CLAIM

The ornamental design for a construction machine information display with graphical user interface, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of a construction machine information display with graphical user interface according to the design; and,

FIG. 2 is an enlarged view of the graphical user interface. The broken line showing of the construction machine information display in FIG. 1 forms no part of the claimed design. The broken line showing of text and portions of the graphical user interface in both views forms no part of the claimed design.
