

US00D892837S

(12) **United States Design Patent**
Quick et al.

(10) **Patent No.:** **US D892,837 S**

(45) **Date of Patent:** **** Aug. 11, 2020**

(54) **DISPLAY PANEL OR PORTION THEREOF WITH A TRANSITIONAL GRAPHICAL USER INTERFACE**

(74) *Attorney, Agent, or Firm* — Vista IP Law Group, LLP

(71) Applicant: **HOLOGIC, INC.**, Marlborough, MA (US)

(57) **CLAIM**

The ornamental design for display panel or portion thereof with a transitional graphical user interface, as shown and described.

(72) Inventors: **Michael D. Quick**, Lunenburg, MA (US); **John A. McCrorey**, Northborough, MA (US); **Sid Mayer**, Carlisle, MA (US); **Sarah Margaret Harrington**, Nashua, NH (US)

DESCRIPTION

The file of this patent contains at least one drawing/photograph executed in color. Copies of this patent with color drawing(s)/photograph(s) will be provided by the Office upon request and payment of the necessary fee.

(73) Assignee: **HOLOGIC, INC.**, Marlborough, MA (US)

FIG. 1 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a first image in the sequence of the first embodiment;

(**) Term: **15 Years**

FIG. 2 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a second image in the sequence of the first embodiment;

(21) Appl. No.: **29/668,857**

FIG. 3 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a third image in the sequence of the first embodiment;

(22) Filed: **Nov. 2, 2018**

FIG. 4 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a fourth image in the sequence of the first embodiment;

(51) **LOC (12) Cl.** **14-04**

(52) **U.S. Cl.**
USPC **D14/486**

FIG. 5 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a fifth image in the sequence of the first embodiment;

(58) **Field of Classification Search**
USPC D14/485–495

(Continued)

FIG. 6 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a sixth image in the sequence of the first embodiment;

FIG. 9 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a ninth image in the sequence of the first embodiment;

(Continued)

