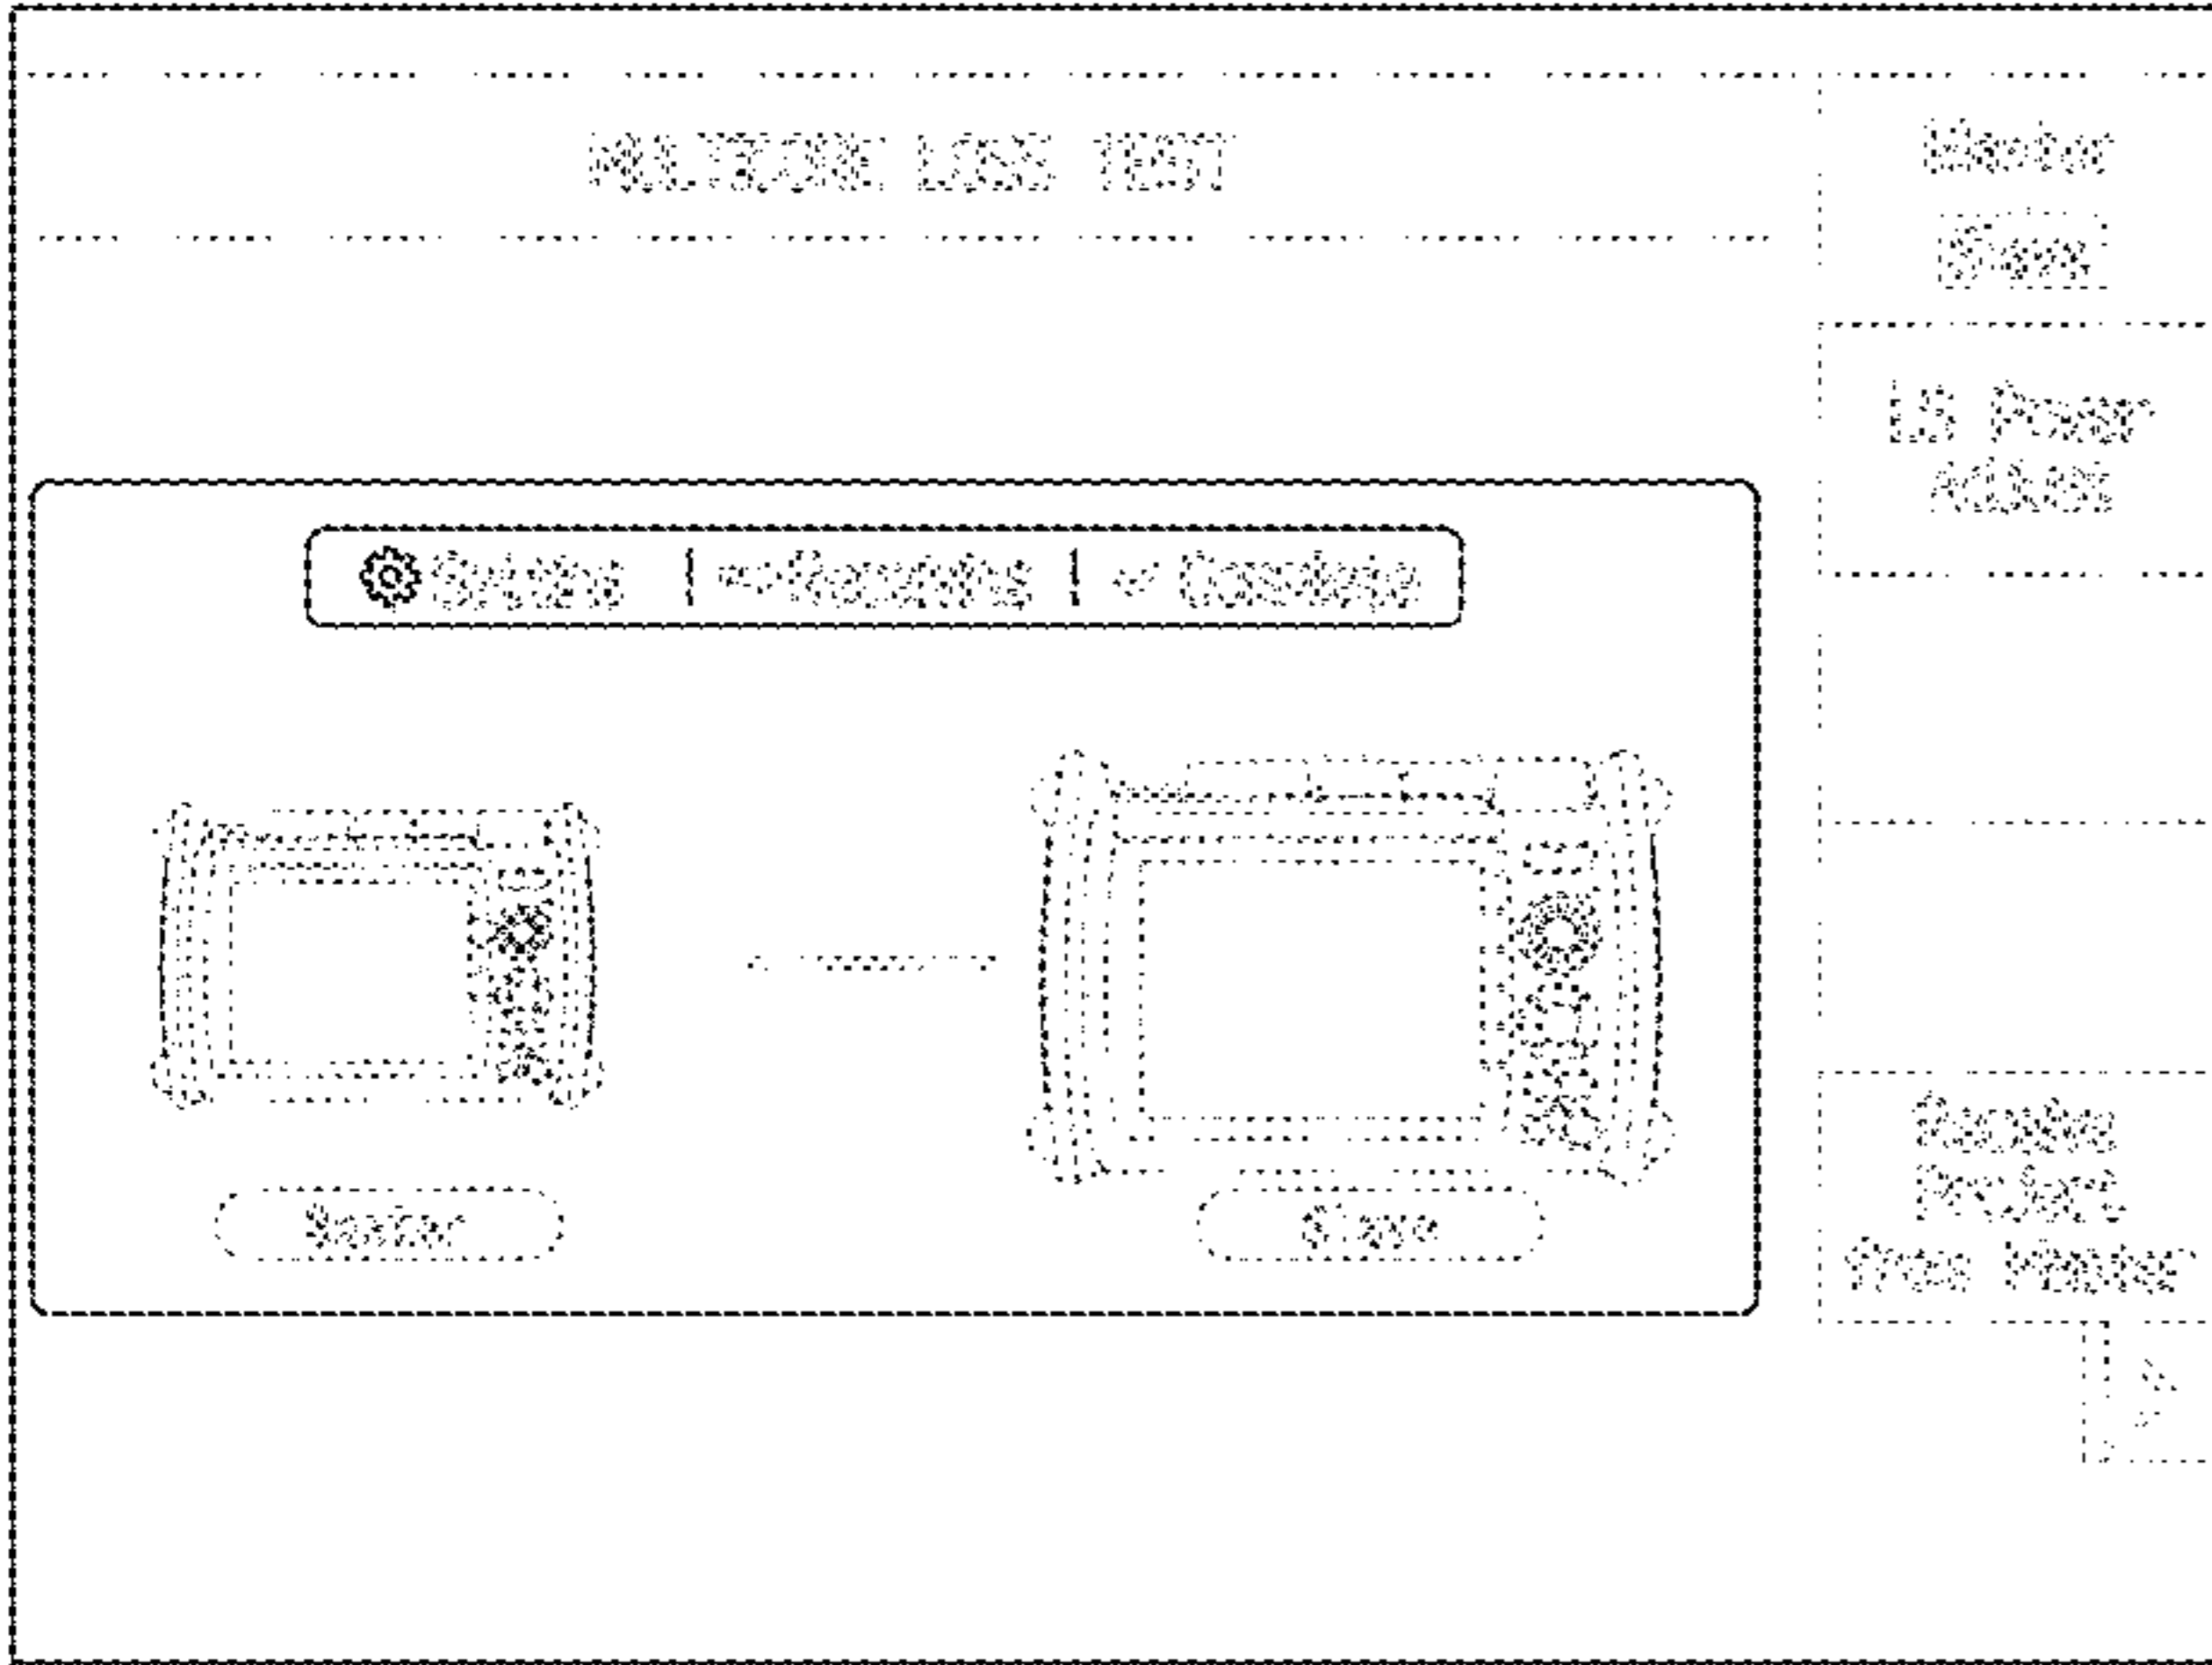

FIG. 4 is an enlarged screen view showing a third image thereof; and,

FIG. 5 is an enlarged screen view showing a fourth image thereof.

The outermost broken lines in FIG. 1 illustrate a measurement device and the remaining broken lines illustrate portions of the transitional graphical user interface. None of the broken lines form part of the claimed design.

The appearance of the transitional image sequentially transitions between the images shown in FIGS. 2-5. The process or period in which one image transitions to another image forms not part of the claimed design.

1 Claim, 5 Drawing Sheets
