(57) **CLAIM**

The ornamental design for a tire tread, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a tire including the tire tread of the present application taken generally from the front and a first side of the tire;  
FIG. 2 is a front view thereof, and any top, bottom, or rear view would be the same as the front view;  
FIG. 3 is a side view of the first side thereof, the second side being the same as the first side;  
FIG. 4 is an enlarged partial, perspective view taken generally from the front and the first side thereof;  
FIG. 5 is an enlarged, partial front view thereof; and,  
FIG. 6 is an enlarged, partial side view of the first side thereof.  
The broken lines and the region between the broken lines defining the inner bead and the first (or second) sidewall depicts subject matter that forms no part of the claimed tire tread design, and is included for the purpose of illustrating the full tire. Likewise, the tire interior forms no part of the claim. The tread pattern is understood to repeat throughout the circumference of the tire. The tread design is symmetrical and the views of the second side are the same as the views of the first side.
