(57) **CLAIM**

The ornamental design for a display screen or portion thereof with transitional graphical user interface, as shown and described.

DESCRIPTION

FIG. **1** is a front view of a display screen or portion thereof with transitional graphical user interface showing a first image in a sequence of our design; and,
FIG. **2** is a front view showing a second image thereof.
The appearance of the image transitions sequentially between the image shown in FIG. **1** to FIG. **2**. The process or period in which one image transitions to another forms no part of the claimed design.
The shading depicts a contrast in appearance.
The outermost long-dashed broken lines illustrate an electronic device, which constitutes environment of the design and forms no part of the claim. The medium-length-dashed broken line illustrates a display screen and the boundary of the design and forms no part of the claim. The remaining