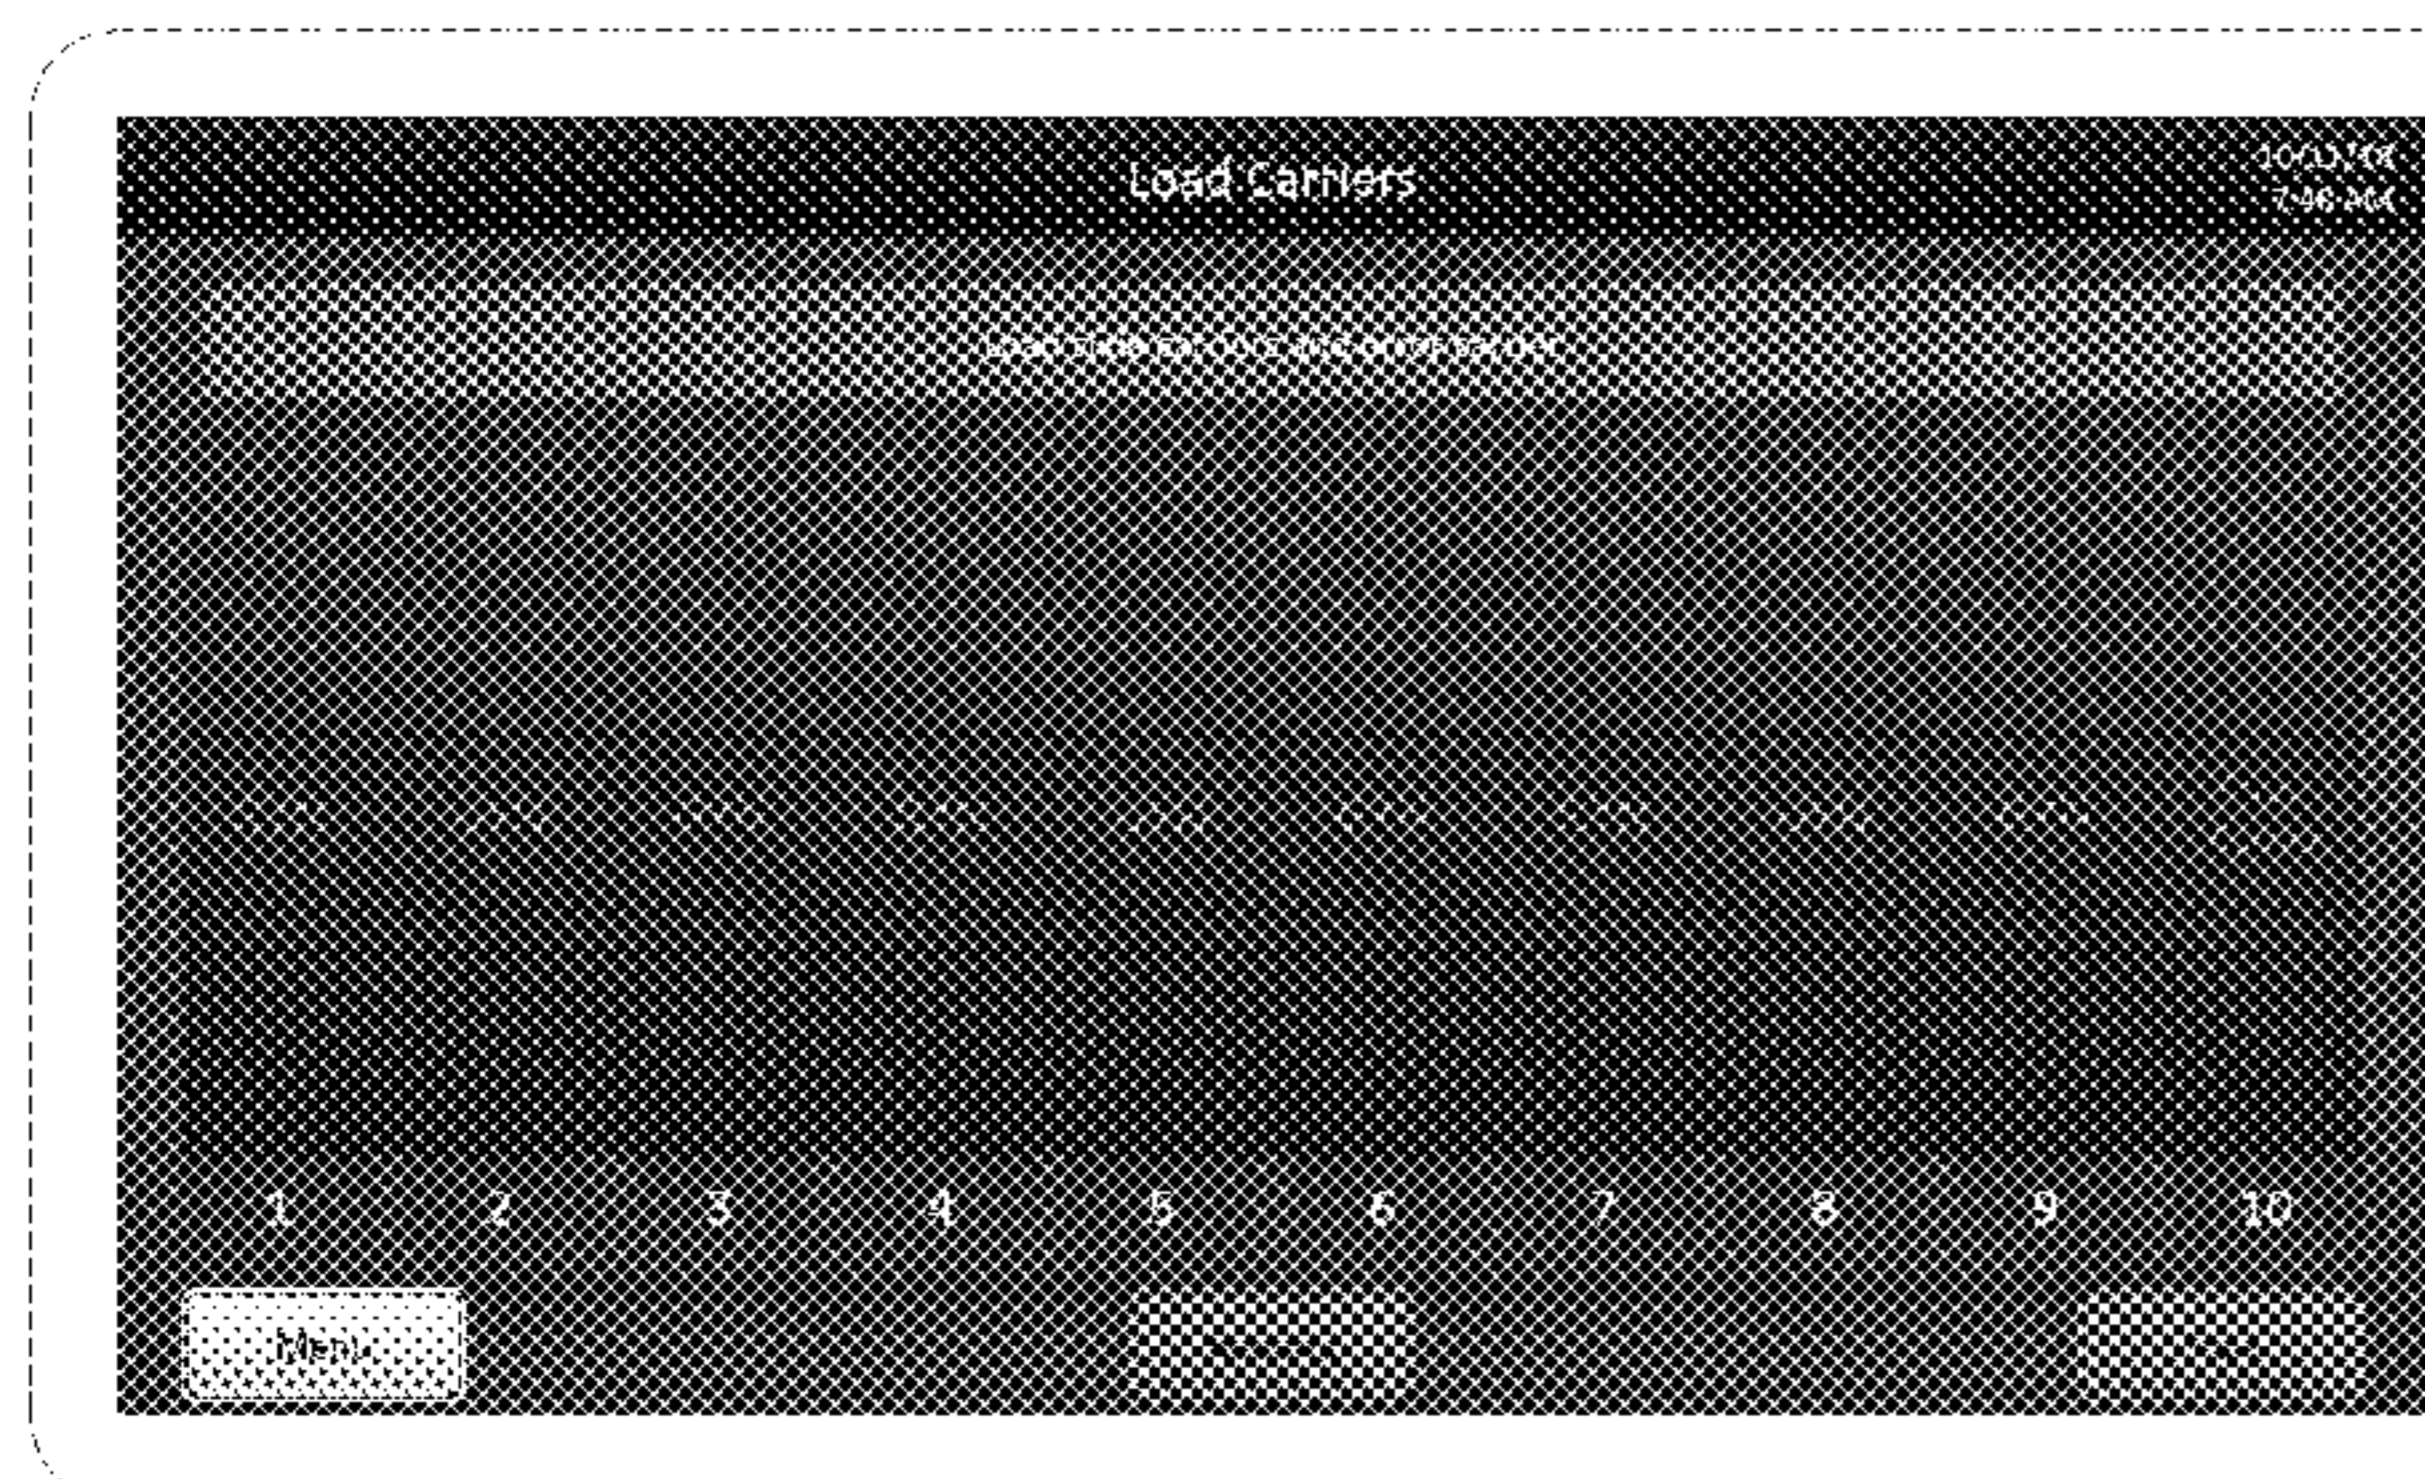

FIG. 10 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a tenth image in the sequence of the first embodiment;
 FIG. 11 is a front view of a display panel or portion thereof with a transitional graphical user interface showing an eleventh image in the sequence of the first embodiment;
 FIG. 12 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a twelfth image in the sequence of the first embodiment;
 FIG. 13 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a thirteenth image in the sequence of the first embodiment;
 FIG. 14 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a first image in the sequence of the second embodiment;
 FIG. 15 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a second image in the sequence of the second embodiment;
 FIG. 16 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a third image in the sequence of the second embodiment;
 FIG. 17 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a fourth image in the sequence of the second embodiment;
 FIG. 18 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a fifth image in the sequence of the second embodiment;
 FIG. 19 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a sixth image in the sequence of the second embodiment;
 FIG. 20 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a seventh image in the sequence of the second embodiment;
 FIG. 21 is a front view of a display panel or portion thereof with a transitional graphical user interface showing an eighth image in the sequence of the second embodiment;
 FIG. 22 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a ninth image in the sequence of the second embodiment;
 FIG. 23 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a tenth image in the sequence of the second embodiment;
 FIG. 24 is a front view of a display panel or portion thereof with a transitional graphical user interface showing an eleventh image in a sequence of the second embodiment;
 FIG. 25 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a twelfth image in a sequence of the second embodiment; and,

FIG. 26 is a front view of a display panel or portion thereof with a transitional graphical user interface showing a thirteenth image in the sequence of the second embodiment. The subject matter of the present disclosure includes graphical user interface components. The subject matter of the present disclosure includes a process or period during which one computer graphical user interface component changes into another. In particular, the appearance of the image transitions between the images shown of the various designs described above. This process or period in which one computer graphical user interface component transitions into another computer graphical user interface component forms no part of the claimed design. The broken lines depicting a display panel or portion thereof are included for the purpose of illustrating environmental structure and form no part of the claimed design.
